The Post Office building will in the course of a few weeks receive a complete renovating and repainting to the pleasure and satisfaction of our Postmaster, Mr. Thomas R. Morse who believes in keeping government property in as nice condition as its revenues will permit. Were the same attention given to the Court House and lawn as the property of Uncle Sam the citizens would have no reason to complain.

Attention is directed to the advertisement in another column of the Fasnacht Graded Institute. On Monday last, this educational institution began its twenty-third session with a big enrollment of pupils to take advantage of the different courses being taught under the able supervision of Miss Louise Masnacht, a lady of wide experience in school work.

Brick, sand, cement, lime and building material.—Bertrand Lumber Co.

—Messrs. Horace P. Gates and Gordon A. Sandoz began to-day the operation of their corn sheller under the most favorable auspices. These gentlemen will manufacture several different improved feed stuffs for dairy and other live stock in the course of a few weeks which will keep their plant busy for many months in the year. There is a big field here for the manufacture of food stuff for live stock and with the raw material right at their door there is reason to predict success for the gentlemen. They have contracted for thousands of barrels of grain and are paying prices that will satisfy most of those engaged in that culture.

—Messrs. J. C. Akers and Reuben H. Brown appeared before the Police Jury at its meeting last Thursday on behalf of the Jeannette Fair Association and asked for an appropriation of \$250.00 to help defray the expenses of the Fair on the 28th of the present month which was readily granted by the Jury. This act on the part of the gentlemen was a commendable one, for reasons that nothing more than a Parish Fair will advertise the resources of our Parish which is a benefit to everybody and the Fair Association should be encouraged here as is done elsewhere, some Police Juries contributing as much as \$3000 for such purposes which is money well spent.

—Dame Nature has it that some of our merchants were badly taken on by a gentleman posing as one J. T. Thomas who several weeks since organized a number into a retail dealers association for protection from dead beats and swindlers. It seems that the party also succeeded in mulcting sums from business men in Franklin, Crowley and other points. The culprit was arrested at Lake Charles and will likely spend a few years in the penitentiary. These smooth tongue rascals fare very well in New Iberia whenever they make their appearance here and it is about time to turn down those schemers who give no returns for the money they receive in launching first one proposition then another.

—Work on the Iberia, St. Mary & Eastern Railway is progressing very nicely, the contract for grading being let out. Mr. M. L. Lann of Baton Rouge being awarded the contract from New Iberia to Charonton which should be completed by November 15th this year. Two railroad bridges will be necessary over the Teche between Charonton and Berwick which will delay the work a little. All of the steel rails are on the way and by the above date trains will be running according to the opinion of Mr. Welch, the promoter and president. This new road into that territory paralleling the Southern Pacific will virtually close out any other road for all time to come and once the motor system is in operation as it is the intention of the builders to install there will be little need for a trolley in the Teche country.

PARC PERDUE NOTES.

The heavy rains of the past week have caused the farmers in this section considerable inconvenience, retarding the gathering of the corn crop, which is now ready for the harvest and is only a fair crop this season.

The rains have not been too much for sugar cane, which is flourishing.

The peavine hay crop, contrary to expectations is unusually good. Cotton is dying in spots, supposedly from scalding by the hot sun immediately after rains. The rains have also interfered with fall gardening.

We regret to chronicle the serious illness of Mrs. Duplessis Romero at her home near L'Azote Station.

Mr. Demosthene Broussard, a prominent and well known citizen of the Fifth Ward died at his home, on Coteau, on Sunday, Sept. 3d, at 10:30 a. m., after a short illness, at the age of fifty-one years and eight months. His death was momentarily expected.

The funeral services were held on Monday, Sept. 4, at 11 a. m. at St. Peter's Catholic Church in New Iberia, interment being made in the Catholic Cemetery with Rev. Father Lacroix officiating.

