

WOMAN'S WORLD

It is not only in dresses and linings of mantles that the Chinese hue will be found. It will appear in millinery in many shapes and shades. Ribbons are as easily made of yellow as of any other color, and feathers and laces can be yellowed with equal facility.

There will be many shades, and each shade will have a different name, distinctive and generally odd. The men and women who prepare new styles are ingenious, and can think of all kinds of designations for variations of the same color. So we have "old colonial yellow," "tip of the canary's wing," "crushed lemon," "autumn leaf," "lintercup," "brimstone," "old ivory," "golden sands," "golden rod" and dozens of others. Most of these shades are attractive, and none are downright ugly, so long as one likes yellow at all.

It is a peculiarity of yellow that certain shades of it can be worn by either blondes or brunettes. The rich effect of yellow in conjunction with dark hair and bright brunette complexion is understood by every one. But it is a new thing to many blondes to learn that there are shades of yellow that are most becoming to their complexions. It is the intention to use yellow a great deal in connection with brown in dresses and hats this autumn. It is a pretty combination, the yellow showing up bright and distinctive against a dark brown background.

Among other directions in which yellow will be the dominant color must be mentioned luncheons and teas. There will be yellow luncheons and yellow teas. The charming effect of yellow lamp shades, and yellow ribbons setting off the pure white napery of well-appointed luncheons, can be imagined. It will be even better than the pink, which has so long held sway at these functions. On a dark afternoon, too, yellow decorations will brighten up a room almost as much as the rays of sunshine.—New York Press.

BLACK MATERIALS FOR WINTER.

Black materials are to be greatly favored this winter, and a special and attractive exhibit of stylish and elegant black goods made this week, included French armures with bourette knots, mohairs and canvas weaves with boucle figures, English whipcords, camel's hair serges with glossy silk and wool stripes in raised designs, plain and fancy alpaca and brilliantines, satins, moires, both plain and brocaded, Henriettes in silk warp and sheer all-wool combinations, drap d'ete, repped silks and repped wools in both fine and heavy cords, new designs in crepons, and many handsome textiles in crepon effects. The mohairs and Henrietta cloths, the faced cloths, are represented in different qualities and prices, and possess a degree of durability that is unsurpassed by nearly any black material save silky English serge, which is less dressy in effect than the finer woven fabrics. Many other standard black textiles are displayed that are in steady demand, as the outlook for the winter season indicates an even greater demand for handsome black fabrics than was experienced a year ago, when this color largely prevailed.—New York Post.

THE RIBBON SASH.

The wide ribbon sash is to be worn generally again and our modistes have arranged that they shall be a part of the street costumes no less than for evening gowns. A number of new features, however, will be introduced. Hand-painted sashes and sashes with fringed ends will be seen, also those having the ends finished with an edging of feathers. Many debutantes will wear with their party gowns sashes of filmy tulle. These sashes, when tied in a big butterfly bow at the back, will give a delightfully airy touch to a costume. One way of wearing the sash will be to have it form part of the bodice, being tied in a bow on the left shoulder. Another new way is to let it start from the back and be drawn over the corsage, much like a very short bolero. Right in the front it lies in a bow, with full loops and long ends. When the sash is worn around the waist it is very broad in front, tying at the back in small loops, with long ends. This is one worn in Paris. Colors which promise to be most in favor are the new red shades, of the favorite ways in which the sash is. A cherry pink is one of the latest exquisite colors, also a soft, brownish cherry. Any of the new red shades in the changeable glace ribbon, with the black edge, are most effective. Also all the varying tints of violet and mauve will be fashionable. For street costumes the newest sash is of black satin, about eight inches wide. It looks much like a corselet in front, fastening with two small bows. In the back it fits the figure, and is trimmed with two rows of buttons, which give it the appearance of fastening by means of the buttons. This corselet sash is high in favor with French couturieres.—Philadelphia Times.

YELLOW IS TO PREVAIL.

Yellow is a favorite color this season. Notwithstanding that it is the hue of jealousy, of decadent literature, of biliousness and other unpleasantnesses, the American woman has decided that she will wear yellow this winter. You may see yellow velvets, silks, cloths and other fabrics in the store windows, and inside on the counters you may find many, many more. The merchant scents the fancy of his customers afar off, and by the time my lady has quite made up her mind that she wants some certain thing, there it is in the stores ready to her hand.

