NEW ORLEANS, AUGUST 3, 1916

Church of the Holy Name of Mary

First Friday.

The usual first Priday devotions will take place this Friday. Confessions will be heard Thursday, from 4 to 6 especially for children, and at 7 p. m. for adults. Masses Friday will be a 5, 6 and 7 o'clock. Benediction of the blessed sacrament will be given after the 6 o'clock mass. The fervor of the people does not seem to be impaired by the hot weather, for large numbers are on hand at every religious performance.

Communions.

The Holy Angels will receive in a body next Sunday at the 7 o'clock mass.

Visitors.

Many visitors stopped at the rec tory this week and enjoyed Father Larkin's hospitality. Very Rev. Father Smith, S. M., and Father Daig neau left Wednesday morning for dif ferent parts of the State in the inter est of the Jefferson College. Several boys from Algiers are preparing them selves to enter that institution in September. The fact that one of last year's Jefferson boys won the first place in a prize essay contest conducted by the Standard and Times of Philadelphia should be a proof of the efficiency of this college. Duncan Eidt was the worthy winner over 1000 competitors. Algiers being so close to Jefferson College ought to send more young men than it does to Convent, La. All the boys from this town who have been there or are still students of Jefferson are most enthusias tic in singing its praises. The old boys ought to get busy during this season and help out their alma mater. Jefferson Callege can accommodate all who may desire to seek learning under its auspices.

Services.

Friday, masses at 5, 6 and 7 o'clock Sunday, masses, 5, 7, 8 and 10 o'clock benediction after the 10 o'clock mass; Baptisms between 4 and 5 o'clock.

H. N. G. C.

Athletics are taking on new life at the club. Coach Dowling has the boys going fine. They are beginning to realize his worth and the advantages of systematic training. The indoor team is improving every day, and its two recent victories are proof of its efficiency. Tuesday they trounced the Y. M. H. A. to the tune of 17 to 4 showing that they have recovered credit is due to the grit and perseverance of the team's diminutive pitcher, Herbie Quinn, who although handicapped in many ways, has stuck to good club. Success depends on at is good, and the prospects for a still the job, and has turned out to be a tendance. valuable man. He is an example to others, who might be good players if they had a little more stamina and perseverance. It goes without saying the two Abbot brothers are the shining stars just at present, having played the game longer than the others. Dan Ford is rapidly coming to the front. The other day he brought the spectators to their feet by a sen sational steal of home, which play was the result of careful following of instructions, and attention to details. Morey is fast developing into a very efficient catcher. He is another example of faithfulness. Coach Dowling is well pleased with his work, and feels that he will soon have a high class catcher in this new recruit. All the other members are going along fine, and a good club spirit is being fostered. The clean, efficient and expert work of Coach Dowling is beginning to produce the proper effect. New members are coming in every day for athletic training, under this capable master. George and H. Sirey others present. and George Sewell are the latest applicants for membership.

A grand stag will soon be staged under the direction of Coach Dowling. Be on the lookout for this event, you sisted in any way in maintaining the Transfiguration-the service at Mount lovers of the manly art. It will be church work at Mount Olivet during Olivet will be held as follows: some stag. New Orleans and Algiers the past two years. Your prayers are best artists will be on hand.

Ladies' Athletics.

Add Evelina Street to Playgrounds

A few weeks ago Mayor Behrman introduced an ordinance in the Council uthorizing the city to accept from Mr. L. Leon Villerie, Mr. Paul Villerie, Albert N. Roberts, J. Gaston Olivier and others the donation of a triangle plot of ground bounded by Opelousas avenue, Verret, Evelina and Seguin streets hich is now being used as the old burying grounds of the Duverje family id their connections.

Several years have been consumed in bringing about some kind of an creemnt whereby the city of New Orleans could take over this valuable iece of property, which will make an ideal breathing spot for the Algiers

There has always been a disposition among the beirs to give the plot of ound to the city of New Orleans, but on account of some technical reason e transfer has been delayed.

When this plot of ground finally becomes the Playground for the Algier. didren it could be further improved we believe by taking in Evelina street an Verret to Seguin street. This short street is of little use and seldon d. The closing of this street would not inconvenience anyone, and it ould add a considerable amount of area to the Playgrounds. Ten or teen feet sidewalk could be left in the rear for the use of pedestrians cuting from Verret to Seguin streets, but even this would not be necessary as Board of Extension of the Methodist he grounds will be open all the time and would afford easy access in any

The Algiers Playeround has had a hard time of it since its organization, mittee and Rev. Mr. Brown some and will be compelled to move again on account of improvement. We trust of the details in connection with the that this time the Algiers children will have a permanent Playground with the erection of the new church in Opelouaddition of Eveliaa street to make it of a size commensurate with the requirements of the chidren in the vicinity.

