One day ten years ago in the month of April a stranger who gave his name as William Hobson appeared in the vil lage of Grafton in a certain middle state and engaged quarters at the inu for several months in advance. This was something never heard of before and created quite a sensation. Then the report went around that Mr. Hob son intended to build and operate a large woolen mill there, and that was sensation No. 2. Then a county constable had his suspicion aroused that the stranger was a fugitive from justice and that was sensation No. 3. The fourth was not far away. Mr. Hobson was a man of middle

age. He was quiet and kept to him-With all the pumping they could do the villagers could find out very little about him. The most that could be extracted from him was that he had made an important medical discovery and would furnish particulars later on, around a bit. Mr. Hobson leased ten acres of land of a farmer near the town, and the fourth sensation came when it was known he intended to raise sunflowers. No human being in that county had ever heard of any one growing more than a hundred head. and here were to be thousands and thousands of them! What could be done with them? How did they fit into a medical discovery?

Men and teams were hired, the ground prepared, and sunflower seeds were brought in and planted. The en terprise was discussed in hundreds of homes and given liberal space in the county papers, but Mr. Hobson would not interview. His reply was "wait." When the stalks were knee high that field was good to see. It was a novelty that drew.

Just about that time almost every person in the county received a circu-lar through the mails. It was about the new medical discovery, and the cat was out of the bag at last. Sunflower tea would speedily-

So far as could be scertained, he was not the man putting out the advertising, nor did he ever say in so many words that sunflower tea would cure a complaint of any kind. It was not known till the sunflowers began to turn their yellow faces to the morning sun and hang their heads in modesty what he proposed to do with the crop. Then indiriduals began to come to speak for seed. It was so much seed for 50 cents and no smaller orders taken Mr. Hobson had 400 orders booked and was still writing down names when a merchant of the town went to a money

earth made Mr. Hobson willing to listen to an offer. He had trouble with his heart, and sunflower tea During the next three days 100 peo

ple came per day to buy and take sunlower heads. Some had driven a distance of twenty miles. The stalks covering three acres had been sold and carried away by this time, when New York wholesale druggist aphe was from the big city, and he certainly smelled of drugs. He wanted the balance of the crop at \$2,000.

Then Mr. Hobson did a mean thing Had his heart been all right he would never have thought of doing such s thing. He sold those seven acres of sunflowers as they stood to the mer chant and capitalist for \$2,500 and was missing the next day. So was the New York wholesale druggist. In three or four days the news got around, and buyers became scarce. What were seven acres of sunflow
