

### Check the Symptoms of Lung Trouble

One of the many reasons why Lung Trouble is so difficult to fight is because the disease is often of a very flitting nature. The patient may look well, but in reality is fast losing strength by continued night sweats, fever and cough. These symptoms should be checked as quickly as possible. Dr. J. M. Albrecht's remedy is beneficial in checking fever and night sweats and it has brought about many complete recoveries. It is available at all drug stores.

"Gentlemen: I am writing you this testimonial that others may know what your Alternative has done for me. Since I was a very young woman I have a sufferer from Bronchitis. I tried doctor after doctor, getting little or no benefit. Finally I had night sweats, weak spells and lost rapidly in weight and my doctor told me if I were not checked I would have Lung Trouble. Miss Mary Kuchner, who is a friend of mine, recovered after taking your Alternative and insisted that I try it. I am now, after two years, perfectly well, strong and healthy."

### THE STALKING WAR SPIRIT.

The Mexican leaders, under the careful direction of President Wilson, are blending in harmony. They want peace and they indicate a disposition to act with the civilized intelligence and humanity that will make for peace and on this chapter will be closed. In Europe, however, the situation is altogether different. George's effort to be a king to settle the Uster trouble vally has royally failed, and nationalists and Unionists face a struggle which may be to a death. The march of the Austrian army on Serbia is pike to be the torch to set off a train powder that will blow up every magazine in Europe. Austria, angered by the proposed n-Servian arrangement and by the killing of Archduke Ferdinand, has raised her banners of dread. The Russian bear, hearing tread of marching men, has sed himself and is growling nously. The word comes that Asia is prepared to go the limit, if Austria and Russia is pressed to go the limit, and if Austria and Russia fight, Germany and heaven knows what er powers will be involved. It is like the long-awaited unial European war may be af d.

The chief hope, perhaps the hope, is that the crisis is so e and menacing that its very ity will lead to sober second ght that will avert war. The d will pray that it may be s.

### THE VALUE OF INSURANCE.

All can recall specific instances where practically all that remained for the widow and children was the proceeds of a life insurance policy. Such examples are not rare ones, and, as they occur, they present forceful illustrations of some of the economic benefits of life insurance. It is not alone that the individuals comprising the family in such cases are better housed, better fed and better clothed, but there is a far more important factor, namely, the mother is enabled to keep the children together and the family unit is not entirely destroyed. This phase of life insurance has not been emphasized enough nor given the attention which its importance warrants.

### \$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and securing nature to doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

### THE FUTURE IS SAFE.

In referring to a recent editorial in the Daily Times, in which it was argued that the sugar belt had at least found it could raise something besides corn, the Beaumont Enterprise says:

"As for the Louisiana rice belt, like the Texas rice belt, it will not have to depend on rice alone when it learns to raise cattle and hogs. The silo will enable it to raise cattle even more cheaply than they can be raised in other parts of the country, and it is certain that no tariff changes will ever bring the price of beef below a profitable point. The coast country may have some hard lessons to learn before it finally strikes its gait, but its ultimate future is safe. It is destined to become one of the most profitable agricultural regions in the world."—L. C. Times.

### CONCENTRATE.

Don't spatter a pint of brains over the vast field of art, science and literature. Don't think that a smattering of Greek and Latin, Analytics and college yells make one a learned man or fits him for business, and don't hitch a business brain to a Greek lexicon. Many a man becomes nothing by trying to become all. The shot gun uses much more ammunition than the rifle, but it isn't half as effective except on little game.

The professions are all over crowded; it requires half a life time for one to succeed in them, and half a fortune to begin success. With business it is not so. The average business man earns \$27,000.00 more than the professional man in the average earning period of a man's life.

Get busy; do things; life's too short for business men to spend effort on dead languages and other things two thousand years old, when living issues and golden opportunities are calling them on.

The things that business men want you to know are not taught in a university. They must be learned in a practical business training school like the Tyler Commercial College of Tyler, Texas. A school that has for years studied the demands of the business world, and with its own special prepared text books and "learn to do by doing" methods of teaching, are meeting them.

Their courses of business administration and finance, Book-keeping, Shorthand and Telegraphy are thorough and complete and meet the demands of the business office. Young friends, there is no walk of life that you can pursue as successfully without a business training as with it.

Next week this paper will publish statements from many of America's greatest statesmen and business men as to the value of a business training.

### HOW YOUR LUCK?

Cut this article out and place it in your hat, and when you think you are playing in "bad luck" read it:

"His horse went dead, and his mule went lame, and he lost his cow in a poker game. A cyclone came on a summer day and blew the house where he lived away. Then an earthquake came when that was done and swallowed the spot that the house stood on; then a tax assessor came 'round and charged him up with the hole in the ground."—Green- ville (Tenn.) Sun.

### ATTENTION FARMERS! THE NEW IBERIA CREAMERY IS NOW IN OPERATION.

HIGHEST MARKET PRICE PAID FOR CREAM.

Ship your CREAM in either large or small quantities and receive weekly check.

We have created a market for this product in a country most favorable for its production.

The selling of cream has made communities rich where, growing days number less than one hundred and fifty a year, soil fertility medium, and climate unfavorable—give it a chance to show what it can do where growing days are from two hundred and fifty to three hundred a year, soil most fertile known and climate ideal for stock raising.

The dairy cow brings in cash for your purse regularly, furnishes food for calves, pigs or poultry and increases the productiveness of soil by increasing fertility.

Can any other one animal on your farm do more or as much?  
If you have no cream to sell visit the creamery anyway. See what is being done and ask for any information wanted.
