### ALGIERS RAILWAY AND N. O. RAIL AND LIGHT LOCK HORNS ASKS INJUNCTION TO PREVENT LATTER FROM SELLING CURRENT ON RIGHT BANK.

The Algiers Railway and Lighting Company filed petition in the Civil Court Thursday praying for a writ of injunction against the New Orleans Railway and Light Company, prohibiting it from directly or indirectly selling or furnishing electric current to anyone in the Fifth District or Jefferson and Plaquemines.

Showing that it holds valuable franchises in Algiers and the adjacent parishes on the other side of the river for the running of electrical car line and the furnishing of electrical current for power and lighting purposes, the Algiers company sets forth that it acquired these from the Algiers Water Works and Electric Company, which on August 14, 1904, entered into two contracts with the Orleans Railway Company of New Jersey whereby the latter contracted to furnish all of the electrical energy the Algiers concern might need. The New Orleans Railway and Light Company succeeded to the ownership of the property of the New Jersey concern and recognized the contract, it is claimed.

The gravamen of the charge against the railway company lies in the allegation that in violation of a contract with the Algiers concern it has agreed to sell power to the Consumers' Company for Gretna and Jefferson distribution. This current would go over the new cable laid by the defendant from the Claiborne street power house under the river to Algiers.

For several years, and until a year ago, the street railway company has been supplying the Algiers company with power from this Claiborne street power house by means of a sub-river cable. Now the power is sent from the Market-street power house, via the sub-river cable and through McDonoghville.

It is through the Consumers' Electric Light and Power Company that Gretna now has street lights and the people of the community are about to enjoy the benefits of a cheaper rate for electricity for power and lighting purposes of all kind. The Consumers is furnishing this current through the Gretna Light and Power Company.

The Gretna concern inaugurated the commercial service Friday night, when the establishment of A. Hourquette, Lafayette Avenue and Second street, was lighted by electricity for the first time. Mr. Hourquette's place is the first to be connected to the new system. Other contracts have been obtained. The new concern's rate is 11 cents per kilowatt hour, whereas the Algiers Company charges 20 cents. Both allow discounts.

It is believed that one of the first results of the inauguration of the new system will be a rate war, particularly, as regards the larger consumers. While no definite announcement has ever been made, it has been said that there is a possibility of the new concern entering the Algiers field.

The Algiers company contends that the New Orleans Company has contracted to furnish it exclusively with current for the right bank, including Jefferson and Plaquemines Parish, as well as Algiers.

### MAYOR BACK FROM ABITA

Mayor Behrman returned to New Orleans Monday morning, following a brief stay at Abita Springs. The mayor visited the city hall and received a number of callers and gave his attention to various routine matters.

The mayor said he felt improved in health.

Suit of J. Ben Veazy, of Pacific Avenue against St. Louis, Iron Mountain and Southern Railroad, which was on trial five days in district court at Alexandria, was decided Monday forenoon in favor of Veazy. The court awarded \$20,000 for a broken leg and other injuries received while employed in the round house of the railway company there December 16, 1913.

The suit was for \$30,000. An engine in the roundhouse backed into the young man while at work near it. The defendants will appeal the case to the Supreme Court.
