Time is Only a Piece of Eternity-Chro clogy Engaged in Dividing Up a Portion of Eternity-Rev. T. De Witt Tal-mage's New Year's Sermon.

kev. Dr. Talmage Sunday morning appropriately took for the subject of his New Year's day sermon "The Chronol-ogy of the Bible, or God Among the Centuries."

The text chosen was Deuteronomy xxxii, 7. "Consider the years of many

renerations."
At 13 o'clock last night, while so At 13 o'clock last night, while so many good people were watching, an old friend passed out of our homes and a stranger entered. The old friend making valedictory was 1892; the stranger arriving is 1893. The old friend was garrulous with the occurrences of many days, but the stranger put his finger over his lip and said nothing and seemed charged with many secrets and mysteries. I did not see cither the departure or the arrival, but was sound asleep, thinking that was for me the best way to be wide awake now. Good-by, 1892! Welcome, 1893!

As an army is divided into brigades and regiments and companies, and they observe this order in their march and their tread is majestic, so the time of

their tread is majestic, so the time of the world's existence is divided into an army divinely commanded; the eras are the brigades, the centuries are the regiments, and the years are the companies. ments, and the years are the companies.
Forward into the eternity past, out of
the eternity to come! Forward is the
command, and nothing can halt them,
even though the world should die.
While obeying my text, "Consider the
years of many generations," I propose
to speak of the "Chronology of the
Rible, or God Among the Centuries."

We make a distinction between time
and eternity but time is only a nices of

and eternity, but time is only a piece of eternity, and chronology has been en-gaged in the divine work of dividing up this portion of eternity that we call up this portion of eternity that we call time into compartments and putting events in their right compartment. It is as much an injustice against the past to wrongly arrange its events as it would be an injustice if, through neglect of chronological accuracy, it should in the far distant future be said that America was discovered in 1776, and the declara-tion of independence was signed in 1492, and Washington born on the 22d of March, and the civil war of the United

States was fought in 1840.
As God puts all the events of time in As God puts all the events of time in the right place, let us be careful that we do not put them in the wrong place. The chronology of the Bible takes six steps, but they are steps so long it makes us hold our breath as we watch the movement. From Adam to Abraham. From Abraham to the exodus out of Egypt. From the exodus to the foundation Solomon's temple. From the foundation of Solomon's temple to the destruction of that temple. From the destruction of that temple to the return from Babylonish captivity. From Babylonish captivity. From Babylonish captivity to the birth of Christ.

Chronology takes pen and pencil, and calling astronomy and history to help says: "Let us fix one event from which to calculate everything. Let it be a star, the Bethlehem star, the Christmas star." And from that we go back and

star." And from that we go back and see the world was created 4,004 years before Christ; the deluge came 2,348

Chronology enters the first chapter of Genesis and says the day mentioned there is not a day of twenty-four hours, but of ages, the word there translated as "day" in other places meaning ages, and so the Bible account of the creaation and the geologists' account of the creation are completely harmonious. Chronology enters the book of Daniel and says that the words "time and a half" mean a year and a half.

Chronology enters at another point and shows us that the seasons of the clock and watch were invented so long after the world began their mission that the day was not very sharply divided in Bible times. Ahaz had a sundial, or a flight of stairs with a column at the top, and the shadow which that column threw on the steps beneath in-dicated the hour, the shadow lengthening or withdrawing from step to step.

But the events of life and the events

of the world moved so slowly for the most part in Bible times that they had most part in Bible times that they had no need of such time pieces as we stand on our mantels or carry in our pockets in an age when a man may have a half in an age when a man may have a half dozen or a dozen engagements for one day and needs to know the exact minute for each one of them. The earth itself in Bible times was the chief time piece, and it turned once on its axis and that was a day, and once around the sun and

that was a year.

It was not until the Fourteenth century that the almanac was born, the almanac that we toss carelessly about, almanae that we toss carelessly about, not realizing that it took the accumulated ingenuity of more than 5,000 years to make one. Chronology had to bring into its service the monuments of Egypt, and the cylinders of Assyria, and the bricks of Babylon, and the pottery of Nineveh, and the medals struck at Antioch for the battle of Actium, and all the hieroglyphics that could be deciphered, and had to go into the extremely delicate business of asking the ages of Adam and Seth and Enoch and Methuselah, who after their 300th year

wanted to be thought young.

