AVOID DISEASES BY PROPER CARE

Prevention is Better Than Cure With Various Ailments in Poultry Flock.

WATCH CLOSE FOR OUTBREAK

Treatment Outlined by Bureau of Animal Industry for Roup, Chick-Pox and Scaly Leg—Examine Fowls Often.

Disease is one of the handicaps to successful poultry keeping and should be guarded against at all times. Unless kept in a healthy condition, chicks will not grow properly and mature fowls will lose their vigor and vitality and become unproductive and unprofitable. It is far better to prevent disease by proper care and attention than to attempt to cure a bird after it is sick. It is important, therefore, to watch the flock closely at all times for any signs of disease, so that an outbreak may be checked as soon as it occurs.

Three of the more common poultry diseases are roup, chicken pox, and scaly leg, the following treatments for which are given by the bureau of animal industry, United States department of agriculture:

Affects the Eyes. Roup is a disease which affects the eyes, nose and throat. The first signs are watery eyes, swollen eyelids, loss of appetite, and a thin, watery discharge from the nostrils; after a few days the discharge becomes thick and interferes with the bird's breathing. In severe cases the side of the bird's head is hot and badly swollen and the eyelids stuck together with a yellowish, cheesy substance.

Roup frequently develops from a hard cold, or may be brought into the flock by other birds that have had the disease. To prevent it, keep the house clean, well ventilated, and disinfected. Be sure that the birds are not exposed to drafts. Fowls or chicks purchased from other breeders should be put into a separate house. If this is not possible, watch each specimen closely for two or three weeks for any sign of the disease, so that if it appears the bird may be removed before the others are affected.

Chicken Pox. Chicken pox (sometimes called sore-head) is another very contagious disease. It makes its appearance in the form of irregular whitish patches or festers, which later develop into brown spots or crusts (resembling the scab of a sore) on the comb, wattles, eyelids and around the beak and nostrils. In severe cases these patches or sores become so numerous that the birds have difficulty in opening their eyes and beaks.

Apply a liberal quantity of carbollated vasoline to all the affected parts. This treatment after a short time will cause the patches or crusts to soften

Fowls Kept Free of Vermin Are Less Susceptible to Disease.

and drop off, when the tissue or sore underneath should be painted with tincture of iodine or five per cent solution of carbolic acid. Five pounds of fine-powdered sulphur mixed with each 100 pounds of dry mash is also beneficial in effecting a cure. As soon as the disease makes its appearance spray the houses and coops thoroughly with some good disinfectant (preferably some wood preservative or coal-tar preparation), and scald the drinking fountains and feed dishes thoroughly with boiling water. Repeat every two or three days until all the birds have fully recovered. To prevent the disease, keep all roosting quarters clean, dry and well disinfected. During the summer, when the disease is most common, mix three pounds of powdered sulphur with each 100 pounds of dry mash, allowing the birds to eat all they want. Chicken pox usually attacks late-hatched chicks more often and more severely than early-hatched ones, which makes it advisable to hatch as early in the season as possible.

Scaly Leg. Scaly leg is easily recognized by the enlarged, roughened appearance of the feet and legs. It is caused by a little mite which burrows beneath the scale and causes the formation of a yellowish powdery substance which keeps raising up the scales until they present

Keep Pullets Tame. Keep the pullets tame; never have scary birds. Teach them to have confidence. Anybody can quickly tell the difference between a tame, well-kept flock and one that is in constant excitement.

Best Soil for Alfalfa. Alfalfa does best on deep, well drained loam, or clayey loam soil. Good natural drainage is a prime requisite. It will not thrive on land deficient in lime.

an unsightly appearance. In severe cases, if the birds are not cared for, the joints of the toes become inflamed, sometimes so limiting the birds that they are unable to walk.

Wash the bird's legs well with soap and warm water and remove all loose scales. Rub well with a half-and-half mixture of kerosene and lard or oil (melted lard or vaseline oil), or fill a can with the mixture, and at night, after the birds have gone to roost, dip each bird's legs into it, allowing them to soak for a minute, then return the bird to the roost. Repeat the treatment every three or four days until the scales are removed. Oil of caraway used in the same manner is also very effective. To prevent the disease, spray the roosts, dropping boards and all nearby cracks and crevices thoroughly and often so as to keep them free from mites. Examine the bird's slanks occasionally, and if any signs of scaly leg appear, rub the places well with oil, as before directed, to prevent the disease from developing.

MARKETING RESULTS ARE UNSATISFACTORY

Social Clubs Are Not Suited to Co-operative Work.

