**DECISIONS RENDERED BY
DISTRICT COURT.**

Following is a list of the civil cases decided by His Honor, Judge James Simon of the 19th Judicial District Court which concludes its term to-day. While the docket was a light one during this term due to the untiring work of the Judge in keeping right up with his work, still some of the suits were of such nature that it required several days to get in all of the evidence. As the decisions are handed down we will endeavor to give our readers the result of the Courts conclusions:

Planters Supply Co. vs. Ralph Segura, judgment for plaintiff.
Planters Supply Co. vs. Louis Cuir, judgment on promissory note.
Smith, DeBlanc & Suberbielle vs. Gab. Olivier et als, judgment for plaintiff.

AUSTRIANS OPOSE POLICY OF GERMANY.

London, Dec. 2.—The Morning Post's Hungarian correspondent says: "The resignation of the three Austrian cabinet members is a protest against Germany's attempt to force a zolverein on Austria and Hungary and a warning to the people of Austria-Hungary that there is economic danger ahead."

"Germany zolverein policy already has aroused bitter opposition in both the Austrian and Hungarian governments. There is little doubt that the conference between the two emperors had reference to a tariff union and that the ministers who opposed it had to resign."
"Dr. Rudolf Schuster Von Bonnot, minister of commerce, who resigned, is a shining light in the circles that fear that after the war Germany, cut off from exploiting the entente countries, is preparing to swallow Austria Hungary under guise of a customs union."

RANSELL CHOSEN TO AID RIVER BILL.

Washington, D. C., Dec. 2.—Senators and representatives from the States bordering on the Mississippi river went to work in earnest today to secure separate legislation for the maintenance of the "Father of Waters" as a navigable stream. A meeting was held and Senator Ransdell of Louisiana was chosen chairman of a sub-committee of thirteen congressmen to draft a bill. The sub-committee was instructed to report Jan. 5. The Mississippi, it was unanimously agreed at today's meeting is more important to the country as a whole than the Panama Canal.

The consensus of opinion was that it should be dealt with and appropriated for separately. It is expected that strenuous opposition will be encountered when the proposition is put before Congress, for many of the statesmen by experience know the advantage of fusing the Mississippi and the propelling force in gaining concessions for other and smaller waterway projects.

Louisiana was represented at the meeting by Senator Ransdell and Representatives Lazaro, Aswell, Dupre, Wilson and Martin. Senator Broussard arrived today to participate in the conference. Senators Williams and Vardaman were there to look after the interests of Mississippi.

War Upon Pain!

Pain is a visitor to every home and usually it comes quite unexpectedly. But you are prepared for every emergency if you keep a small bottle of Sloan's Liniment handy. It is the greatest pain killer ever discovered. Simply laid on the skin—no rubbing required—it drives the pain away. It is really wonderful.

Mervin H. Soister, Berkeley, Cal. writes: "Last Saturday, after tramping around the Panama Exposition with wet feet, I came home with my neck so stiff that I couldn't turn. I applied Sloan's Liniment freely and went to bed. To my surprise, next morning the stiffness had almost disappeared, four hours after the second application I was as good as new." March, 1915. TO THE PUBLIC.

New Iberia, La., Dec. 2, 1915. It has come to my knowledge, that a rumor is current on the streets, and given credence by some, that since the death of Mr. Aristide Boutte, my father, that I have discontinued, or rather refused to furnish burial outfits to members in good standing in our burial books. Ordinarily it would be unnecessary for me to refute these statements, but the course from which these rumors come (as reported to me) makes this necessary. Since my fathers death three funerals have been handled by the Boutte Undertaking concern to the total satisfaction of those concerned, and I am prepared to say, that those who have intrusted to us the burial of their ones, need to in no wise credit the rumors above mentioned. I regret that this communication has been made necessary, but in justice to the memory of my deceased father, and to the business which he built up, and which I hope to continue, I write the above.

Respectfully yours,
ESTATE ARISTIDE BOUTTE.

DISTRICT JUDGE DECLINES TO HOLD COURT IN JEFFERSON WHILE STATE TROOPS THERE.

New Orleans, Dec. 2.—The clash of state and local authorities in Jefferson parish reached an acute stage this afternoon when Judge E. Fleury of the district bench suspended court and refused to proceed in the case of the Barataria Land company against the Louisiana Meadows Company on the ground "that his court had been superseded by martial law by direction of Governor Hall."

Governor Hall promptly replied that "martial law as being executed by Adjutant General McNeese could not possibly be construed as meaning to supersede the courts. If Judge Fleury does not hold court, it is because he does not want to. Any delay in court procedure in Jefferson will be caused by the parish authorities and they alone are responsible."

Former Governor J. Y. Sanders and Edward Rightor, attorneys for the Barataria Land company, immediately appealed to the supreme court, and that tribunal tonight issued an order for Judge Fleury to show cause why his court should not continue.

