AMERICA TO HAVE WONDERFUL "BRIDGE OF SHIPS."

This bridge is to be built in 90 days across the Hudson from Yonkers, N. Y., to New Jersey, using Uncle Sam's useless wooden ships. It will last ten years and be a scientific engineering feat because the tide will raise the boats and therefore raise the bridge. POPULAR SCIENCE FOR OUR READERS

They used to say that "money makes the mare go. And money itself also works for science now."

It is amazing how rapidly science has become the rule of the world in the first decades of the 20th century. To cap the climax, science, far more than human hands, fought the greatest war in history.

Science governs our lives nowadays from the cradle to the grave.

The most successful food raising is governed largely by science. We raise our babies more scientifically. Our schools are now scientifically run.

Our homes are full of scientific inventions, our tools of industry are scientifically manufactured and our amusements are marvels of science.

This prelude is to introduce our readers to a new enterprise which this newspaper is about to present to its readers as a regular feature of our news columns.

Through our representative the Autocaster service, we have made special arrangements with the POPULAR SCIENCE MONTHLY, one of the country's leading informative magazines, to print simultaneously with that journal, illustrated features of the latest and most interesting facts in current science.

POPULAR SCIENCE is a careful and accurate collector of scientific news of the highest interest, and it pays thousands of dollars a month for the features that this newspaper has arranged to print simultaneously with it. Our readers will now share with POPULAR SCIENCE readers in these interesting, entertaining and educational features.

George P. Platt, recently elected Judge of the Second City Court, assumed office Thursday. The oath was administered by Robert E. O'Connor, who was one of the Judge Platt's opponents in the primary. Judge Platt succeeds Judge Martin S. Mahoney, who was elected in 1916 and continued to occupy the position because Judge N. E. Humphrey, who had been elected to succeed him, subsequently became a judge of the Criminal District Court and did not qualify for the city court judgeship, necessitating a second election. A number of lawyers and friends of Judge Platt were present, including Judge Val J. Stentz of the First City Court, when Judge Platt took his oath.

Mr. Posey Offers Aid To Home Paper

SEES VALUE IN WEEKLY PAPERS —WILL OUR CITIZENS FOLLOW HIS ADVICE.

We are in receipt of a letter from Mr. J. G. Posey of 721 Pacific Ave., that should be of interest not only to the Herald, but to every citizen who has an interest in the growth and welfare of this district. Every community should have a mouth piece that will go to the front for them at any time to see that our citizens get what they are justly entitled to. The Herald has played this role for many years and is ready today, regardless of any political affiliations to fight for the rights of the Algiers people. The Herald has never been politicalized, but always stands for the rights of the community.

Mr. Posey's letter follows:

Algiers, La., Sept. 12th, '21.

Dr. C. V. Kraft,

Dear Doctor:

I was very much interested in the article about Weekly Papers having their lining, which was published Thursday, Sept. 18th. I have just bought a small home in Algiers, and the very first thing my wife did, was to subscribe to the home paper—THE HERALD, but after reading the article in your paper, I thought I would do my share, and help a good thing along, by enclosing my check for \$1.50 which pays up for a year's subscription.

I am connected with the Times-Picayune, and of course I would like to see our paper in every home in Algiers, but feel like it is the duty of every resident of Algiers, who has the interest of the town at heart, and wants to see his city grow and become prosperous, to subscribe to the Herald as well.

And merely as a suggestion. If you could get all your subscribers, who know the value of the Herald as a home-paper and as an advertising medium in Algiers, to speak to their next door neighbors or to their acquaintances and try and induce them to become subscribers—if they only succeed in getting one—that would double the circulation.

That would be nice, wouldn't it? Or if the subscribers would not care to do this—ask them to pay a year's subscription in advance. This would help some.

Now, of course a great many people would not care to do either of the above, but it is worthy of a trial at any rate, and you will find some of your loyal subscribers that will respond.

Wishing you all the success possible, I beg to remain, Respectfully yours,

J. G. POSEY,

No. 721 Pacific Ave.

BIDS FOR PAVING ALGIERS STREETS.

ALGIERS GIRL WINS ITEM PRIZE.

From the thousands of letters received in the School Contest conducted by the Item last week, the one selected by the judges as best was that of Miss Ethel Posey of our side of the river.

Miss Posey, who resides at 721 Pacific Avenue, is just fourteen years old. Her letter, selecting the advertisement of the Liberty Bank as the one most appealing to her, gives clearly her reasons for her choice.

Algiers, Sept. 6th, '21.

School Contest, New Orleans Item.

Gentlemen: The advertisement that appeals to me, is the sensible Ad of the Liberty Bank & Trust Company, which advises every one, young or old, to open a bank account.

I think every boy or girl should have a bank account, especially girls, because KNOWLEDGE IS POWER, and a girl today, without an education is lost.

But if a girl has a bank account, she can attend some good business college and prepare herself for some good position that will be a splendid insurance against financial misfortune.

If the young girls could only look into the future and see what it holds for them, they would be down bright and early tomorrow morning, eager and anxious to become depositors.

Yours respectfully,

ETHEL POSEY,

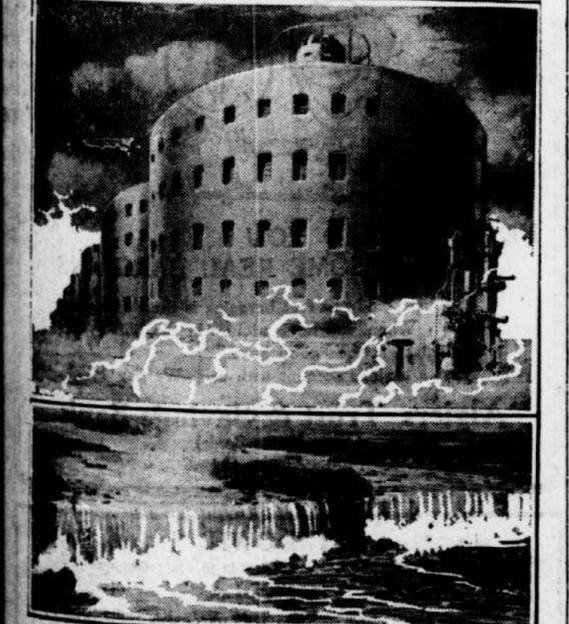

721 Pacific Avenue.

LAWN PARTY.

SCIENCE TO DWARF NIAGARA FALLS

The water pouring over Niagara Falls represents seven million horse power, and not one-tenth of it is used. The great electrical scientists are now planning a "superpower system" which shall run all factories, railroads, street cars, lighting plants east of the Allegheny mountains from Maine south to Washington. Their idea is to use practically all the water in the falls and make Niagara the head center of the system. The picture shows power houses (above) and the falls (below).
