Ford THE UNIVERSAL CAR

The Ford truck is really a greater necessity to the farmer than is a team of horses. Certainly it is a greater utility and economy for him. It saves time, it gives prompt and almost unlimited service along the entire line of farm work, from carrying the milk to marketing the products of the farm. It is not expensive to maintain and has all the Ford simplicity in mechanism that makes it easy to operate. The price, too, is attractive, about the price of a team of horses; \$550, without body, f. o. b., Detroit.
