LOCAL NEWS.

—Our beautiful weather of last week, during which the cool north wind blew, was brought to a sudden termination by a most violent rain and wind storm, which lasted two days. The drop in temperature was very pleasant and gave hopes of an early fall. The past week had been well utilized by all our farmers, rice was cut and threshed and delivered in large quantities, cotton was picked and housed, while a large amount of very fine hay was made and saved. Many of our friends supposing the fall weather had set in, cut a great deal of hay, which was caught by Tuesday's and Wednesday's down-pour. No more rain, or hot weather is needed for the present, especially the latter, but cool, dry weather for next four weeks is needed to mature crops and facilitate fall work on the farms and plantations.

HERE'S A PROPOSITION.

—Messrs. DeBlanc & Landry throw open the doors of their new establishment this week. It is without exception one of the best appointed in town, consisting of a most elegant saloon with all the appurtenances thereof and a fine billiard table, as also a first-class buffet, where nice lunches, or a substantial meal can be obtained. The entire surroundings betoken enterprise, careful attention of the wants of the public. Mr. Henry Guidry, the well known caterer and manipulator of liquid refreshments will preside over this fine establishment, thereby assuring its high class and genteel environments.

For ladies tailor made suits and skirts, go to Kling Brothers.

—At last the iron bridge spanning the Teche, at this point has been opened for pedestrians. For some time our people have been deprived of this modern convenience connecting Brooklyn and this side, this deprivation ought to cure the old croakers, who are ever talking of the "good old times" and increase the satisfaction of those who are once more enjoying the beautiful structure. Capt. Lewis Angers, the contractor, for the repairs, has performed his duty in a most satisfactory manner and praise of the good work is heard on every side. We trust it will be a long while ere we shall be again deprived of this useful adjunct to the City.

—The Lawn Fete given at the Major Gilbert Hall home, opposite the Post Office was a most successful affair, hundreds of our people came, attracted by the beautiful place, its music and other attractions, games, fish ponds, dancing and many ways of passing the hours in innocent amusement were enjoyed by all. The handsome sum of \$167.00 was realized, and will later swell the funds for the carrying on of the war against Mrs. Stegoma. Persons who were so fortunate as to be there declare it was one of the most enjoyable of the many fine gatherings of the season. Of course the grand women of Iberia promoted this, all the others, and to them be praise and honors forevermore.

The machine is of a 16-horse power, and can make a speed of 25 miles per hour when needed. The use of automobiles is increasing constantly. Now that their simplicity of construction and ease of operation is assured those who have need of local transportation and investigating the many merits of this "Horseless carriage." The fact that it neither runs away, nor shys, and is fed with a small portion of oil incurring small expense for keeping, are recommendations that appeal to any one.

A CERTIFICATE.

Segura, La., Sept. 19, 1905.

I further certify that at this date her eyes are now practically straight and that the use of her right eye has been restored, vision being equally good in either eye, and that this has been accomplished without the use of the knife and with scarcely any inconvenience to the patient.
