WONDERS OF AMERICA

By T. T. MAXEY

Western Newspaper Union. THE DEVIL'S TOWER

THIS peculiar freak of nature which has become one of Uncle Sam's National Monuments, is located near Sundance in northeastern Wyoming. It is a gigantic rock, 600 feet high, probably 60 feet in diameter at the top and a mile around at the base. Rising sheer from the level plain, it is visible in some directions for almost a hundred miles.

Undoubtedly this tower was useful to primitive races as well as to early pioneers as a landmark. 'Tis thought that during the subsequent Indian wars members of the Sioux and Crow tribes directed their marches by the aid of fires and other signals flashed from this ever-visible tower.

As one approaches this monstrous rock, his amazement and awe increases, because it seems incredible that any force of Nature could have carved this solitary monument.

To climb to the top would seem an impossibility, yet it is said that a number of years ago a man and a woman accomplished this feat successfully.

Now that the war is behind us and Uncle Sam has more time to devote to home matters, it seems not unlikely that he may deem it advisable to send an expedition to the top of his new possession and cause a series of stairways to be constructed for the accommodation and convenience of venturesome tourists bent on getting acquainted with their own country.

Eye-Strain of the Movies. The members of the Illuminating Engineering Society of England recently appointed a committee to investigate the subject of eye-strain caused by watching moving pictures. This committee found that the chief strain on the eyes comes from the pictures being shown too high up, so that the eyes of the spectators in the front rows have to be raised.

It recommends that the height of a picture on the screen is such that the angle formed by lines from the center of the top and the center of the bottom to the eye of a spectator in the front row be not greater than 35 degrees.

In handling radium one must wear a coating of lead for protection against the rays. With radium at its present price the demand for lead suits is not likely to be very great.

A Frenchman who remained under water for three minutes, during which time he ate cherries, is referred to as the "human fish." He ought to be referred to as the human robin.

"BABY HERCULES"

Somerville, Mass., boasts of a "Baby Hercules." He is eight-month-old Harry LaFleur, Jr., and he can perform athletic feats that are amazing for one so young. Harry can chin the bar like a veteran. He has a chest and arm development that is most unusual. The baby weighs 18 pounds.

She Missed Something. Catherine was spending Christmas in the City of Mexico. Mother Goose was one of her gifts from Santa, and the rhymes proved quite entertaining to her. On her visit out to the castle of Chapultepec, she was told the king had lived there. She went all about looking behind doors and under the royal bed, and finally said: "Well, mother, where can the merry old soul be?"

Anatomical. "A man may be mistaken, even though his heart is in the right place." "Yes," replied Senator Sorghum, "but what's the use of having your heart in the right place if your brains get in wrong?"

The woman of quality doesn't have to fight for equality.

The limelight is no place for a man who needs a whitewash.

As ear puffs retreat, how promptly earrings consolidate the gains!

An ice shortage looms in the office—or in the price makers' office.

A willful man is usually any man who prefers his own will to yours.