I think it must have been in recognition of the stupendous work of making an almanac that all the days of the improvement on Roman civilization.

What was the boasted age of Pericles compared with the age of Longfellow and Tennyson? What was Queen soft was also worshiped as a god. Monday, after the moon, which was also worshiped as a god. Tuesday, after Tuesco, the god of war. Wednesday, after Woden, the chief god of the Scindinavians. Thursday, after Thor. the god of thunder. Friday, after Frea, the goddess of marriage. And Saturday, after Saturn. The old Bible year began with the 25th of March. Not until 1752 did the first of the month of January get the honor in legal documents in England of being called the first day of the year.

Improvement on Roman civilization.

What was the boasted age of Pericles compared with the age of Longfellow and Tennyson? What was Queen Elizabeth as a specimen of moral womanhood compared with Queen Victoria; which was been do marked the first day of the warth seem to have reached perfection, and all the nations of Christendom have similarity of time calculations and have adopted what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except Russia, which keeps what is called "new style," except R week are named after the gods. Sunday, after the sun, which was of old wor-

GOD IN THE CENTURIES.

"Consider the Years of Many Generations."

the "old style," and is twelve days different, so that, waiting from there, if you wish to be accurate, you date your letter January 1 and January 13, or December 10 and December 22. It is something to thank God for that the modes are so complete for calculating the clogy Engaged in Dividing Up a Portion of Eternity—Rev. T. Dewitt Talmage's New Year's Sermon.

the "old style," and is twelve days different, so that, waiting from there, if you wish to be accurate, you date your letter January 1 and January 13, or December 10 and December 22. It is something to thank God for that the modes are so complete for calculating the clogy Engaged in Dividing Up a Portion of Eternity—Rev. T. Dewitt Talmage's New Year's Sermon.

are so complete for calculating the cycles, the centuries, the decades, the years, the months, the days, the hours, the seconds.

Think of making appointments as in the Bible days for the time of the new moon. Think of making one of the watches of the night in Bible times a rooster crowing. The Bible says, "Before the cock crow thou shalt deny me of the cock crowing." and that was the way the midnight watch was indicated. The crowing of that barnyard bird has always been most uncertain. The crowing is at the lowest temperature of the direction of the wind may bring the lowest temperature of the might, and the amount of dew and the direction of the wind may bring the lowest temperature of the might or 2 o'clock in the morning, and at any one of six hours. Just before a rain the crowing of chanticleer in the night is almost perpetual.

Compare these modes of marking time, when 12 o'clock is 12 o'clock, and 6 o'clock, and 10 o'clock is 10 o'clock is 10 o'clock, and 10 o'clock is 10 o'clock. The compare these modes of marking time, when 12 o'clock is 12 o'clock, and 10 o'clock is 10 o'clock is 10 o'clock, and 10 o'clock is 10 o'clock

trips up, never falters, never contradicts itself, and here is one of the best arguments for the authenticity of the Scrip-

courts, and you can prove beyond doubt that you were in some particular place at the time you were charged with do ing or saying something in quite another place, you gain the victory, and infidelity has tried to prove an alibi by contending that events and circum-stances in the Bible ascribed to certain times must have taken place at some times must have taken place at some other time, if they took place at all. But this book's chronology has never been caught at fault. It has been proved that when the Hebrews went into Egypt there were only seventy of them, and that when they came out there were \$ 000 000 of them. there were 3,000,000 of them.

"Now," says infidelity, with a guffaw that it can not suppress, "what an absurdity! They went down into Egpyt seventy and came out 3,000,000. That is a falsehood on the face of it. Nations do not increase in that ratio." But, my skeptical friend, hold a moment. The Bible says the Jews were 430 years in Egypt, and that explains the increase from seventy persons to 3,000,000, for it is no more, but rather less than the ordinary increase of nations. The pilgrim fathers came to America in the May-flower, one small shipload of pas-sengers, less than 300 years ago, and now we have a nation of 60,000,000. Where, then is so-called impossibility that the seventy Jews who went into Egypt in 439 years became 3,000,000? Infidelity wrong and Bible chronology

right.

