HONOR IN HELPING

It is more desirable to receive honor from our descendants than no objection to notable birth, but after all it is better to achieve renown from exalted character.

It should be the desire of all parents for their children to bring honor to them by noble traits of manhood and womanhood. To be distinguished by the children they rear should be the parents highest ambition.

Since the responsibility for education and home training rest upon parents it becomes their duty to provide the best possible opportunities of which they are capable. The schools should be improved and made more efficient. Home life should be conducive to high ideals and lofty sentiments.

But as heavy as the responsibility on parents is it does not stop there. The state and the nation have responsibility. The state and the nation cannot afford to have a large number of boys and girls fail to receive adequate training for their occupations and for citizenship. The life of the nation demands trained men and women. Nor can citizens or the state afford to be negligent in doing their duty to establish schools.

Mexico is a fearful example of a nation that has neglected public education. It is now reaping as it has sown. It will take years and centuries if indeed it is ever possible for Mexico to recover fully from revolution, idleness and lack of education.

We must see to it that the boys and girls of this country have rural public schools. We must give the boys and girls who are to become guardians of this nation a chance to improve upon the citizenship of this country. Until we do this we are not giving our descendants a chance to reflect honor upon us.—Farm and Ranch.
