

SHE GOT WHAT SHE WANTED

This Woman Had to Insist Strongly, but it Paid

Chicago, Ill.—"I suffered from a female weakness and stomach trouble, and I went to the store to get a bottle of Lydia E. Pinkham's Vegetable Compound, but the clerk did not want to let me have it—he said it was no good and wanted me to try something else, but knowing all about it, I insisted and finally got it, and I am so glad I did, for it has cured me."

"I know of so many cases where women have been cured by Lydia E. Pinkham's Vegetable Compound that I can say to every suffering woman if that medicine does not help her, there is nothing that will."—Mrs. JANETZKI, 2963 Arch St., Chicago, Ill.

This is the age of substitution, and women who want a cure should insist upon Lydia E. Pinkham's Vegetable Compound just as this woman did, and not accept something else on which the druggist can make a little more profit.

Women who are passing through this critical period or who are suffering from any of those distressing ills peculiar to their sex should not lose sight of the fact that for thirty years Lydia E. Pinkham's Vegetable Compound, which is made from roots and herbs, has been the standard remedy for female ills. In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound.

RANDELL'S CAMPAIGN DOCUMENT.

Did you ever stop to think of the real constructive work Ransdell has done, and is doing, for Louisiana?

Do you know Ransdell took his seat in the House of Representatives two years before Foster entered the United States Senate, and has had more legislative experience at Washington than Foster? As to the value of each as public servants their records are the truest guides.

Do you know Foster was Governor of Louisiana for eight years, and will have been in the Senate three years when his present term expires—twenty years of the highest offices within the gift of our people? Hasn't he been paid abundantly for any service he may have rendered the State as Governor, and does his record of inactivity in the Senate entitle him to re-election?

Do you know Ransdell was Chairman of the Finance Committee of the National Democratic Congressional Committee in the campaign of 1910, which resulted in the overwhelming defeat of the Republican party, and paved the way for a glorious Democratic victory in 1912?

Do you know the three candidates for the 1915 Senatorial term—Sanders, of St. Mary; Broussard of Iberia, and Pujo, of Calcasieu—all live in the extreme southern portion of the State, and whichever is elected the successor of Thornton will be a South Louisiana man? Would it be fair to elect Foster, who also resides in St. Mary, and give both Senators to the Gulf Coast, thereby violating the well-established precedent which for many years has given one of the Senators to North Louisiana?

Do you know Foster, during his service of eleven years in the Senate, has been heard rarely, having made only five speeches, two of which were eulogies on deceased members?

Do you know Ransdell has worked hard and spoken often in Congress for Louisiana; for her products—sugar, rice, lumber and cotton; for her levees, rivers and harbors; for proper quarantine laws to prevent recurrence of yellow fever; for the construction of the Panama Canal; for the establishment of rural mail routes; for the eradication of Texas fever in cattle; for increased agricultural appropriations; and in further-

ance of other practical and beneficial legislation?

Do you know Ransdell has been an apostle of waterway improvement, delivering speeches in every important river and harbor city in the United States; that he has lectured on "The Commercial Growth of New Orleans," "The Southland," "The Glories of Louisiana," "The Undrained Empire of the South," "Conservation," etc., and has written many articles—all with a view of upbuilding Louisiana?

Do you know of any service of this character Foster has rendered?

Do you know the whole South is growing by leaps and bounds, and that Ransdell in two great speeches in Congress—"On to Dixie" and "The Wonderful Corn Crops of the South," which were widely distributed—strikingly called the attention of the nation to the wonderful opportunities offered by Dixie, especially Louisiana?

Do you know Ransdell is the author of the bill which inaugurated the cattle tick eradication work, and that the South is now being rid of this terrible pest, which causes a loss to the farmers of the South of over \$75,000,000 annually?

Do you know during the recesses of Congress Ransdell has toured his district in company with Government experts, who preached to his constituency the gospel of diversified farming, urged the abandonment of the single-crop method, impressed the advantages of drainage, good roads, rural free delivery, and other things which promote the prosperity of our people generally?

Do you know the principal interest of Louisiana in Congressional legislation is in appropriations for the protection of its lands from overflow and the improvement for navigation of its vast mileage of waterways?

Do you know improved waterways are the best of all rate reducers, and the cheapest of all freight carriers?

