MARKABLE GROWTH OF AN IDEA.

As An Incentive To Saving. Extremely Popular.

Several years ago the clerks in a bank thought it would be a good idea to start saving at Christmas time for next Christmas.

Modern banking is nothing if not progressive. Realizing the possibilities of developing the savings habit, the bank was enlarged and offered to the public on a systematic basis.

Among the country's progressive institutions conducting a Christmas Club in the Algiers Trust & Savings Bank. They have developed the following weekly classes of payments:

1st. A week maturing at \$12.50; 50c. a week, maturing at \$25.00; \$1.00 a week, maturing at \$50.00; \$2.00 a week, maturing at \$100.00.

Members of the club are always surprised to find how pleasant and easy the saving really was, and many young folks get the thrift habit in this way, which remains as a permanent asset throughout life.

The important has the Christmas Club become that the American Association has recently conducted a survey of the subject and found that about \$200,000,000.00 is distributed by the Clubs last year.

ANT POISON BEING PLACED HERE.

The placing of ant poison in our district began Tuesday at noon and with good weather it will be concluded Friday night.

Mr. Hobson emphasized the point that distribution at this time should prove of most immediate effectiveness, due to the alternating cold and warm days when the movements of the ant are such that he comes out of his nest for food when the temperature is favorable and then hibernates again for the cold spell, the poison which he eats copiously after a period in hibernation having the greatest effect when the ant again becomes semi-dormant.