Special Organizations Serve Useful Purpose in Educating Members in Organized Effort—Valuable Preliminary Step.

Many communities which become interested in co-operative marketing have an existing organization formed for other purposes, such as a farmers' club, or social or educational society. Some persons strongly advocate the use of such associations for co-operative marketing purposes in place of forming a special organization. The fact must not be overlooked, however, that the machinery provided must be suited to the work in hand, says the United States department of agriculture. Usually associations for productive or social purposes are not at all adapted to marketing activities. To call upon them to perform this work will hamper the activities for which they are designed and produce unsatisfactory results in marketing.

Organizations of the kind indicated, however, can and do serve a very useful purpose in promoting co-operative marketing associations by encouraging discussion and investigation of plans and methods. These organizations also serve to educate their members in organized effort, and this is a valuable preliminary step to co-operative marketing activities.

STATION MAKES BIG PROFIT

Arkansas State College Farm Sold Various Kinds of Produce to Amount of \$15,000.

Costly experiments must be carried out upon an experiment station farm to find how the average farmer can make or save money, but in spite of these high overhead expenses the Arkansas state college farm sold produce worth \$15,000 last year. The department of horticulture representative received \$1,250 for the crop of Yellow Transparent apples, the annual husbandry branch sold 22 pigs for \$58.20, and the potato crop brought the farm \$1,520.80. Other products raised the farm receipts to the total given above.

The idea of profit is not uppermost in agricultural experiment work, but these sales figures show that scientific, well-planned farm management can overcome the handicap imposed by unusual expenses.

PRODUCTION OF SEED CROPS

Practically All Small Vegetables Will Be Considerably Less Than in Former Years.

The production of practically all small vegetable seed crops will be considerably less this year than in 1919 or 1918, according to reports received by the bureau of markets, United States department of agriculture. The reductions range from 88 per cent for spinach to 12 per cent for lettuce. Increases are shown for garden pole beans, garden peas, and onion sets.

A slightly larger production than last year of the early crop of alfalfa seed in the Southwest is indicated. Due to small average and lighter yield per acre a production of timothy seed of approximately 80 per cent of last year is forecast.

POBERRY NOTES

- Call your flock.
Keep the layer, sell the loafer.
Every hen is either a layer or a loafer.
The hen which is constantly going broody is not a good hen to have in the flock.
Of the infectious diseases of turkeys, blackhead is the most destructive.
Fertile eggs are not so good for marketing nor for packing for winter use as infertile ones.
Call your flock and get rid of the poor layers and give the good producers a chance.
The marketing season for turkeys is very short, running only from the middle of November to the latter part of December.
A new laid egg is 65 per cent water. Where will the water come from if you don't supply the hen with plenty of fresh, clean water?
The hens will lay just as many eggs when the male bird has been removed and the eggs will be more suitable for consumption, packing or storing.
Farmers Must Work.
Farmers must keep at work for good roads. The development of the motor truck makes them increasingly necessary.
Help Freight Congestion.
Good roads, short hauls, will clean up the railroad congestion.
Cut Corn for Silage.
The proper time to cut corn for silage is about a week or ten days before it would be cut out for shocking.
Putting Corn into Silo.
Corn should be put into the silo just as quickly as possible after it is harvested.
Before Using Plow.
Before using a new plow, remove the varnish on the shares with lye and water.
Add Much Feed.
Some of the heavy-yielding, quick-growing forage crops will add much feed to the quantity produced by a permanent pasture.
Weeds As An Asset.
A rank growth of weeds becomes an asset when plowed under before they make seed.
Reasons for Cultivating.
Downing the weeds, loosening the soil, saving moisture.

GOOD ROADS

FEDERAL AID FOR HIGHWAYS

Operations Aggregate in Length Nine Times Distance From New York to San Francisco.

The unprecedented stimulus given highway construction in the United States in the four years that have passed since the federal government entered upon its policy of aiding road improvement, is shown by the fact that road operations under the federal aid road act thus far initiated aggregate in length nine times the distance from New York to San Francisco, according to Thomas H. MacDonald, chief of the bureau of public roads, United States department of agriculture. The federal government's share in this stupendous undertaking is greater than the cost of the Panama

One Type of Road-Truck-Load of Hot Concrete Being Dumped Ready for Surfacing.

canal. The participation of the national government in highway improvement marked a departure from a policy which had been followed for nearly a century. Federal co-operation with the states on approximately a "50-50" basis has counted more than any other factor, says Mr. MacDonald, in initiating highway construction that is being carried on under adequate supervision, and in accord with a program co-ordinating local, state and national needs.

