Mr. L. J. Irwin, the general passenger agent, has done a great deal to make his road popular, and the enforced additional equipment and new heavy rail attest the success with which he is meeting.

A scientist says there is nothing like trees to keep the air pure. Its leaves take up carbonic acid. The volume of carbonic acid exhaled by a human being in twenty-four hours is estimated at 100 gallons. If a single tree were growing where a dozen or twenty men were sleeping, the purifying action of its leave would insure the air being kept fresh.
