

DINING FOR 4 CENTS FIRST STREET CARS IN CENTRAL AMERICA

How to Live in London on Practically Nothing.

Getting a Six Course Meal—Fish Without Price in Billingsgate and Bones for the Stockpot at Smithfield.

London.—"I never go without one good meal a day at least," said the weary old man with the drooping features.

Picture showing street cars in the narrow streets of Panama. The system was recently opened to the public.

"Now, if a man hasn't sufficient gumption and enterprise to get hold of twopence somehow he has no right to live at all, so far as I can see.

"I'll tell you how to get a five course dinner for nothing at all. I'll tell you how to get a six course dinner—

"Let us begin with the six course dinner. Let us see how we can procure our hors d'oeuvres for nothing, first of all.

"We rise early. We don our very ragged rags, in case of emergencies. Then we hie us to Billingsgate.

"There is other damaged fish, of course, which is flung aside, and gathered in by you in just the same way.

"To procure the material for soup we go to Covent Garden market.

"So, you see, we now have courses one, two, three and six. From Covent Garden we wend our way to Smithfield.

"The dinner was really a return to the gatherings for which Newport was famous several years ago, but which of late years have been succeeded by the larger and more coldly social entertainments.

"The dinner was the wonderful red and white electrical display. During the dinner the guests were regaled with plantation songs by minstrels brought from New York, and hundreds of Mr. Vanderbilt's former neighbors gathered to hear this singing.

"Just after midnight the guests were taken to the trophy room where dancing held sway.

giblets with which to thicken and flavor our soup. So we have now obtained—for nothing at all—a dinner of five courses.

"You will observe that the only course missing from the six course banquet is the fifth—the cheese. The publican supplies this. I go into the saloon and order my glass of bitter.

"You possess so many vegetables that you don't need bread. But if you prefer to take bread you have only to keep your eyes open to get enough of bread in London is prodigious.

"Fuel? I will not insult your intelligence by telling you where to find paper, and bits of wood like about everywhere.

"The parliament of 1643, under the dominance of the champions of tyranny, had passed an ordinance against the liberty of printing, and with a sublime fearlessness Milton challenged them to battle.

of a trumpet Milton protested against the infamous attempt to throttle the freedom of the press. He would have no oppression of the printers, no gag upon their desire to spread abroad among men the thoughts of the mind.

Foreseeing the future and exulting in its happy deliverance from every form of mental tyranny—the era in which every one should be perfectly free to think, and perfectly free, also, to put his thoughts into print—Milton did what he could to help the good time along.

Likening truth unto the eagle, which in its royal might scatters the "Umorous birds that love the twilight," he exhorted the free and enlightened press would be the salvation and glory of humanity.

All England was forced to listen to his glorious plea for free printing and for two and one-half centuries the echoes of his noble appeal have sounded and resounded in British ears and in the ears of all men.

Wherever floats the British flag today, there, under its protecting folds, is to be found the mental hospitality—the large freedom of thought and expression—which dates back to Milton's great plea that was given to the world on that 28th of August, 1644.

AGRICULTURE IN THE CANAL ZONE

Tomatoes Ripening in February.

The climate of the Canal Zone is humid and typically tropical. With a very narrow annual range in temperature, but with marked contrasts in quantity of rainfall, the seasons are aptly divided into dry and rainy.

Normally the season is characterized by cloudless skies, constant winds, and such scanty rainfall that many crops which made steady growth throughout the rainy months, hasten to maturity, practically cease to grow, or are completely perished unless irrigated.

Among the important temperate zone vegetables that have been more or less successfully grown are cucumbers, eggplant, lettuce, beans, cowpeas, radishes, carrots, peppers and pumpkins.

FRUIT LAXATIVE FOR SICK CHILD

"California Syrup of Figs" can't harm tender stomach, liver and bowels.

Every mother realizes, after giving her children "California Syrup of Figs" that this is their ideal laxative, because they love its pleasant taste and it thoroughly cleanses the tender little stomach, liver and bowels without griping.

When cross, irritable, feverish or breath is bad, stomach sour, look at the "tender mother!" If coated, give a teaspoonful of this harmless "fruit laxative" and in a few hours all the foul, constipated waste, sour bile and indigestible food passes out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Syrup of Figs" handy; they know a teaspoonful today saves a sick child tomorrow. Ask at the store for a 50-cent bottle of "California Syrup of Figs," which has directions for babies, children of all ages and grown-ups printed on the bottle. Adv.
