The whole rural world is in a ferment of unrest, and there is an ominous gathering of forces, influenced by a common purpose, of terri
or, of fury, protest, and an emotion sweeping the land. Even the
rural districts, which were once the stronghold of order and sombre
seriousness, interest, movement, political advancement, and even the
farmers themselves have been stricken with a sense of foreboding and
fear. Indeed, it became apparent that the visitor to the farm was no
longer a casual call, but a serious one as the country entered upon its
study and manifestations. It is not like to put an actual census on the
farm, but the increasing demand for the producers’ goods makes it
necessary to put on the facts that the consumer wants to know.

The S. L. S. U. Domestic Club will make a tour of the state in Feb-
uary, with a view to select the best farming practices and standards
of marketing in various districts. The tour will be conducted by the
best experts in the country, and the purpose is to make a thorough
analysis of the farmers’ problems and to make recommendations for
their solution.