CONGRESS OF MOTHERS.

A National congress of mothers, to consider all subjects relating to the home, especially those which bear upon the moral, mental and physical training of children, will be held in Washington in February, 1897. Headquarters have been established at No. 1400 New Hampshire avenue, in that city, for the reception of communications in regard to the congress.—New York Post.

POPULAR SCIENCE.

It is usually considered that an adult should drink about three pints of liquid a day.

Bricks of glass are now manufactured in Silesia. They are cheap and more durable than mud bricks.

The bones of aged persons having more lime in them than those of young people, are, therefore, more brittle.

Chicago University has just received a gift of property worth \$500,000 to be used for a new biological station.

Cold boiled water tastes flat, because it has been deprived of air. To restore air pour the water quickly from one jug to another.

A strong solution of washing soda (sodium carbonate) in hot water will be found to be excellent as a cleansing agent for dirty lamps.

A Baltimore man has invented a device for locating sunken wrecks. It is a bell buoy, which launches itself as the ship goes down and remains anchored to it.

The synapta, a water insect, is provided with an anchor, the exact shape of the anchor used by ships. By means of this peculiar device the insect holds itself firmly in any desired spot.

Russia has a submarine boat, driven by electricity, that can make ten knots an hour. It is nineteen feet long, weighs a ton, and the machinery is so simple that one man can manage it without special training. It does not sink more than seven feet and can stay two hours under water.

Professor Villard, of the Ecole Normale in Paris, has succeeded in making the newly discovered and obdurate gas, argon, combine with water; it required a pressure of 200 atmospheres to coerce it into this combination. The compound is colorless and crystallizes very prettily when kept cool.

A new source of vanadium compounds has been found on the South American Andes. On one of the high plateaus a mine of anthracite has been located, which, when burned, leaves an ash containing vanadium and silver. The vanadium is now being extracted for use in making amine black and coloring porcelain.

An Odd Search for Gold.

Frank Dixon, the taxidermist of Walnut street, who left this city three weeks ago to hunt for gold in Colorado, which he thought he could locate from gold dust which he found on deer's teeth, has written back that he is still on the hunt and in no wise discouraged.

Dixon's hunt for gold, and the way in which he undertook it, would seem to many like a wild goose chase. Dixon was the only taxidermist in this city. Birds and animals came to him from over all the West to be stuffed and mounted. A year ago he received two deer's heads from Colorado to be mounted, and when Dixon skinned them he noticed a yellow substance on the teeth. He examined the teeth closely, in the light and thought he saw a sparkle. He argued this way: "The deer came from Colorado, the land of gold; they browsed on grass that grew where there was so much gold that its dust got on the grass and became incrustated on the deer's teeth; it only remains to find the exact spot where the deer were shot, and there will be found the gold."

Dixon took the teeth to a dentist and he says the incrustation was really a gold deposit. He took them to his friend Schnetter, a goldsmith, and he became as enthusiastic as Dixon. Dixon then wrote to the man who had sent him the deer's heads and found out where the deer were shot, away out beyond Denver in the wilds of Colorado. Schnetter and Dixon started three weeks ago for that place.

A letter received to-day from Dixon states that Schnetter has started back for Kansas City, but Dixon, still full of hope, was about to start on a three-weeks' tour along the south fork of the White River. He had found no trace of gold, but the woods were full of grouse and deer. He had examined the teeth of all the deer shot, and they were all incrustated with the yellow, shining deposit which he was sure was gold.—Kansas City (Mo.) Star.

Why the Cubans Revolt.

Within the Bay of Havana, which is perhaps the finest in the world, not a single pier has been built, so that all the loading and unloading of passengers, freight or cattle is done by small lighters, which row backward and forward between the ships and the shore. The castle which commands the harbor forbids the entrance of any ship without the guidance of a native pilot, and as these men retire from business at sunset, no vessel can enter harbor after that hour, no matter how stormy and windy it is outside. Morro Castle Promontory contains one of the only four lighthouses on the coast, which is more than eighteen hundred miles long, and which is surrounded by dangerous reefs. Yet over \$24,000,000 is wrung annually from the Cuban people to pay their Spanish oppressors. Small wonder they revolt.—Pall Mall Gazette.

