—At the request of Mrs. C. W. Outhwaite, the Parish Chairman of the Red Cross Society, we were informed to state that owing to pressing work the publication of her notes relative to the work being accomplished in the Parish will appear in our next number.

—The regular services of the Presbyterian church will be held to-morrow night at eight o'clock. On Wednesday at the same hour prayer meeting will take place. The public is cordially invited.

—This afternoon at four o'clock Mrs. Lydia Wickliffe Holmes, the Chairman of the State War Savings Stamp Association will deliver a lecture at the New Iberia High School. Mrs. Holmes is touring the State lecturing to the people on War Savings Stamps and has met with large audiences in every town she has visited. On Thursday she telegraphed to Mrs. (Dr.) J. W. K. Shaw that she would make her appearance here and it behooves our patriotic citizens to make the meeting a success.

—In a letter to us on May 1st regarding the postponement of the meeting of the Louisiana Press Association, Hon. L. E. Bentley expressed his regret over the death of Senator Broussard as follows: "I have often thought, since the death of the lamented and beloved 'Bob' Broussard, how fortunate it was that other deterrent circumstances led to the postponement of our proposed meeting at New Iberia, else we would have been there just after the mournful event and during the funeral obsequies, which would have been a sad damper to our convention. I have always been fond of 'Cousan Bob,' and regret his loss as of he had been indeed of my kith and kin. What a lovable man he was!"

—On Saturday last the State Convention of the Knights of Temperance organization took place in the city of New Orleans, and as predicted in our last number, New Iberia won honors of which all the friends of that worthy Society should feel proud. Out of six of the most important offices the delegates from our City captured three. Mr. Julius Bertrand was elected as the Grand Worthy Chief of Louisiana; Mr. John M. Perry, another of the life-long members was honored with the position of Grand Chaplain; and Hon. Ozeme Jacob, one of the fathers of that institution took over the office of Grand Marshal of Louisiana. Strong resolutions were adopted endorsing our esteemed President's war policies and the Secretary instructed to forward the same to the capitol at Washington. The meeting was one of the most successful ever held.

—Bitten by vicious dogs twice in two weeks is the record of the ten-year-old son of Mr. Walter Angers. Some two weeks ago while on his way to school he was bitten badly on the leg and again on Thursday when passing through negro quarters on Lee Street, met with the same fate and it was again necessary for his limb to be cauterized. This is aggravating and unless steps are taken by some one in authority to kill roaming canines some person will receive the bite of a dog suffering from hydrophobia. Almost daily dozens of dogs roam our streets, especially the southern portion, and in some instances households have as many as four of these worthless curs on their premises. We trust some ordinance will be passed giving the officers the right to capture all stray dogs and take them to some secluded place and destroy them.

—We wish to direct the attention of our rice farmers to the advertisement in another column of the Dickleman Ventilated Rice Bin which is being introduced in this section by Messrs. John O. Hughes and R. C. Sealy, the former gentleman being the State agent of this valuable and indispensable invention. These gentlemen are having no trouble in selling the bins and already three carloads have been sold to those who have realized the great saving in money by dispensing with sacks. The rice is threshed directly into the ventilated rat proof bin instead of being stored in sacks worth 30¢ each. This Dickleman metal bin assures a circulation of pure fresh air which prevents mold rot or decay, is portable and acts as a storage until the cereal is put upon the market. Volumes could be written about its many uses were we to have the space. Rice growers should investigate the wonderful storage room which is so well adapted to their many needs.

—The little five-year-old son of Mr. A. J. Louviere came near being seriously injured last Sunday evening at seven o'clock in being run over by an automobile. It seems the little urchin was in the act of crossing the street at the corner of Corinne and Main, and his attention was focused upon a buggy while an automobile drove into sight. Fortunately the driver of the car was only traveling at about six miles an hour, or else the child would have been seriously crippled, or probably killed. As it was the gentleman succeeded in stopping the machine after the front wheel had passed over the victim's leg. Had the heavy part of the car struck him, he would no doubt have been killed outright. The owner of the machine alighted and picked him up and brought him to his home when physicians were called in and the boy examined. The accident was due solely to the child's thoughtlessness in running in front of the car and no blame was attached to the owner of the automobile who rendered every assistance possible after the occurrence. Beyond a few bruises and a terrible fright the child was not injured.

—New Iberia will soon be in position to lay claims of having two of the finest rice mills in the State, if we are to judge by the additions being made to the mill of Mr. Phil Conrad which is situated on Ann Street. Mr. Conrad is doubling the capacity of his plant in order to meet the demands that will be made upon him during the next rice harvesting season. Another frame addition of 30x65 feet, two stories in height is being attached to his mill. He will install another huller and a machine to remove all foreign substances from the cereal, together with additional boilers and other machinery necessary to enable him to handle rice as efficiently as any plant in the State. A large force of mechanics are employed there putting in full time so as to have everything in shape to turn on steam as soon as the grain begins to go to market. Now that so many farmers have engaged in the cultivation of rice there is ample room here for the two industries underway, and it behooves our citizens to interest themselves in a large cannery factory in order to insure proper prosperity in our community. Without industries New Iberia cannot hope to go forward and now that we are to be well equipped to take care of the thousands of acres of rice being raised here, we should also encourage the building of a modern cannery factory. With a factory established here hundreds of owners of small farms would engage in truck planting. It is only through manufacturing industries that we can enjoy real prosperity and instead of land being worth \$75.00 an acre, its value would reach as much as \$200.00 as it does in many parts of the South and thus give employment to hundreds of citizens and the money be circulated right in our midst.
