### The Kimball Player Piano

Artistic excellence and durability in the Kimball Piano have been the aim in manufacturing this world-renowned instrument. The Kimball 88-Note Player Piano mechanism adds the one feature which makes the instrument a complete unit and available for every member of the family. This player mechanism has been developed to give the utmost facility of interpretation of the music with ease of operation and simplicity of construction. This simplicity of construction insures durability a quality not to be dispensed with. With the Kimball Player-Piano the performer may express his own interpretation of the music played, thus giving an individuality to the performance and removing it from so-called automatic music. The tempo lever gives absolute control of the time. The pedals, sensitive and responsive to a marvelous extent, not only supply the motive power, but by slight movement, or pause, produce the louder and softer effects so essential to the adequate expression of music, and varied at the will of the operator.

### Through Algiers To New Orleans.

It is more unusual than we could wish for Algiers to be a distributing point for manufactured goods for the vicinity of New Orleans, but, in one line at least, there appears to be a tendency in this direction. The Algiers Cornice and Plumbing Works, of which our enterprising citizen, Mr. Julius Bodenger, is president, is now purchasing sanitary enameled ware in larger volume than any other firm of contracting plumbers in New Orleans and these goods are of course being used in larger quantities on Mr. Bodenger's contracts in the city than on this side of the river.

At this writing there has just arrived, for this firm's use, five solid carloads of bath tubs, sinks, lavatories, laundry tubs, etc., about fourteen hundred and twenty pieces, and if any one is without these very necessary conveniences next summer it will be through no fault of our friend "Julius."—Adv.