Do you know a comprehensive policy of waterway improvement has been endorsed strongly by the Democratic and Republican parties in their national platforms; that the Panama Canal is but a link in a gigantic system of improvement that will include every worthy waterway project in the United States, so that our magnificent networks of rivers may become great freight-bearing arteries of commerce?

Do you know Ransdell is the leader of the national waterways movement, being President of the National Rivers and Harbors Congress; that river and harbor bills, as the result of the agitation caused by this Congress, are now passed annually instead of triennially, and amount to more than thirty millions a year instead of less than twenty millions as formerly?

Do you know Ransdell is a member of the Rivers and Harbors Committee of the House, and has been very active in securing

RATS ARE DANGEROUS

Destroy \$50,000,000 Property and Cause Serious Epidemics

World-wide crusade has been started against the rat, the worst destroyer of property (\$50,000,000 yearly) and a serious menace to health, carrying the germs of bubonic plague and other diseases.

If there are rats or mice on your premises exterminate them with Stearns' Electric Rat and Roach Paste, the most reliable and easiest to use of all exterminators. Guaranteed successful or money back.

At all druggists. Be sure to get the genuine; 2c and \$1.00. Stearns' Electric Paste Co., Chicago, Ill.

large sums for the levees and waterways of Louisiana!

Do you know Foster abandoned his position on the Commerce Committee of the Senate, which is the Rivers and Harbors Committee of that body, and thereby lost the best opportunity to help our levees and waterways; that his career in Congress shows he is indifferent to these great interests?

Do you know every citizen of Louisiana pays a levee tax of nearly one mill, and if the National Government can be induced to complete the levee system by making the river banks permanent this terrible burden, which drains our State Treasury of more than \$1,500,000 annually, will be removed? Ransdell is laboring hard to secure this end; Foster is doing nothing.

Do you know Foster's tariff record is indefensible; that he voted repeatedly with Aldrich during the framing of the iniquitous Payne-Aldrich Bill, which was written by and for the "interests"?

Is the World Growing Better?

Many things go to prove that it is. The way thousands are trying to help others is proof. Among them in Mrs. W. W. Gould of Pittsfield, N. H. Finding good health by taking Electric Bitters, she now advises other sufferers everywhere, to take them. "For years I suffered with stomach and kidney trouble," she writes. "Every medicine I used failed till I took Electric Bitters. But this great remedy helped me wonderfully." They'll help any woman! They're the best tonic and finest liver and kidney remedy that's made. Try them. You'll see. 50c at all druggists.

A Glass of Liquid Winter

You can take a little trip into the winter anytime you're hot, tired and thirsty. The very next time you're near a place that sells Coca-Cola, go in and spend 5c for this trip ticket into December—a glass or bottle of

Coca-Cola

The most delightfully cooling and refreshing beverage you ever tickled your palate with. Remember this for the hot days this summer, when the roads are dusty and the sun beats down.

Delicious—Refreshing Thirst-Quenching 5c Everywhere

Send for our interesting booklet, "The Truth About Coca-Cola." Whenever you see an Arrow think of Coca-Cola.

THE COCA-COLA COMPANY
Atlanta, Ga.

THE COTTON MARKET AND THE SOUTH.

Having spent September, 1910, and September, 1911, in the cotton fields of Texas, and having in the interval traveled extensively in the cotton manufacturing districts of both Europe and America, I am moved to put before the cotton producers of the South my impressions with regard to the present situation of the cotton market.

Last year at this time the market was advancing rapidly, and although the crop was a short one, the farmers were receiving a reasonably generous reward for their arduous labor.

I am greatly impressed with the contrast between this year and last. I have been through literally hundreds of cotton fields in both North and South Texas in the past thirty days. Making due allowance for the increase in acreage, I am strongly impressed with the fact that the yield per acre will not be any larger this year than it was last.

Yet, owing to an apparent misconception regarding the size of the crop, the farmers of the Southern States are engaged in a deplorable competition as to who shall sell their cotton cheapest. The fact that the crop has prematurely opened all at once, and is, as far as possible, all being marketed in a few weeks, adds to the demoralization of a situation which will become acute unless balanced by self-control.

The world needs all and more than all the cotton that the South can this year produce. On the average it takes one pound of cotton to make five yards of cloth. An advance of 5c a pound on cotton, therefore, results in an advance of 1c a yard in the cloth, which is consumed by a world population of nearly one thousand million people.

