OFFICE OF H. D. LARCADÉ, JR. INSURANCE OPELOUSAS

Statistics compiled by Insurance Companies show that nearly nine out of every ten fires are due to defective flues or carelessness.

The most common defect found in the construction of flues is the brick-on-edge flue, built to save a few bricks. Do not be misled by uninformed carpenters who advise the brick-on-edge flue to economise. It is false economy and adds to the danger of your home burning aside from the other causes.

Build a standard Flue approved by The Insurance Companies and save from 10 to 25 per cent on your insurance. I am in business to protect you and my companies against loss by fire. I will save you money on your fire and life insurance. Wind storm insurance \$4 per thousand for 3 years.

I write fire insurance on farm property located in the country at \$15 per thousand for one year and \$30 per thousand for three years, with safe flues.

Fill in the blank below and mail to me and I will be pleased to come to your farm and look your premises over and give you advice regarding insurance.