The death of Mr. Broussard was a shock to the entire Parish of Iberia, where he was well known, honored and respected by all, and those of his friends who could reach the town of New Iberia, made it a duty to go there and pay him the last sad tribute of a tear. His untimely demise was a loss, not only to his family and those who loved him intimately, but was a loss to the entire community. May the good and just God have mercy upon his soul; and grant him eternal happiness. He is survived by his widow and five children as follows: Mmes. Anatole Fremin, Olivier Romero, Cress Gary, Ovee Romero and Miss Lavie Broussard also two adopted children, Masters Elol LeBlanc and Etienne Chevalon. He came to this Parish, when a boy, from Mermonteu, Acadia Parish, where he was born fifty-one years ago.

A TEXAS WONDER.

The Texas Wonder cures kidney and bladder troubles, removing gravel cures diabetes, weak and lame backs, rheumatism, and all irregularities of the kidneys and bladder in both men and women. Regulates bladder troubles in children. If not sold by your druggist, will be sent by mail on receipt of \$1.00. One small bottle is two months' treatment and seldom fails to perfect a cure. Send for testimonials from this and other states. Dr. E. W. Hall, 2926 Olive Street, St. Louis, Mo. Sold by Estorze Drug Co. and others.

Monroe News-Star of Aug. 16, 1911, says in part:

While practically all the political discussions up to the present have centered around the aspirant for Governor and United States Senators, it must not be forgotten that there are several other important offices to be filled at the January primary. We believe the voters should exercise as much care and discretion in selecting these so-called minor officials as they do in determining the fitness of the head of the ticket, to the end that the very best and most efficient officials might be chosen to administer the affairs of the government.

In our opinion two of the most important officers in the State Government are Treasurer and Auditor. Both are in constant and close touch with the financial conditions of the State, in a large measure being held responsible for the conduct of all matters connected with the levying and collection of taxes and the correct accounting of same.

Hon. Ledoux Smith, up to the present time, has no active or aggressive opposition to his candidacy for State Treasurer, but it is certain there will be another candidate actively seeking this office before the campaign grows much older. Mr. Smith served one term as Treasurer, during the Heard administration, and his record stands as a recommendation for ability and conservatism that none can dispute. His conduct of the office merited and received the hearty commendation of all those who had business dealings with the department, and stamps Mr. Smith as a financier of rare ability. He is well and favorably known all over the State, and numbers his friends by the thousands. During his recent residence in Monroe, he, by his affability and courteous manner, won the friendship of many who will be delighted to cast a vote for him next January. Mr. Smith is actively canvassing the State, and from reports which reach The News-Star he is almost certain to win by an overwhelming majority, for the electorate of the State recognizes the fact that no other man is so well qualified for the position as he is.

NAVAL UNCERTAINTIES.

With the launching by the United States of the largest battleship in the world, there arises anew the discussion of the vulnerability of the battleship to attack from the aeroplane. There can be little doubt but that the aeroplane is a new menace in naval warfare. To some students of these matters it does not present so much of a menace as the submarine and the torpedo. They argue that its possibilities as an engine of destruction have been exaggerated, and that little attention has been paid to the fact that not only would it be impossible for it to steal upon an enemy unobserved, but that it would be met in its own element by fighters of its own class, with which it would have to engage in battle before reaching the objective point of attack.

All of this is true, nevertheless the problem of defending warships from such enemies, in the absence or failure of aerial allies is one which may well receive practical attention. Already a gun has been invented that can be fired at an angle of 85 degrees, and can send a projectile 19,000 feet up in the air, and an aeroplane would have to get much nearer than that before it could inflict any material damage, and to date some 11,000 feet is the highest elevation to which an aeroplane has ever ascended.

In the meantime nations continue to build battleships and to prepare for war, while professing that war is the last thing which they desire.—Beaumont Enterprise.

BAILEY WILL RETIRE.

Gainesville, Texas, Sept. 6.—Senator Bailey arrived home at 9:35 this morning via the Katy. Although he was not expected until the evening train a large number of his neighbors were soon at the Turner Hotel to welcome him home, and today has been busy shaking hands with his neighbors, who congratulated and endorsed his work in the Senate just closed. In reply to the inquiry if he had any statement to make to the press, he said: "You can say for me that I will not be a candidate for re-election to the Senate next year, and you can also say that this decision is irrevocable. I know that the state cannot find a successor who will be more faithful to the honor and the welfare of her people than I have been, but I sincerely hope that she will find one who can represent her in the Senate with greater ability than I have done."

