

# Bogalusa Realestate Is Going to Boom Soon

You had better get ready for the greatest increase in reality values that was ever known in the city. Dirt will soon be flying on the new paper mill and then city property will take a sudden advance in price.

## Invest a Few Dollars Each Month

If you cannot buy city property you can invest with this firm who devote all their investments to Bogalusa property. A few dollars each month paid to this association will result in you having a paid up share of stock in a few months. We have NEVER paid less than 10 per ct. DIVIDENDS

## BETTER BUILD QUICK

Not only will the price of lots advance soon but lumber and labor as well and you should loose no time in building your home if you contemplate doing so this year. Lumber is cheaper today than it will be again this year. Better get busy.

Let me show you that it is cheaper to own your own home than to pay rent.

State Supt. Harris Delivers The Principal Address To Record Class

The largest class in the history of the Bogalusa Schools graduated last night at the Y M C A Auditorium. The attendance was the greatest ever, and the program rendered to perfection.

The exercises were opened by a selection by Mrs N S Young, following which Rev W P Chalmers, pastor of the Presbyterian church, rendered the Invocation.

The Valedictory delivered by Miss Effie Breland, caused each member of the class to make a determination to put more enthusiasm into their efforts in the future than in the past.

The closing chorus, "Farewell" by the class, was indeed a beautiful song.

### FREE SHEEP FROM MAGGOTS

Wool Should Be Clipped to Skin and Spot Treated With a Weak Solution of Tar Dip.

Whenever a sheep has a filthy spot on any part of its body or when it continually twists about and bites the wool in a certain place it should be examined for maggots. The wool should be clipped to the skin if found infested and the spot treated with a weak solution of coal tar dip.

If maggots have already lodged in the muscles use a solution quite strong. Pour the medicine over the infested part and work it into the holes made by the maggots. They will soon come wriggling out. Turpentine, which is sometimes used for this purpose, is harsh in its action and is not recommended on humane grounds.
