ANSWERS TO QUERIES

Q. Chris Columbus did not discover America like the geography tells us. The guy that wrote the geography doesn't know. He wasn't there!

FASHION COLUMN

NOTE

An up-to-date gown for indoor wear. This outfit is worn when serving afternoon tea, but if you haven't got afternoon tea, tango tea will do. A baldheaded young man was telling his friend how to grow real hair on a baldhead. You first go out and buy a centipede. Take him home and feed him until he gets fat. Then train him to slow his walk down to about 75 miles an hour. After which, your hair restoring begins. First you get the best hair tonic you can buy, and wet all the feet of the centipede and let him walk on your head while you sleep. His friend said, "A doctor told his patient to eat only raw eggs, but he said he wouldn't care to diet."

RENECKY SELLS THE FAMOUS ELK SKIN SHOES.

What He Would Do. A young lady visiting her relations on a farm went out in the yard to watch her young cousin play with a chicken. Watching him for some time she asked him: "Willie, if that chicken were to lay an egg what would you do with it?" He looked up surprised, then said: "Oh, I'd sell it to a museum. That chicken's a rooster."

THE POOR MAN'S BANK

which will loan money to the class of people who require only small loans, is now being organized and will be incorporated as the

INDUSTRIAL BANK and TRUST COMPANY

with a Capital Stock of One Hundred Thousand Dollars and a Surplus of FIFTY THOUSAND DOLLARS.

In order that the ordinary working man and the small business man may own shares in an institution that they expect to patronize, the price of the shares of stock

WILL BE

\$15.00 Per Share

Payable as follows:

Ten per cent down on subscribing, to be placed to the credit of the Surplus Fund and 40 per cent on call when the full sum of \$150,000.00 of Capital and Surplus has been subscribed and 50% thirty days thereafter.

The "Money Lenders" and "Loan Sharks."

This Bank recently organized has for its prime object the relief of the small merchants, dealers, manufacturers, etc., whose banking facilities are based only on their ability to prove their worth and merit as a basis for credit. In this line the Bank expects to derive large benefits and besides assisting in the development of the struggling business man.

In the Industrial Department loans will be made to the salaried men and women and wage earners of all classes. It is a well established fact that in every large city there is a community of professional Money Lenders, Usurers or Money Sharks: they also are a constant menace to Society and whose rapacious greed is the everlasting damnation of those who become their prey. Not only are they a cancerous growth of the body politic of all communities but they are the meanest lot of license dodgers to be found anywhere in creation.

The Security for Loans

The method to be adopted is extremely simple and due to this fact some people may think it impossible, but experience has demonstrated that when an employee stands well with his employer, he also stands well with his fellow employee. It will be necessary for the applicant to answer certain questions; and describe to what purpose the loan is to be applied; two endorsers, who must be his fellow employees, and with such other data as may be required of him, the prospective applicant having established a just and definite reason for the loan, it will be made, and he shall be required to sign a form of note as will also his two endorsers, giving him the privilege of returning the amount in forty weekly installments, and 8 per cent. per annum discount will be charged, his only asset, therefore, is his character, and honesty to meet his obligations, not only to the Bank but to his endorsers, and it will be seen at once that this phase of banking is based on the fundamental assumption that the weekly envelope of the working man and his honesty to meet his payments is a dependable security. This is not a charity—it is a sound business proposition.