AN OLD STORY.

In his speech at Amite City, Congressman Pujo is reported to have said: "Do you mean to say, sir, that you will legislate in the interest of the people of Mexico, so that they will bring in the lumber and destroy our southwestern market because of the fact that they can employ labor at 15 or 20 cents a day? The effect of free lumber would be to take away the principal market of those engaged in the industry in the State of Louisiana and to shift it to the Republic of Mexico?"

This pauper labor story is an old Republican yarn that has been used until it is threadbare, and Arsene should be ashamed of himself for using it to attempt to influence intelligent people. It is part and parcel of the old ghost stories they tell little children to make them afraid of the dark and other things they know nothing about. Mexico is not shipping lumber to the United States; but on the contrary Calcasieu and Gulfport, Miss., are sending lumber to Mexico. There is no fifteen and twenty cent labor in Mexico; and what there is competent authorities pronounce dear at any price. A tariff upon lumber is inexcusable, except as a governmental guarantee for profitable

business. It is a tax upon the homes and enterprise of the plain people. It is an incentive to the rapacious lumber barons to deforest the country in their mad haste to gobble the tariff tax. The gentleman from Calcasieu should blush for uttering such a prodromontade.—Abbeville Meridian.

The Erath central, in Vermilion parish, which is being enlarged this year from its former 450-ton capacity to a plant capable of carrying 1000 tons or more per 24 hours, is going ahead with the erection of the new 9-roll mill being installed there; the big concrete foundation was completed before the end of July, and at the end of this week the gearing was to be about all in place, as was the single large engine to run the crusher and the three sets of mills. The mill proper was expected to arrive this week, and will be quickly set to together by means of the 20-ton crane in the engine room, as built in the shops of the A. Moresi Co. Ltd., which works are also to send to Erath in the next few days the air driven crane grab to be used in feeding the carrier in its working on an overhead trolley feed device. The main line of steam piping added to the Erath factory this year is also now up and it is believed that within two weeks after the last machinery receipts are on hand, which should be not later than the 9th inst., the house will be practically ready for the start of sugar making, which is due to prove a long one, for there is bright prospect for from 75,000 to 80,000 tons being disposed of, about three times the 1910 crop in size.

In several days now the laying of the five miles of standard gauge track by the Erath Sugar Company will be completed, but for the leveling following the grading. This road is to traverse deep into the rich Prairie Grege country, and the rolling stock consists of twenty large cane cars, bought from the Southern Pacific road, which will be hauled by a 30-ton locomotive.—Modern Sugar Planter.

RECOMPENSE.
(Published by request)

We are quite sure
That He will give them back—bright,
pure and beautiful.
We know that He will but keep
Our own and His until we fall asleep.
We know He does not mean
To break the strands reaching between
The Here and There.
He does not mean—though heaven be
fair—
To change the spirits entering there, that
they forget
The eyes upraised and wet,
The lips to still for prayer,
The mute despair.
He will not take
The spirits which he gave, and make
The glorified so new,
That they are lost to me and you.
I do believe
They will receive
Us—you and me—and be so glad
To meet us, that when most I would grow
sad
I just began to think about that gladness,
And the day
When they shall tell us all about the way
That they have learned to go—
Heaven's pathways show
My lot, my own and I
Shall have so much to see together by
and by.
I do believe that just the same sweet face,
But glorified, is waiting in the place
Where we shall meet, if only I
Am counted worthy to be there by and by.
I do believe that God will give a sweet
surprise
To tear-stained, saddened eyes,
And that His heaven will be
Most glad, most tided through with joy
for you and me.
As we have suffered most, God never
made
Spirit for spirit, answering shade for
shade,
And placed them side by side—
So wrought is one, though separate, mysti-
fied—
And meant to break
The quivering threads between. When
we shall wake,
I am quite sure, we will be very glad
That for a little while we were so sad.
—Chariot.
