can for want of a market.

The World Will Never Starve.

At no time since Adam and Eve were driven from the Garden of Eden have the inhabitants of this world suffered from lack of production, but some people have gone hungry from the day of creation to this good hour for the lack of proper distribution. Slight variations in production have forced a change in diet and one locality has felt the pinch of want locality has felt the pinch of want while another surfeited, but the world as a whole has ever been a land of plenty.

We now have less than onetenth of the tillable land of the earth's surface under cultivation, and we not only have this surplus area to draw on but it is safe
to estimate that in case of dire necessity one-half the earth's population could knock their living out
of the trees of the forests, gather
it from wild vines and draw it

Haunng diversified products, grown on
government drained lands, over good
roads to local cash markets where
thrifty home labor in our factoires may
convert the raw into finished products,
and, with adequate transportation
facilities, supplying profitably the
world market, is the object of the it from wild vines and draw it from streams. No one should be- Southwest Louisiana come alarmed; the world will never starve.

The consumer has always feared that the producer would not supply him and his fright has found expression on the statute books of our states and nations, and the farmer has been urged to produce recklessly and without reference to a market, and regardless of the demands of the consumer.

Back to the Soil.

The city people have been urg-ing each other to move back to the farm, but very few of them have moved. We welcome our city cousins back to the soil and this earth's surface contains 16,-092,160,000 idle acres of tillable land where they can make a living by tickling the earth with a forked stick, but we do not need them so far as increasing production is concerned. The city man has very erroneous ideas of agricultural conditions. The commonly accepted theory that we are short on production is all wrong. Our annual increase in produc-tion far exceeds that of our increase in population.

The World as a Farm.

Taking the world as one big farm, we find two billion acres of land in cultivation. Of this amount there is approximately 750,000,000 acres on the western and 1,260,-000,000 acres on the eastern hemisphere, in cultivation. This estimate does not include grazing lands, forests, etc., where large quantities of meat are produced.

The world's annual crop ap proximates fifteen billion bushels of ccreals, thirteen billion pounds

of fibre and sixty-five million tons of meat.

The world shows an average increase in cereal production or 13 per cent during the past decade, compared with the previous five years, while t'e world's population shows an increase of only 3 per cent.

The gain in production far exceeds that of our increase in pop ulation, and it is safe to estimate that the farmer can easily in crease production 25 per cent if a remunerative market can be found for the products.

Constipation.

When costive or troubled with consti-pation take Chamberlaiu's Tablets. They are easy to take and most agreeable in effect. Obtainable everywhere. adv co-operation of the government

EXECUTIVE DEPARTMENT. STATE OF LOUISIANA.

WHEREAS, Ambrose M. Smith, of the Parish of Vermilion, State of Louisiana, has applied to me for the cancellation of one Bond, drawn and subscribed by Ambrose M. Smith as principal, with American Surety Company of New York as sureties, dated February 1st, 1908, and on the production side of agriculfor the sum of Twelve Thousand Dollars While the department of in favor of the Governor of the State of Louisiana, and conditioned for the faithagriculture has been dumping ful performance and discharge by said Ambrose M. Smith of his duties as Super-intendent and Ex-Officio Treasurer of the

Public School Fund of Vermilion Parish. Now, therefore, I, Luther Egbert Hall, Governor of the State of Louisiana, have
