SIX ROOMS, A DEN AND BATH IN THIS BIG LITTLE HOME

This is a beautiful home built along the bungalow lines. The exterior of this house speaks for itself. We would ask you to study the floor plans carefully, and you will readily see that they have been arranged with a great deal of care. The large reception hall is a beautiful feature, opening off of which is the living room, separated by a large grilled arch, the beautiful fireplace with its built-in seats, the large dining room with its built-in buffet. The kitchen has all the modern conveniences possible, including an alcove breakfast room. Note the stairs lead from the kitchen as well as from the front vestibule, also to the basement. The den is also placed in a convenient place. On the second floor we have three large bed rooms, each with its commodious closets with outside light. Note the large bathroom with its built-in medicine case, linen cabinet, etc. The basement occupies the full size of the main building, which is 30x4, not including the 11-foot porch. It is arranged for furnace heat.

Many different firms tell on this page in what way they can contribute to the building and furnishing of a house of this kind. You will find each and every one of them thoroughly reliable and leaders in the lines represented.

Free Advertising Incompetent Advice

You might as well ask your baker about what ought to be the proof army shoes, as to listen to the advice of a real estate agent about the price of building material. Looking for free advertising is their favorite stunt. What they say doesn't count.

If you want to build, then build. Get yourself a good carpenter or contractor and then come to Hortman for a price. Hortman sells GOOD long leaf yellow pine lumber as low as good lumber can be sold. Hortman sells, Sash, Doors, Frames, Mouldings, Roofings and Wall Board, as low as good building material can be sold.

Our Catalog will be mailed free. Ask for it. The latest designs of the large mill work manufacturers are illustrated.
