Jupiter Pluvius favored us with a splendid rain on Wednesday night and Thursday all day which filled up many empty cisterns and otherwise did great good to the land that had been plowed for next years' crop. On Thursday night a freeze set in, which will also be very beneficial as it will destroy many worms this section is subject to that often times does much damage to the crops before they are matured. As a whole we have had one of the most ideal winters we have had for many years and no one should have any reason to complain.

The Gulf Refining Company started last Tuesday boring on the Schwing-Goodwin tract near Olivier Station. This Company have their derrick and grounds lighted up by electricity and the work of developing an oil field in that vicinity has been begun in earnest. From what we learn several hundred thousand dollars will be spent by this one concern alone before they will give up the field. The New Iberia Oil Company which is composed principally of our own citizens have almost got every thing in readiness to begin their well which is in charge of Mr. Edmond Boutte who has had several years experience in that line, which he acquired in other fields. We understand a number of other companies will be formed within a few weeks and ere long the prospects are bright for a large number of wells in the Parish of Iberia. There is one thing certain if there is any of the fluid down in the bowels of the earth in this Parish it will undoubtedly be brought to the surface. It is hoped that gas in abundance will also be found which would mean so much to New Iberia from an industrial standpoint. Prospects are exceedingly bright for several new industries being started here if these fields are found to be rich.

Break your Cold or La Grippe with a few doses of 666.

We were handed a copy of the Literary Digest which contains an interesting article, entitled "Cotton's Magical Rise Enriching the World," for reproduction in this number of The Enterprise. Owing to the unusually crowded condition of our columns this week with legal and special Christmas advertising we were compelled to lay the article aside for some subsequent issue when our space will permit its reproduction. The article is one giving a true version of the cotton situation in this country from the time that the "Buy-a-Bale" movement was started to help the farmer from complete bankruptcy, until now what even the seed itself is bringing upwards of \$90.00 a ton. When this article is published in one of our subsequent numbers, it will no doubt make interesting reading for many of our subscribers who are not acquainted with the situation as regards the fleecy staple.
