Boll Weevil Machine Proving Good.

A report comes in from Frank Carter, one of the ten who are demonstrating the boll weevil machine, stating that after two applications of the poison on a field that seemed ruined from the pest, the weevils have been subdued and the cotton is flourishing with a surety of three bales from four and one half acres.

This successful coping with the boll weevil is interesting the business men and many of the

farmers and any one caring to investigate more fully can see the field at Mr. Carter's home about four miles East of Franklinton on the \$5000 road.

The man who is continually finding fault with his neighbors has a thousand devils working within his being. The condition of the soul finds lodgment in the mind and expression from the lips, and it is well to bear in mind the next time you hear one person picking another to pieces.
