LIKE FAIRYLAND COME TRUE IS MOST MARVELOUS AND BEAUTIFUL OF WORLD'S EXPOSITIONS, READY MONTHS BEFORE TIME

MANY EUROPEAN NATIONS WILL BE REPRESENTED AT SAN FRANCISCO UPON A SPLENDID SCALE—VAST FOREIGN PAVILIONS ARISE IN FOREIGN SECTION.

Martels of Sculpture, Architecture, Color, Wonderful Gardens, Vast Facades, Tremendous Colonnades, Great Towers and Minarets, Characterize City of Palaces on Shores of San Francisco Bay

Months before its opening day, on February, 20, 1915, the vast Panama-Pacific International Exposition, at which the United States will celebrate the opening of the Panama canal, had been completed and the installation of the world's exhibits begun.

The exhibition today stands revealed as a supreme triumph in architecture, a marvelous fairyland come true, overshadowing and eclipsing every other exposition in the history of the world.

In the stupendous exhibit palaces wonderful exhibits from England, from Germany, from the Netherlands, from Portugal, from Spain, from Italy, from Sweden, Norway, Denmark, Japan, China, the Argentine, Bolivia, and indeed all portions of the world will delight the vast throngs that meet in San Francisco.

Shortly after the European war broke out the Netherlands government increased its fund for official participation from \$100,000 to \$400,000; Japan applied for more exhibit space; Italy ratified its appropriation of \$400,000 and ordered construction rushed upon the wonderful Italian pavilions; Denmark, Sweden and Norway proceeded actively with their plans and exhibitors from Germany and England applied for exhibit space.

The greatest live stock show in the world's history will be held during the period of the exposition. More than half a million dollars is assured in premiums and prizes for this colossal exhibition. Many new breeds of live stock will be shown, including the Bretonnese and the Boulonnaise from Brittany and Boulogne, France, the subjects of special interest on the part of the French government, which desires to foster a demand abroad for registered animals of this class.

The huge "Zone," the vast amusement section, will delight visitors from all parts of the world. Hundreds of great congresses and conventions will be held in San Francisco.

Those who are planning to visit America's great show in 1915 may take advantage of the following offer:

The booklet is for prospective visitors and will also contain information concerning the great engineering feat which the exposition is to celebrate, the building of the Panama canal. This photograph shows the north facade of the great Palace of Machinery at the Panama-Pacific International Exposition, San Francisco, 1915, as it appeared six months before the opening of the exposition. The architecture of the building is Roman, with decorations suggestive of machinery and invention. It was in this building that Lincoln Beachey made the world's first indoor aeroplane flight. The Palace of Machinery is almost one thousand feet long and four hundred feet wide.

MARVELS OF YELLOWSTONE PARK IN VAST REPRODUCTION PANAMA-PACIFIC INTERNATIONAL EXPOSITION, SAN FRANCISCO, 1915

Copyright, 1914, by Panama Pacific International Exposition Company. One of the most marvelous features of the huge Panama-Pacific International Exposition in San Francisco in 1915 will be a gigantic reproduction of the Yellowstone National park, built by the Union Pacific railroad at a cost of \$400,000, under the supervision of Mr. J. R. Kathrens, the famous producer, who is now in San Francisco supervising the work. In the background of the picture is seen an exact duplication of the Old Faithful Inn. The large circular space in the center of the picture will be filled by a topographical map 230 feet in diameter and reproducing the topographical features of the park. The man on the right is looking over a cliff 100 feet high; a little below him there will be a waterfall 85 feet high, falling into a great basin below the cliff. There will be wonderful geysers in the park, which will be one of the most attractive sections of the "Zone." The above view shows this wonderful exhibit as it appeared while under construction in September, 1914.

Inconvenient.
"Summer has its inconveniences." "I don't get you." "I was just thinking of the vestless man who tries to carry a lead pencil, a fountain pen, his watch and his cigars in the top pocket of his coat."—Detroit Free Press.

It has been proposed by a United States official to Alaska to cross the yak of Tibet with Galloway cows for the purpose of obtaining a type of cattle suitable to the rigorous life in the Arctic country.

Wise.
"I don't want to brag about myself. I've done many foolish things in my time, but I've been in one way." "What's that?" "I never had the idea that I could paper a bedroom myself."—Detroit Free Press.