On the other hand, an advance of 5c a pound in cotton means \$25.00 a bale, or something over \$300,000,000 which would be distributed among the eighteen million people resident in the cotton States.

I call upon the farmers of the South to pause in the financial suicide in which they are now engaged. There is no necessity for it. It means great distress and serious loss to many defenseless men and women.

Deliberation, investigation and intelligent action by the individual will result in averting an

enormous loss to the people of the cotton States.

I wonder if it is generally known in the South that seed cotton held after picking for two or three months before ginning seems to continue to develop—the staple growing longer and the seed heavier. If I have opportunity later on I shall say something more on this subject.

My business in Texas at present in the introduction and commercialization of the Price-Campbell Cotton Picking Machine. It is now perfected. It does the work of from thirty to forty hands and does better work than hand pickers at about one-tenth of the cost. Its general introduction means less hardship, more intelligence and greater profits to the farmer and the community. More than this, and most important of all, it means normal and refined lives for the women of the South, and education and intelligence for the children that they have borne.

It has been examined and endorsed by the United States Department of Agriculture, the Texas Department of Agriculture, and hundreds of prominent men, whose written opinions we can supply on application.

I shall be glad if all the men in the South who sympathize with me in the ideals I have set before myself in this enterprise will communicate with me.

I would like every man in the South who is interested in cotton to see the Cotton Picking Machine at work. Unfortunately I can not carry it around and exhibit it, but it is commercially at work in the vicinity of Dallas, and is also on exhibition picking cotton at the State Fair at Oklahoma City. It will be similarly at work at the State Fair in Dallas from October 14 to October 29. I earnestly invite every one to see it.—Theo. T. Price.

Biliousness is due to a disordered condition of the stomach. Chamberlain's Tablets are essentially a stomach medicine, intended especially to act on that organ; to cleanse it, strengthen it, tone and invigorate it, to regulate the liver and to banish biliousness positively and effectually. For sale by all dealers.

S.S.S. REMOVES THE CAUSE AND CURES CATARRH

Catarrh usually begins with irritated, inflamed membranes of the head, nose and throat, from which there is a constant and copious discharge of watery matter. This comes from inflammation of these mucous surfaces and is caused by catarrhal matters and impurities in the circulation. Nature intends that these membranes shall be nourished by the blood, but waste matters and impurities deposited into these delicate parts, sets up inflammation and the discharge is a natural result. When this secretion begins to dry it becomes thick and sticky, adhering to the back portion of the mouth and throat, causing the "hawking" and straining so troublesome to Catarrh sufferers. Other ordinary symptoms are caused from congestion of the circulation by the catarrhal impurities.

There is only one way to cure Catarrh, and that is to remove the cause by purifying the blood. Washes, sprays, inhalations, etc., do not reach the circulation, and therefore can only afford temporary relief. S. S. S. cures Catarrh by cleansing the blood of all impure catarrhal matter, and at the same time building up the system by its unequalled tonic effects. In other words, S. S. S. cures Catarrh by purifying the blood so that the mucous surfaces and linings of the body are supplied with healthy nourishment instead of being continually irritated from the catarrhal impurities. Then the inflamed membranes heal, the discharge is checked, head noises cease, the stomach is toned up, and the throat is no longer clogged with mucus. Book on Catarrh and any medical advice free. S. S. S. is for sale at drug stores.

I suffered for a long time with a bad case of Catarrh. I had a constant discharge of watery matter from my nose was always stopping up, my mouth had a burning and disagreeable odor and I coughed incessantly. I heard of your S. S. S. and commenced to use it, and after taking several bottles I was cured and have never since had the slightest symptom of the disease.

MRS. MARY L. WISHMAN, 648 1/2 Vista Ave., St. Louis, Mo.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

SMALL FARMS VS. PLANTATION.

The people of Rapides parish have already begun to realize the value of cutting up the large plantations into small farms. The Shreveport Times says on this subject:

Mark Ramsey, writing in the Progressive Farmer, uses an illustration from personal observation showing the importance of cutting up the large plantation into small farms. He refers to a trip he made recently down in Green County, Alabama, where the land is rich and level, as is the case with the alluvial sections of Louisiana and especially along the Mississippi, the Ouachita and the Red Rivers. Mr. Ramsey describes the great plantations of cotton with little spots now and then in corn and alfalfa, and little tenant huts dotted here and there. He says that the land would abound in all the clovers, grass, wheat, oats and corn, but that there is only the big cotton plantation "that has no inviting look about it; poverty; eternal drudgery year in and year out; disappointment at every harvest, to say nothing of bleeding the soil until it refuses to yield at all."