Meanwhile at 5 o'clock this evening, Governor Hall sent for Sheriff L. H. Marrero and they were closeted in conference at the executive's apartment for some time. The executive demanded to know if the sheriff of Jefferson intended to aid the state and facilitate it in "cleaning up Jefferson." Governor Hall made it plain to Sheriff Marrero that his activity at this time would determine the length of stay of the troops in Jefferson.

Seven slot machines and other gambling paraphernalia were discovered, captured and brought to headquarters by the militia today.

Rev. Father Stenmans, pastor of St. Joseph's Catholic church in Gretna, issued a statement today protesting against Governor Hall sending troops into Jefferson and declaring martial law. He denounced the executive order and said it was unwarranted.

Paul Ristoph in another statement today made further charges against Dr. Charles F. Gelbke, one of Governor Hall's chief aides, alleging that he knew at the time he received \$870 for Ristoph that it was "hush money" from Joe Hyland, and not campaign contributions.

Telegrams today from prominent business men in Eunice, Crowley, Winnfield, Monroe, Baton Rouge, Hammond and other points strongly indorsed Governor Hall's determination to restore law and order in Jefferson.

A CRUEL THREAT.

The administration's conduct of this country's affairs with respect to the nations of Europe during that country's war has moved Colonel Roosevelt to say that he will never feel like showing his face in Europe again.

The colonel was always a stern man, but who would have thought he could have been so cruel? When we reflect that there are millions of people in Europe who have never seen the Roosevelt face we are moved very close to the verge of tears by this terribly inhumane threat.

But surely the colonel has friends, and surely they will beseech him, plead with him to un-say them "cruel" words.

War is cruel, degrading and demoralizing, but when one contemplates the horror of millions of people in Europe having to go through life without a view of the Roosevelt face, the horrors of war fade into insignificance.—Beaumont Enterprise.

NEW SYSTEM PROPOSED.

New Iberia, Dec. 2, 1915.

Editor Enterprise:

Dear sir—You will remember that in a recent issue of your valuable paper, I made mention that I requested Mayor Sealy to call a number of representative citizens together so that I could be able to show them and to explain to them the feasibility of my Water Power System, and also the advisability of putting my system in at once in order to do away with the great expense of the present power system of the Electric Plant at the present time, and it seems to me that this will continue to be the case indefinitely. Up to the present date I have heard of no move to grant my request; is it possible that the Commissioners believe, or are of the opinion that the Power System I speak of is not worth the trouble, this I can hardly believe. If this be the case, I say that their opinion of this power system is entirely erroneous, and why? The entire working of my power system rests on compressed air, will not compressed air, as is my power system do the same as compressed air acts everywhere else in this wide world and as it acts right here at the Electric Light Plant, lifting water there, I judge some thirty feet or more from the water level to the discharge end. This being the case, I request all critics to tell me why compressed air will not act in the same manner in my power system, which is dependent on compressed air to lift sufficient water to a certain height and returns through another pipe by gravity to the power turbine wheel and which produces the motive power necessary to operate any power system. What does Westinghouse say, one of the best authorities in the United States, Westinghouse of air brake fame. I quote here his very words: "The use of compressed air for pumping or lifting water, or other liquid, is now in such general use as to require no extended description or introduction, the simplicity and ease of maintenance and its use, make it far superior to any other method and to make use of other pipes of proper size, properly proportioned as to size and connections, and properly placed to remain indefinitely without need of attention or repairs, the air may be compressed at any convenient point, such as an existing power house and yet do pumping or lifting water, several wells being pumped if necessary from one central station." Is not such proof as this sufficient to convince any skeptic of the entire feasibility of my system. Under such circumstances I cannot see or understand why it is not more and of greater interest to the taxpayers to call them together to look into the advisability, whether or not a system or power system can be placed in our Electric Light Plant that will forever do away with this expense. Do away with the system of burning money which is going out of the smoke stack and floating away into the very elements, air, that if compressed, will save it. Mr. Editor if you think this of any interest to the taxpayers you are at liberty to publish it in your news column.

Yours most respectfully,
JNO. W. EMMER.

E. O. BRUNER

Candidate to Succeed Himself For Commissioner of Agriculture and Immigration.

"At the head of the Agriculture and Immigration Department only one term, has made it the liveliest branch of our State government, has made it a powerful factor in the up-building of Louisiana in agricultural and stock raising, has cut out many expenses and placed the whole department on a business basis.

"After paying the salaries and traveling expenses of the inspectors and the salaries of the stenographers, stationery, etc., out of the tag sales, he has turned over to the Director of the Experiment Stations over \$80,000.00; he has brought the farmer, city and town people closer together, and through his constant boosting and extensive advertising has brought thousands of home-seekers to Louisiana.
