Too Much White in Malta. The houses, streets and roads in Malta are built of nearly white stone, and during the summer months these reflect the sun's rays so strongly that colored glasses are largely worn by both the native population and foreigners. Many sizes and forms of frames and many different colors of glasses are used.

Early United States Currency. In the early periods of the United States 1-cent pieces were copper, then for a comparatively short time of nickel, though the proportion which the copper and nickel coins formed of the total is very small, the entire number of copper 1-cent coins issued being 156,289,000; nickel, 200,772,000; bronze, 2,446,711,000.

Compensations. No one can do really good work without making money along with it, in this day and generation, when good workmen are at a premium. If you are a good workman, working for the love of your work as well as for its money value, you may know that you will find your compensation in it. And it will be more than a money compensation, you may be very sure.