And right in the heart of this fine land he found it could be bought (not all of it) for \$15 to \$20 per acre.

Mr. Ramsey then makes the following contrast with a section he passed through a few days later on a train between Nashville and Decatur, Ala.:

"Through this valley as far as the eye could see were beautiful farm homes—lots of them. The pastures had blooded red cattle and pure-bred hogs, sheep and fine mules and horses, jacks and jennets, all fat and sleek at the coming of spring-time. Along the roads you saw people that had a happy contented look on their faces driving first-class roadsters that could move."

"I asked a citizen who got on the train at a little station, \$100 to \$200 an acre; not because it's better land than Green County, Alabama, but because it's a country of small farms and the owners live on them. And all along you could see substantial church and school buildings. But not so in the negro tenant section, and never will be until all these old big farms are cut up and sold out in 40 to 160-acre farms. When this is done Green County will blossom like a rose and not before."

One of the most promising signs of the times in North Louisiana today is the tendency of which Mr. Ramsey writes—the cutting up of the big plantations into small farms and their settlement by industrious white farmers brought here from the Middle West. We may be sure that this is a step in the right direction and that the result will be to make the rich valleys of Louisiana like the valley of which Mr. Ramsey writes, only a little more so.

Old and True.

"For fifteen years I have constantly kept a supply of Hunt's Cure on hand to use in all cases of itching skin trouble. For Eczema, Ringworm and the like it is peerless. I regard it as an old friend, and a true one."

MRS. EULAPRESLAD, 50c per box. Greenfield, Tenn.

FOR CHEAPER LIVING.

The movement against the middlemen and commission trust which, in fact, is a movement for cheaper living is becoming nation wide. The first step was taken when the Farmers' Alliance established a great market in New York City, and it has been followed by the labor unions of Chicago with a co-operative store for the supply of food. It is said that three years ago an effort of this kind failed because the railroad companies worked with the commission merchants to ruin the enterprise.

"Labor unions everywhere," says the Indianapolis News, could form a most potent aid to the effort to reduce the high cost of living by rescuing the markets from the trusts that now have control of them. No one is more interested in the success of the effort than the workmen, and, as they have the organization, they can become a powerful help in this movement of the people to get fair play. It is no mere legal affair—no mere 'show.' It is a movement that extends from New York to the Far West, and is starting up with a spontaneity that shows its genuineness and stamps it as being of the people, for the people."

It is expected, of course, that mistakes will be made in the beginning; but when the people are determined to be no longer defrauded it will be safe to be on their side. From Chicago comes the news that producers are now getting more for their products, while the consumers are enjoying lower prices.—Exchange.

You are not experimenting on yourself when you take Chamberlain's Cough Remedy for a cold as that preparation has won its great reputation and extensive sale by its remarkable cure of colds, and can always be depended upon. It is equally valuable for adults and children and may be given to young children with implicit confidence as it contains no harmful drug. Sold by all dealers.

Says the Crowley Signal: "You can't raise no potatoes in this here rice country, because they won't stand up; and besides, it's toodamhot, and it's toodamcold, and it's toodamwet and it's toodamdry, declares the Hookworm club in executive session. But there are a few live ones who are going to take a chance next spring by planting a few acres apiece in well drained land, early enough to catch the high market. A rice belt farmer who can not raise two hundred bushels to the acre of saleable Irish potatoes ought to try farming. The rice belt farmer who pays two dollars a bushel for potatoes imported from Arkansas, Missouri, Kansas or anywhere else, ought to be put in jail."

Averts Awful Tragedy.

Timely advice given Mrs. C. Willoughby, of Marengo, Miss. (R. No. 1) prevented a dreadful tragedy and saved two lives. Doctors had said her frightful cough was a "consumption" cough and could do little to help her. After many remedies failed, her aunt urged her to take Dr. King's New Discovery. "I have been using it for some time," she wrote "and the awful cough has almost gone. It also saved my little boy when taken with a severe bronchial trouble." This matchless medicine has no equal for throat and lung troubles. Price 50c and \$1. Trial bottle free. Guaranteed by all druggists.