Second only in importance to the size of the present road-building program is the excellence of the character of the roads being built. Sixty per cent of the total allotment of federal funds which has been approved to date will be spent for roads of such durable types as bituminous concrete, Portland cement concrete, and vitrified brick. These roads, when built, will increase by 7,000 miles the total of 14,400 miles of roads of this class which existed in the United States before the federal-aid road law was passed. But these figures by no means represent the total mileage affected.

In 1915 the total expenditure for roads and bridges by all the states and local governments was \$267,000,000, while this year the estimated funds available for main road construction are nearly three times that amount, or \$633,000,000. In all, federal funds to the amount of \$296,750,000 have been apportioned among 48 states without a suggestion of favoritism—so adequate are the provisions for a just apportionment.

One of the early and most far-reaching results directly attributable to the adoption of the federal-aid program was the creation of adequate state highway departments in 17 states that previously had either no state department, or departments insufficiently equipped. Within one year after the passage of the federal-aid road act more constructive state highway legislation was placed upon the statute books than had ever been enacted in a similar period in the history of the country.

The insistence of the government upon the construction of federal-aid roads under the supervision of engineers of the state departments has resulted in placing a much larger portion of road work under skilled direction. In 1915, the year before the federal-aid act was passed, only 30 per cent of the money for roads and bridges built in the United States was expended under the supervision of state highway departments. This year these departments will exercise control over fully 80 per cent of the large sums that will be spent for road building.

Farmers Must Work. Farmers must keep at work for good roads. The development of the motor truck makes them increasingly necessary.

Help Freight Congestion. Good roads, short hauls, will clean up the railroad congestion.

Cut Corn for Silage. The proper time to cut corn for silage is about a week or ten days before it would be cut out for shocking.

Putting Corn into Silo. Corn should be put into the silo just as quickly as possible after it is harvested.

Before Using Plow. Before using a new plow, remove the varnish on the shares with lye and water.

Add Much Feed. Some of the heavy-yielding, quick-growing forage crops will add much feed to the quantity produced by a permanent pasture.

Weeds As An Asset. A rank growth of weeds becomes an asset when plowed under before they make seed.

Reasons for Cultivating. Downing the weeds, loosening the soil, saving moisture.

LIFE'S LITTLE JESTS

A TITLE DISDAINED

"I wish," said Senator Sorghum, "that you would not refer to me as a 'phinx."

"What's the objection?"

"The only sphinx I ever saw in my travels had its nose badly out of joint and was unable to assemble an audience large enough to justify its remarks."

The Troublesome Experts. "Know anything about an automobile?"

"Not a thing."

"Just the man I want. Tell me what you think might be the matter with my car. The experts that have come along have all guessed wrong, and I thought perhaps you might be able to guess right."

Sweet Innocence. "Don't you know there is a rumor that the racing in which your husband is interested is crooked?"

"Not a bit of truth in it," said young Mrs. Turkins. "They can't be crooked. Charley showed me the track and it's a perfect oval."

All Incentive Gone. "So you are going back to the old country, my man?"

"Sure I am. Who wants to live in a country that's got nothing left with a kick in it but an army mule?"

High Toned. First Moth—Is your brother in society?

Second Moth—I should say so; he won't eat anything but evening clothes after 6 P. M.

TREASURE TROVE

Wetmore: "Gee! I stepped just in time to avoid smashing that bottle."

His Wife: It would have been too bad if we had cut a new tire.

Wetmore: Tire! I wasn't thinking of the tire. But there might be something in the bottle.

Nothing to Talk About. If all you hate would love us, And all our friends were true— Good gracious! kindly tell us What would the gossips do?

Literally. "Is that consequential-looking star actor supported by his wife on his tour?"

"I don't know how he feeds three times a day if he isn't."

Contradictory Puzzle. "There is one thing which has always puzzled me in military matters."

"What is that?"

"How a standing army can be kept in good running order."

The Progress. "He went to court and sued her for her love."

"Well?"

"Then she went to court and sued him for breach of promise."

Natural Conclusion. "What are you in here for?" inquired the visitor of the convict.

"For the simple reason," replied the convict, "that I can't get out."

Another Way of It. "Well, I've got to go today and face the music."

"Why are you in trouble?"

"No; I conduct a band."

A New Discovery. "Some one has discovered that snakes have sentiment."

"Well, they certainly do have a way of winding themselves around one."