Now stop and reflect. Why is it that this sublime subject of Bible chronology, has been so neglected, and that the most of you have never given ten minutes to the consideration of it, and that this is the first sermon ever preached on the chromotogy and overwhelming. this stupendous and overwhelming theme? We have stood by the half day or the whole day at grand reviews and

or the whole day at grant or the seen armies pass.

Again and again and again on the Champs Eiysees Frenchmen by the hundreds of thousands have stood and and again the Germans by hunagain and again the Germans by nun-dreds of thousands have stood on the palaced and statued Unter den Linden, Berlin, and strewn garlands under the feet of uniformed hosts led on by Von Moltke or Blucher or Frederick the Great.

When Wellington and Ponsonby and the Scots Grays came back from Water-loo, or Wolseley from Egypt, or Marl-borough from Blenheim, what military rether, and they are tame compared with the review which on this New Year's day you from the pew and I from the pulpit witness.

Hear them pass in chrouological order-all the years before the flood; all the years since the flood; decades abreast; centuries abreast; epochs abreast; millenniums abreast; Egyptian civilization, Babylonian populations, Asyrian do-minions; armies of Persian, Grecian, somber epaulets and brighter ages with shields of silver and helmets of gold; shields of silver and heiness of gold; Italy, Spain, France, Russia, Germany, England and America, past and pres-ent; dynastics, feudal domains, despot-isms, monarchies, republics, ages on ages, ages on ages, passing to-day in a chronological review, until one has no more power to look upon the advancing columns, now brilliant, now squalid, now garlanded with peace, now crim-son with slaughter, how horrid with chastliness, now radiant with love and

joy.

This chronological study affords, among other practical thoughts, especially two—the one encouraging to the last degree and the other startling. The encouraging thought is that the main drift of the centuries has been toward betterment, with only here and there a stout reversal. Grecian civilization was a vast improvement on Egyptian civilization, and Roman civilization a vast improvement on Grecian divilization a vast improvement on Grecian divilization a vast improvement on Grecian civiliza-tion, and Christian civilization is a vast

improvement on Roman civilization.

What was the boasted age of Pericles

new year.
But the other thought coming out of this subject is that Biblical chronology, and indeed all chronology, is urging the world to more punctuality and immediateness. What an unsatisfactory and indefinite thing it must have been for two business men in the time of Ahaz to make an appointment, saying; "We will settle that business matter to-morrow when the shadow on the dial of Ahaz settle that business matter to-morrow
when the shadow on the dial of Ahaz
reaches the tenth step from the top," or
"I will meet you in the street called
Straight in Damasous in the time of the
new moon," or when asked in a courtroom what time an occurrence took
place should answor, "It was during
that time of the letter will "or "It was the time of the latter rain," or "It was at the time of the third crowing of

You and I remember when ministers of the gospel in the country, giving out a notice of an evening service, instead of saying at 6 or 7 or 8 o'clock, would say, "The service will begin at early candle light." Thank God for chronological achievements which have ushered in calendars and almanacs and uspered in calendars and almanaes and clocks and watches, and at so cheap a rate all may possess them! Chronology, beginning by appreciating the value of years and the value of days, has kept on until it cries out, "Man, immortal; woman, immortal; look out for that

woman, inmorati; look out for that second?"
We talk a great deal about the value of time, but will never fully appreciate its value until the last fragment of it has passed out of our possession forever. The greatest fraud a man can commit is to rob another of his time. Hear it, ye laggards, a repent! All the fingers of chronology point to punctuality as one of the graces. The minister or the lecturer or business man who comes to his place ten minutes after the appointed time commits a crime the enormity of which can only be estimated by multi-plying the number of persons present by ten. If the engagement be made with five persons, he has stolen fifty minutes, for he is ten minutes too late, and he has robbed each of the five per-sons of ten minutes apiece, and ten

itimes five are fifty.

