Haverly's Minstrels.

Haverly's Minstrels played to a full house at the theatre in this city Wednesday night. Those who love to laugh have a big majority in this part of the world and the farce and extravaganza of burnt cork performances is one of the surest means of raising the ripples. The troupe Wednesday night got off a number of good jokes and said an immense amount of funny things, of course, minstrels always do. The music and singing was in the main good, and the audience seemed very much pleased with the performance. We are compelled to say, however, that the programme, the acting and the display made, lacked completeness and was not at all first class. One thing is evident, the name Haverly don't signify as much as it formerly did, and the troupe here Wednesday night is no way up to the one on the road two years ago under the same appellation.

American Newspaper Annual. The American Newspaper Annual for 1883, from Messrs. N. W. Ayer & Son, of Philadelphia is a valuable publication. It is especially valuable to a newspaper office and could be found of practical use in other places. In speaking of this book the Nashville American says: "It is a convenient form of reference also to those wishing to subscribe for, or ascertain the name of, religious, agricultural, and all known class publications. Trade journals are arranged so that any paper published in the interest of any particular trade can be seen at a glance. It gives also the population of the United States, and information of a political, mining and agricultural nature in reference to soil, location, area, etc., making it particularly suitable for counting-room and office collection of books of reference. Price, \$3.

The following is from the Cincinnati Tobacco Journal of the 17th inst., in regard to the present tobacco crop:

Cultivation is now actively pursued in all tobacco growing sections, and as it proceeds it is evident, in every instance, that the average yield will be materially below that of the past year, and that much of it, even with the best of handling and the most favorable curing seasons, cannot make good quality. Besides this, considerable tobacco will either have to be left in the field for some time to come, or run the chance of damaging frosts, or be cut green. In either case the prospects are not encouraging.

WHITE silk waistcoats with dark blue costumes are seen, with turndown collars and lapels like a gentleman's coat. They are buttoned down the front, and the great consideration is the buttons, which must be costly and in harmony with the color of the dress fabric.