Not only should Algiers have one or two more Playgrounds, but we should here from Washington, D. C., where he has a wonderful opportunity to display have on this side of the river a park. The opportunity for obtaining sufficient has been looking over some extension ground for the park still remains with us, but as the developments go on this possibility is being farther removed daily. If the Algiers people want a park it is up to us now to start a movement in that direction.

SECRETARY OF ORLEANS LEVEE BOARD.

When the Orleans Levee Board is reorganized, which no doubt it will be with some new members, they no doubt will go along the old Democratic principle of "To the victors belong the spoils," and the present Secretary of the Board, Charles Donner, will retire from his four-year appointment, which expires about August 15th.

It is stated on very good authority that the position has been offered to Mr. Peter E. Muntz, who was the predecessor of Mr. Donner, but whether or not Mr. Muntz has accepted cannot be stated at this time. Mr. Muntz was seen a few days ago regarding the matter, and was rather reticent regarding whether or not be would accept the position.

During the past four years, or during Mr. Hall's administration, the position paid one hundred and fifty dollars per month, while prior to that Mr. Muntz received a salary of two hundred dollars a month. Mr. Muntz is now holding a responsible position with the Texas and Pacific Railroad as Train Auditor.

There is some doubt, however, as to whether there will be any chang made in the board, and it is possible that Mr. Donner will hold over for a least a year. Act 93 of 1890 makes provision when new members shall be appointed to the board and the appointments for Districts 1, 3, 4 and 5 will not be made until 1917, according to this act.

Facts, Fun and Folly.

How Cocoanuts Grow-Why do cocoanuts have "eyes?" This, say the naturalists, is the reason: Cocoanuts generally grow at the edge of seas or rivers, and a good many of the nuts as they become ripe fall into the water. The nuts are covered with a thick husk, which has a waterproof covering, so that they will float. As they float, the three eyes, which are all at one end of the nut, are always on top. Once in the water, nature goes to work. From one of the eyes there come a shoot that sends forth broad leaves that act as sails. The wind catches these sails and waits the cocoanut on a journey that may be many miles long. As it sails, the other two eyes send out roots, which at first grow among the fibres of the woody husk. In time the cocoanut 3 swept on another shore, perhaps on another island. The roots embedded themselves in the soft eearth, the sail becomes the trunk, and very shortly a thrifty cocoanut palm is growing where none grew before.

Real Economy-Among the Japanese, thrift is a virtue in high esteem. wo old misers of Tokyo were one day discussing ways and means of saving. I manage to make a fan last about twenty years," said one. "I don't open the whole fan wastefully and wave it carelessly about. I open only one section at a time. Then I open the next, and so on until the fan is used up." "Twenty years, for a good fan!" exclaimed the other. "What sinful extravagance! In my family we use a fan for two or three generations, and this is how we do it: We open the whole fan, but we don't wear it cut by waving it. We hold it still, like this, under our nose, and wave our faces!"

The Danger-At the Capitol one day a California Representative was discoursing on the sport of fishing for tuna off the Pacific coast. "We go out in small motor-boats," said the Representative, "and fish with a long line baited with flying fish. Anything less than a hundred-pound tuna isn't considered good sport." Just then a colored messenger, who had been listening, stepped "'Scuse me, suh," said he, wide-eyed, "but did I understand yo' to say dat yo' went fishin' fo' hundred-pound fish in a little motah-boat?" "Yes said the Congressman, with a smile, "we go out frequently." "But," urged the darky, "ain't yo' 'feared yo' might ketch one?"

Read It Again-Eugene Clough, of Ellsworth Falls, has a calf, born Tues day, which has three perfectly formed hind legs. One of the hind legs is grown where the foreleg should be.

tetter year ahead very promising. It

has been the rector's aim to preach a modern, practical and liberal and to emphasize religious reality in his people a living faith in the historic church and its Christ. Christianity must influence the whole man-heart, soul, mind and strength. Along with this influence comes perfect personal freedoin, for we worship a God "whose service is perfect freedom," and this freedom is ours in religion and in politics. In religion we have perfect freedom in worship. In all things we strive "to be like Christ," which is the definition of Christian character. For Christianity in the life of Christ, realized in en and women. And as character to office and when good Christian men are in the majority the need for such reforms will no longer exist. In religion and in politics the great text which stands out pre-