A Remarkable Courtship.

A courtship remarkable for its length is that of Abram Maris, aged sixty years, and Miss Sarah B. Williams, aged forty-seven years, and the scene is Damascus, a quaint little Quaker village of Kentucky. Both bride and groom are among the wealthiest members of the Society of Friends in that State, and for forty years met each other on Sunday at the old brick church in their quaint village. The attachment between them began when Miss Williams was a rosy cheeked girl of seventeen, but the only love making was a smile and a minute's conversation at the church door once a week, year in and year out.—Atlanta Constitution.

ONE WOMAN'S CASE.

A Common Malady and a Remarkable Cure.

From the Herald, Boston, Mass.

When a great, popular remedy rises to such remarkable success as to be a worthy theme of comment in a whole section it may fairly be treated as a matter of news rather than mere business, because it is in a sense a public benefactor. In view of this fact a lady reporter was deputed to investigate personally the remarkable tonic and curative effects which Dr. Williams' Pink Pills had shown, particularly in cases of nervous weakness and general debility, numerous instances of its efficacy in this class having been noted, especially in the vicinity of Boston.

A typical case was readily found in the experience of Mrs. Mary A. Conway, living on Erie street, Dorchester, Mass., who had been, according to her own testimony, suffering for a long time with physical and nervous weakness, accompanied by palpitation of the heart and irregularity of functions.

"It is true," she said, "that I have met with a remarkable restoration through the use of Dr. Williams' Pink Pills. For some time I was completely run down, and the care of a family was a great strain upon me. My lips were white and my heart palpitated so severely that I could not go up and down stairs without great distress. My digestion, too, was weak, and I can truly say that I was suffering from a general lack of vitality.

"I took Pink Pills with misgivings, but after taking only a small quantity I was greatly surprised to find that they were all and more than they had been described to be.

"From the very first time of taking the pills I began to notice their beneficial effect, and I found myself gradually and rapidly becoming stronger. My physical weakness had seemed to have fastened upon me, my white lips were restored to their normal tinge, I regulated color in my face, and as for the heart trouble I may say that it has completely vanished, and I can now go up and down stairs without any palpitation whatever. Heretofore I had black specks before my eyes and a tendency to dizziness, but now my head is clear and my vision is unimpaired.

"I shall continue to use the Pink Pills," said Mrs. Conway, "and to recommend them to my friends. I have found them to do good to me, and I find that they are not only a relief to me of the particular trouble which I had, but acted as a general tonic for my whole system. It seems to me that the more they are known the more they will come into general use, for people have been so often deceived as to remedies that claim to cure everything that they are glad to find one that does exactly what is claimed for it."

Inquiries of physicians and apothecaries in this section also indicate that such cases as that of Mrs. Conway are proving to be the prototypes of many others.

Dr. Williams' Pink Pills for Pale People are now given to the public as an unflinching blood builder and nerve restorer, curing all forms of weakness arising from a watery condition of the blood or shattered nerves. The pills are sold by all dealers, or will be sent post paid on receipt of price, 50 cents a box, or six boxes for \$2.50 (they are never sold in bulk or by the 100) by addressing Dr. Williams' Med. Co., Schenectady, N. Y.

PROFITABLE PIGS.

Knowing that many a fine litter of pigs is ruined by careless management of the feeder, I take this opportunity to call attention to a few important facts. First, it is necessary to keep the sows in good thrift before the pigs come. This insures good, stout, healthy pigs to begin with. Many are afraid they will get the sow too fat. There is little danger of this, although it is best to feed her milk, bran, shorts and the like, rather than too much corn. Plenty of good bone and flesh-forming food is what is needed, always allowing her to have plenty of exercise in open field.

When the pigs are farrowed feed the sow sparingly of such food as milk, bran, shorts, etc., for the first four or five days, then gradually increase the feed until you give her all she can eat and will eat clean three times per day. If the sow has a large litter they will get sufficient milk to keep them doing their best. After they are about ten days old place a trough where the pigs can run through the fence and eat by themselves. Feed them sweet milk at first, with a little wheat shorts in it. A little later on, feed also a little corn, but principally feed them on bone and muscle-forming food. Give them all they will eat.