Easily Hidden. "We are afraid young Mr. Siliboy is losing his mind."

"Just keep it quiet and nobody will ever know the difference."

The New Days. "Do you think Snifkins intends to make an energetic campaign for election in his district?"

"Does he? He's getting bids on the lowest wholesale prices for boxes of chocolates and candy bags."

A Moment's Relaxation. "I understand you always make money on a falling market."

"Well," replied Mr. Dustin Stax with a sly, self-appreciative chuckle, "I manage to get a bear living on of it."

Practical Affection. He—Darling, there is an unconsumed fire in my heart for you. She—That's all right, but what much more concerns me is to know, I there a substantial insurance on your life?

Her Skill. "That girl is an expert in sentimental anatomy."

"How do you mean?"

"She makes a man lose his head takes his hand and then breaks his heart."

CALOMEL

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it, causing cramping and nausea.

Take "Dodson's Liver Tone" Instead!

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tone for a few cents, which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tone you will wake up feeling great, full of ambition and ready for work or play. You can give it to children, too—Adv.

OXIDINE

If YOUR Skin is SALLOW— If YOUR Eyes are YELLOW— If YOUR Appetite is POOR— If YOUR Head Feels "HEAVY"— If YOU are CONSTIPATED— If YOU Have Chills and Fever—

Then it is a pretty good sign you have Malaria! You need Oxidine. It will help you. It will stop the chills, tone up your system, put the flash in your eyes, give you a good appetite, clear your head and make you strong and well. The worst cases of chills and fever succumb readily to Oxidine. Thousands have been cured. We have many testimonials. Oxidine is also a preventive. Take once a week in malarial sections or in all cases of chills and head up your system. For sale at all druggists at 60 cents a bottle in bottles of three from head up your system. Oxidine is sold under the strict guarantee that if it doesn't benefit you return the empty bottle to your druggist and receive at once the full purchase price.

Guaranteed: Manf. by The BEHRENS DRUG CO., Waco, Texas

Stops Chills

If you are in a hurry avoid the train of thought.

A kiss is an explosion of condensed emotion.

GIRLS! LEMONS BLEACH SKIN WHITE

Make Lemon Lotion to Double Beauty of Your Skin.

Squeeze the juice of two lemons into a bottle containing three ounces of Orchard White which can be had at any drug store, shake well and you have a quarter pint of harmless and delightful lemon bleach for few cents.

Massage this sweetly fragrant lotion into the face, neck, arms and hands each day, then shortly note the beauty of your skin.

Famous stage beauties use lemon juice to bleach and bring that soft, clear, rose-white complexion. Lemons have always been used as a freckle, sunburn and tan remover. Make this up and try it.—Adv.

99 OUT OF 100

Need Vacher-Balm at Times.

Nothing better for summer colds, hurts or itching. Keep it handy. Agents wanted where we have none. E. W. Vacher, Inc., New Orleans, La.—Adv.

THAT LEGACY HELPED SOME

Of Course Newspaper Man Really Had Done Well, but Not Entirely by His Own Efforts.

"When I see a ragged man," said the chairman, virtuously, "I say to myself there goes one of life's wasters. There goes a man who has refused to make the most of his gifts. There is no excuse for poverty, gentlemen. Everyone should rise."

"Hear! Hear!" cried his hearers. "Everyone," exclaimed the chairman, "may curve out a good position for himself if he wishes."

"Perhaps you are right," interposed a member. "Only today I met a newspaper man who told me that 20 years ago he came to Chicago with exactly \$5 in his pocket. He is now worth \$40,000 and he owes this entirely to his own ability and energy, combined with good health and a high code of ethics, and to the fact that his uncle recently died and left him \$39,995."—Chicago News.

Clothes Make the Man. Teacher—Now, who can tell just what is meant by the saying "All men are created equal?" We all know that some of us are born with wealth and many other advantages not shared by all.

"We are all created with an equal need for clothes," suggested Johnny.

Soft Is Right. "Say, Mike, wanna make a soft half-dollar?" "Betcha." "Melt it."—American Legion Weekly.

That Wholesome Table Drink

POSTUM CEREAL

gains new friends right along because of its pleasing taste healthfulness, and saving in cost

Postum Cereal is delicious when properly made: boil fully fifteen minutes after boiling begins. The more you boil Postum Cereal the better it is.

When ordering be sure to get the original POSTUM CEREAL

A 50-cup package usually sells for 25¢

Made by Postum Cereal Co., Inc., Battle Creek, Mich.