If there be 500 persons present and he be ten minutes too late, he has committed a robbery of 5,000 minutes, for ten times 500 are 5,000, and 5,000 minutes are eighty-three hours, which make more than three days. The thief of dry goods, the thief of bank bills, is not half so bad as the thief of time.

Dr. Rush, the greatest and busiest physician of his day, appreciated the value of time, and when asked how he had been able to gather so much information for his books and lectures he reconomizing my time. I have not spen one hour in amusement in thirty years."

And taking a blank book from his pocket, he said, "I fill a book like this every week with thoughts that occur to me and facts collected in the rooms of

my patients."

But do not let us get an impression from chronology that because the years of time have been so long in procession they are to go on forever. Matter is not and shows us that the seasons of the year were then only two—summer and winter. We find that the Bible year was 380 days instead of 365; that the day was calculated from 6 o'clock in the morning to 6 o'clock at night; that the night was divided into four watches—namely, the late watch, the midnight, the cock crowing the early watch. The clock and watch were invented so long gether, and they are tame compared to fime have been so long in procession through Regent street and processions through Regent street and along by the palace of London and over they are to go on forever. Matter is not eternal. No, no! If you watch half a day, or a whole day, or two days, as I once did, to see a military on the streets of our American capitals, while mayors and governors and presidents, with uncovered heads, looked on! the last brigade and they are to go on forever. Matter is not eternal. No, no! If you watch half a day, or a whole day, or two days, as I once did, to see a military procession through the very many or a whole day, or two days, as I once did, to see a military procession through the very many or a whole day, or two days, as I once did, to see a military procession through the very many or a whole day, or two days, as I once did, to see a military procession through the very many or and procession through the very many or a whole day, or a whol

So this mighty procession of earthly years will terminate. Just when I have no power to prognosticate, but science confirms the Bible prophecy that the earth can not always last. Indeed there has been a fatality of worlds. The moon is merely the corpse of what it once was, and scientists have again and again gone up in their observato-ries to attend the deathbed of dying worlds and have seen them cremated. So I am certain, both from the Word of God and science, that the world's chronology will sooner or later come to its

The final century will arrive and pass on, and then will come the final decade, and then the final year, and the final month, and the final day. The last spring will swing its censor of apple blossoms and the last winter bank its snows. The last sunset will burn like Moscow and the last morning radiate the hills. The clocks will strike their last hour, and the watches will tick their last second. No incendiaries will be needed to run hither and you with

needed to run hither and yon with torches to set the world on fire.

Chemistry teaches us that there is a very inflammable element in water. While oxygen makes up a part of the water, the other part of the water is hydrogen, and that is very combustible. The oxygen drawn out from the water, the inflammable hydrogen will put instantly into conflagration the Hudsons and Savannahs and Mississippis and Rhine and Urals and Pacific and Indian and Mediterraneau seas. And then the angel of God, descending from the throne, might put seas. And then the angel of God, de-scending from the throne, might put one foot on the surf of the sea and the other on the beach and cry to the four winds of Heaven, "Time was, but time shall be no longer!" Yet, found in Christ, pardoned and sanctified, we shall welcome the day with more glad-ness than you ever welcomed a Christ-mas or New Year's morn.

# perct. difference. Royal Baking Powder

Strongest, Purest, Most Economical.

As to whether any of the baking powders are equal to the "Royal," the official tests clearly determine. When samples of various baking powders were purchased from the grocers, and analyzed by the United States Government Chemists and the Chemists of State and City Boards of Health, the reports revealed the fact that the "Royal" contained from 28 per cent. to 60 per cent. more leavening strength than the others, and also that it was more perfectly combined, absolutely pure, and altogether wholesome.

As most of these powders are sold to consumers at the same price as the "Royal," by the use of the Royal Baking Powderthere is an average saving of over one third, besides the advantage of assured purity and wholesomeness of food, and of bread, biscuit and cake made perfectly light, sweet, and palatable.

The official reports also reveal the presence, in other powders, of alum, lime or sulphuric acid, by which their use is made a matter of grave danger to the consumer.

Whenever a baking powder is sold at a lower price than the "Royal," or with a gift, it is a certain indication that it is made from alum, and is to be avoided under all circumstances.