But He Said It.
"She ought to drop dead for the awful lies she's telling," said the plaintiff excitedly, listening to the witness for the defense. "Don't say that," admonished the judge. "She ought," repeated the plaintiff. "Don't say that again!" repeated the judge. "Well, I won't, but she ought."

The Present Day Girl.
The old-fashioned woman who used to have her weekly wash on the line at eight o'clock on Monday morning now has a daughter who can't get up in time to gather the laundry for the driver because he calls at noon.—Cincinnati Enquirer.

Wearing the Surplice.
Surplice is the Latin super-pellicium, meaning that which is worn over a fur or fur jacket. As the jacket worn by the peasants, and for that matter by all classes, was apt to get dirty and unsightly, a kind of smock frock, that could be washed when necessary, was worn over it—and this was called the super-pellicium, the surplice.

Sun Causes Brilliant Effect.
The brilliant colors of the clouds, often long after the sun has set, are, of course, due to the fact that the sun is still shining on them and they are reflecting a certain part of his light through the darkening air to the earth.

Not His Fault.

It Couldn't Hurt Her.
Mama—"Keep quiet, Edna. You never hear me cry when my hair is being combed." Small Edna—"Yes, but a lot of your h-hair hasn't h-hit to your h-head."

How to Keep Pins From Rusting.
Needles and pins will never rust in a cushion filled with coffee grounds. Rinse the grounds in cold water, spread on a sheet of paper to dry thoroughly, and then stuff the cushion.

LEVEE CONTRACTS.
Bids were opened in the office of the Orleans Levee Board Thursday involving the expenditure of about \$5,000. The lowest of eight bids for revetting the levee on the Algiers side of the river, from the upper parish line to the Canal street ferry, was that of J. R. McGee, who bid 9 1/2 cents per linear foot. L. M. Dalgarn was the lowest of four bidders for the revetment work on the Beke levee, his bid being \$1.18 per linear foot.

IN THE CAPITAL'S ALLEYS
They Are Intricate and Hidden and Are Often Entirely Hidden From View.

In his capacity of health officer of the District of Columbia, it becomes the duty of Dr. William C. Woodward to seek to explain the exceptionally high death rate among the negroes in the national capital. In a recent report on the subject the health officer avers that "it will probably be impossible to reduce the death rate among the negroes as low as that of the whites."

One of the reasons why reduction of the negro mortality rate is so difficult seems to have no pronounced relationship to racial habits and customs. At least the report in the Outlook gives the matter a rather different aspect. It concerns the manner in which negroes have been permitted to live in Washington. "These Washington alleys," says the report, "are intricate and winding, and often entirely hidden from the view of the street. Sometimes a single alley has a population of between 200 and 300 people. It is a small community, a law unto itself, a breeding place of vice and crime. In Washington at the present time some 11,000 persons live in alleys where conditions of health and morality are such as are a disgrace to the city and the nation."

"During the year 1912 there were 700 deaths from tuberculosis in the District of Columbia. This disease, as well as other communicable diseases, prevails to a greater extent within the alleys. As a result of this state of affairs, in the 50 cities of over 100,000 population in the United States only nine have a higher death rate than Washington."

DENIES LIVING COST IS HIGH

Congressman Clark of Florida Believes It a Fallacy and Furnishes His Proof.

The high cost of living is a fallacy. In the opinion of Representative Frank Clark of Florida, and he backed up his belief by relating an incident at the New Willard the other day. "A friend of mine from Florida called upon me recently," said Mr. Clark, "and in the course of conversation touched feelingly upon the high cost of living. I ventured to tell him that was bothering a lot of people, and told him that right here in supposedly expensive Washington he and I could go out and spend a pleasant evening, with dinner and theater, on something less than a dollar. He scorned the statement, but accepted my offer to prove that it could be done."

"We went to a certain popular dining place, two car tickets costing us less than nine cents. There we had each an excellent dinner of exceptionally good stew, costing us ten cents each, with strawberry shortcake for dessert, at five cents each. That totaled 39 cents, and both of us enjoyed the meal, amid pleasant surroundings. "I then suggested the theater, and we went to a good show, where good seats were obtained at ten cents each. We enjoyed the performance of an hour and a half, used two more car tickets to go home and thus the entire evening's refreshment and entertainment for the two cost me just 68 cents."

SENATOR ALBERT S. CUMMINS

A glance at that above picture will readily show that at least some of the dignified members of the United States senate are trying to keep cool these hot summer days. This photograph is of Senator Albert S. Cummins of Iowa, on his way to the capitol to attend a session of the senate.
