

# IF SICK TODAY! TAKE NO CALOMEL

"Dodson's Liver Tone" Straightens You Up Better Than Salivating, Dangerous Calomel and Doesn't Upset You—Don't Lose a Day's Work—Read Guarantee

I discovered a vegetable compound that does the work of dangerous, sickening calomel and I want every reader of this paper to buy a bottle for a few cents and if it doesn't straighten you up better and quicker than salivating calomel just go back to the store and get your money back.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your thirty feet of bowels of the sour bile and constipation poison which is clogging your system and making you feel miserable.

I guarantee that one spoonful of this harmless liquid liver medicine will relieve the headache, biliousness, coated

tongue, ague, malaria, sour stomach or any other distress caused by a torpid liver as quickly as a dose of vile, nauseating calomel, besides it will not make you sick or keep you from a day's work.

Calomel is poison—it's mercury—it attacks the bones, often causing rheumatism. Calomel is dangerous. It sickens—while my Dodson's Liver Tone is safe, pleasant and harmless. Eat anything afterwards, because it cannot salivate. Give it to the children because it doesn't upset the stomach or shock the liver. Take a spoonful tonight and wake up feeling fine and ready for a full day's work.

Knew How to Manage It.

## LUXURIOUS WRAPPY COATS; GRACEFUL DINNER GOWNS

THERE have been times when to wear a cloth coat was almost a frank declaration of not being able to afford a fur wrap. Not so this season! It is a question which is the more fashionable right now, the all-fur coat or the wrap styled of luxurious deep-pile fabric. There never has been a time, at least in the memory of this generation, when so many magnificent cloaking materials have been shown. The very names of these marvelous

gown tuned to the demands of club affairs, receptions and smart restaurant after-theater parties, velvet answers in responsive chord.

Soft, supple chiffon velvet "costly as thy purse can buy, rich not gaudy," of such is the fashionable dinner gown of today. Simplicity characterizes these semi-formal frocks.

This trend of fashion is admirably demonstrated in the russet-colored velvet dinner gown here portrayed.

Two Models in the Prevailing Style.

Weaves are suggestive of elegance, such, for instance, as velvetyne, fashona, marvella, pannelaine, luxura, bolivia, and so the list might be continued. Coats masterfully developed of these soft rich cloths are furred in handsome pelts.

The greatest success is registering for brown. Dark brown, with matched furs, leads all else in reigning.

Marvella, that triumph of deep-pile weaves and which will wear a lifetime, was selected for the partizan coat to the left. It is in that wonderful new Mohawk shade, which is a glowing red brown. Dyed wolf, col-

Of course, creative genius must have some point of expression, and this season, it is the girde which boasts of decorative features.

"And it was trimmed in fur," applies to the majority of handsome dressy gowns. In this instance the fur is genuine martens, which bands the flowing sleeves twice around, as if to call attention to the embroidery between exquisitely done in dull gold and silver threads.

It is a matter of fashion, that in place of the beaded crepe dinner frocks the banded velvet gown is preferred. These charming dresses are designed

There are amber settings in the tortoise buckle which holds the new-style drape in pose. The all-over fine tucks in the brown velvetyne coat to the right established this model as very advanced style.

According to fashion's calendar we have arrived at the dinner gown season. The prosaic details of winter coat, street suits and utility frock having been attended to, our fancy lightly turns from the prose to the poetry of dress. To the call for a

In the modish brocaded chiffon velvet frocks, gorgeous coloring prevails and there is practically no trimming, except perhaps a touch of fur or a garniture of metal flowers at the waist, according to the formality of the occasion.

A humorist remarks that in view of the fuss a woman makes over a tiny mouse, he is inclined to believe that the "serpent" Eve said she saw was nothing but an apple worm. The only thing wrong with this theory is that an apple worm certainly doesn't tempt one to eat the apple.—Boston Transcript.

It has been generally supposed that Martin Waldseemuller of St. Die first applied the name America to the western continent. But now Professor Harrington asserts that Leonardo da Vinci gave the name on a map made in 1514.
