**American "Molly Maguire."**  
 The first organization known as the "Molly Maguire" was formed in Ireland, with the object, it is believed, of generally mistaking process-servers and others engaged in the prosecution and eviction of tenants, and was composed of young men who, in some localities, assumed women's clothing, blackened their faces, and otherwise disguised themselves, the Detroit News remarks.

It remained, however, for the American "Mollies" to terrorize whole counties and leave a blood-red trail behind them in the coal regions of Pennsylvania from 1854 to 1877. The murders and outrages they committed were numbered by the hundreds, and the victims in most cases were well-known and respected men.

Finally the secrets of the order were revealed and many of its members were brought to justice.

**Her Revised Grammar.**

Teacher was endeavoring to make clear to the youngsters the grammatical tenses. "My father had money," she pointed out, "is in the past tense. Now, Grace, what tense would you be employing if you should say, 'My father has money?'"  
 "That would be pretense," said Grace, very soberly.—Exchange.

**MAKE EVERY SHADE OF TOOTH**

Modern Dentist Able to Supply Every Color of Molar That May Be Demanded.

The manufacture of sets of jet black false teeth represents an out-of-the-way side of British enterprise. It will be news to most people that there is a definite trade in black teeth between England and the Orient, rendered necessary by the practice, so popular east of Suez, of chewing betel nut. As a masticatory the betel nut leaves chewing gum far behind, for it is reckoned that one-tenth of the human family indulge in it, but it stains the teeth of its votaries black as ebony. Hence, when they need artificial teeth to replace losses, those teeth must be black.

A definite side of modern dentistry is represented by these black teeth. No longer is it necessary for clients to accept teeth which stand out in challenging distinction to their neighbors and proclaim their artificiality to the world. Every shade and shape is now matchable. Even the boy who for thirty years has been "rolling his quid" can be supplied with teeth bearing the counterfeit stains of tobacco juice. The ordinary person has 25 different shades at his disposal, and shapes seem to be innumerable. Even teeth with make-believe gold fillings are supplied.
