CLARKSVILLE, TENN., FRIDAY, DECEMBER 25, 1868.

VOL. 4.--NO. 12.

INFLAMMABLE OILS.

A Precautionary Law on the Subject.

The following Senate bill passed its third reading in the House, yesterday, and is now a law:

SECTION 1. Be it enacted by the General Assembly of the State of Tennessee, That no person shall mix for sale naphtha and illuminating oils, or shall knowingly sell or keep for sale, or offer for sale such mixture, or shall sell or offer for sale, or make from petroleum for illuminating purposes, inflammable oil at a less temperature than 120 degrees Fahrenheit, and any person so doing shall be held guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than \$100 nor more than \$500, and by imprisonment for a term of not less than six months nor more than three years.

SECTION 2. Be it further enacted, That this act shall take effect from and after its passage.

What Remains of the Greenbacks.

Mr. Spruitt, in his report, tells what becomes of the greenbacks, as follows:

Government securities are destroyed by being placed in a large revolving iron cylinder, which is then securely locked with three locks, and keys to the respective locks being kept one each by the three members of the committee appointed to witness the destruction.

What Remains of the Greenbacks. Mr. Spruitt, in his report, tells what becomes of the greenbacks, as follows:

Government securities are destroyed by being placed in a large revolving iron cylinder, which is then securely locked with three locks, and keys to the respective locks being kept one each by the three members of the committee appointed to witness the destruction.

What Remains of the Greenbacks. Mr. Spruitt, in his report, tells what becomes of the greenbacks, as follows:

The Leg.

Some enthusiastic Frenchman once asked the human leg to be the most philosophical of all studies.

What stork, for instance, does the obese limbs betray? What a shrew is the possessor of a limb like a walking stick! But what a gentle woman is she of the arched instep, the round ankle and the graceful pedestal, swelling to perfection and modulating to lightness the delicate downy knobby calf, exhibits! What an irresolute soul does the lanky limb betray! How well the strong articulation of the firm supple; how the flat ankle reveals the vacant mind.

Young men about to marry—observe. The dark girl with a large leg will become fat at thirty, and the sleek and round will degenerate at thirty-five into the possession of a pair of ankles double the natural size, and afflicted with rheumatism. The fair-haired female, with a thin limb, will get up at half-past five in the morning, will scold the servants, and will spend her nights talking scandal over tea. The little rosy girl with a sturdy muscular, well turned leg, will be just the girl you want.

If you can find a red-haired girl, with a large limb, pose the question at once.

The short lady should always possess a slender limb; the tall lady should possess a large and ample one.

No doubt these hints are reliable, and the prevailing fashions make them quite practical and available.

THIRTY THOUSAND DOLLARS GOES DAILY INTO THE COUNTRY.

In the last four weeks the average arrivals of cotton per day in Columbus has been over 400 bales, and at least 300 bales of them have been taken by the street buyers, and the farmers have received the money. The greatest portion has been purchased for over 20c. Say it brought that amount. The three hundred bales were then worth \$30,000. Nearly the whole of this sum is taken into the country.

What is done with it? Is the question. We confess our inability to discover, though we have made inquiries of those who are supposed to know. Last winter, considerable quantities of gold were bought by countrymen as a permanent investment. This season the transaction in the precious metal are few and far between. Scientific men are making inquiries for land, and not a few sales have been effected of late. The disposition to farm is now greater than at any time since the war, and the value of land is advanced to the point of \$9,175,855,012 28. All this immense amount entered upon the books of this office, and the sum of \$2,004,748,177 54, being one-half of \$4,009,496,355 08, is being one-half of \$8,119,152,711 16, which is being one-half of \$16,238,302,423 32.

The currency destroyed during the war amounted to \$296,543,135 23. Total amount destroyed, including bonds, certificates of indebtedness, etc., \$770,519,855 94.

The total amount of United States money, as of the 1st of January, 1868, was \$993,159,078 41; broken national bank notes, \$523,615; certificates of indebtedness, \$582,470; \$88 30; for the month of January, 1868, \$1,441,584,908; total received from beginning to date, \$1,923,065,241 64.