When they are six weeks old decrease the feed of the sow gradually, so her milk flow will gradually decrease. When the pigs are eight weeks old wean them off. Give them all they will eat and allow them plenty of fresh clover grass if possible and they will make hogs that you will never be ashamed to place on any market, and they will pay you for doing your work well. It don't pay to half-way do anything. If anything will pay at all it will pay to do it well. Whatsoever your hand findeth to do, do it with your might, with all the care and judgment you can possibly bestow.—Ohio Farmer.

DON'T BUILD TOO SMALL A SILO.

"That is what too many farmers do. I had to tear down my first silo," writes J. D. Brennan, of Columbus, Ga., "and build one of double its capacity. The new silo is made of 2x4 studs thirty-two feet long, standing two feet apart on a circular base of concrete and covered inside and out with lumber one-half inch thick. This makes a circular building thirty-two feet high, with double walls having a two-inch space between, which was filled with mortar made of lime and sand. The silo cost less than \$100, although it has a capacity of 150 tons. I plant southern white corn in drills four feet apart, and eight inches in drill. Cowpea vines make the best ensilage; cut as soon as pods begin to turn yellow."

Hamburg has become the chief port of Europe.

The labor unions of Great Britain favor the proposed permanent tribunal of arbitration.

Physicians are now saying that it seems wonderful no plagues visited this country during the intense heat of last August.

Eighty-three new postoffices were opened in Mississippi during the last fiscal year. This was the largest individual gain during the year in any State.

The largest mammoth tusk yet discovered was sixteen feet in length.

It is better to be able to suffer long and be kind than to be able to talk like an angel.

Don't Tobacco Spit and Smoke Your Life Away.

If you want to quit tobacco using easily and forever, regain lost manhood, be made well, strong, magnetic, full of new life and vigor, take No-To-Bac, the wonder-worker that makes weak men strong. Many gain ten pounds in ten days. Over 400,000 cured. Buy No-To-Bac from your own druggist. Under absolute guarantee to cure. Book and sample free. Address: Sterling Remedy Co., Chicago or New York.

When bilious or constive, eat a Cascaret, candy cathartic, cure guaranteed, 25c, 25c.

The slothful man can never find that sweetness in bread which God puts in for the diligent man.

Do you wish to know how to have no steam, and not half the usual work on wash-day? Ask your grocer for a bar of *Doobins' Electric Soap*, and the directions will tell you how. Be sure to get no imitation. There are lots of them.

As much bitterness and hats can be expressed in a word as can be fired out of a gun.

Just try a 10c box of Cascarets, the finest liver and bowel regulator ever made.

There will be no revival when people can see clear across the house that the preacher isn't expecting much.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

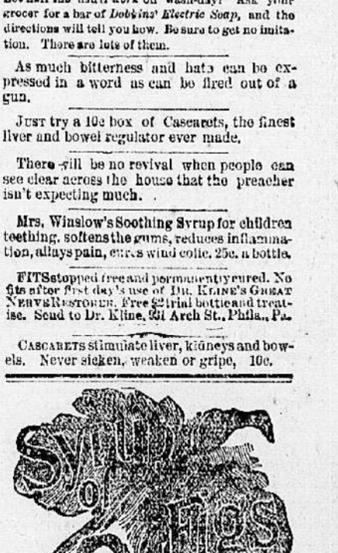

FITSTOPPED (read and permanently cured). No other first day's use of Dr. ELMER'S GUMMUT NEURALGIC REMEDY. Free 25c trial bottle and treatise. Send to Dr. Kline, 531 Arch St., Phila., Pa.

CASCARETS stimulate liver, kidneys and bowels. Never sicken, weaken or gripe, 10c.

Gladness Comes

With a better understanding of the transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness, without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only, and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, then laxatives or other remedies are not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, then one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

Cotton.

With careful rotation of crops and liberal fertilizations, cotton lands will improve. The application of a proper fertilizer containing sufficient Potash often makes the difference between a profitable crop and failure. Use fertilizers containing not less than 3 to 4% Actual Potash.

Kainit is a complete specific against "Rust."

All about Potash—the results of its use by actual experiment on the best farms in the United States—is told in a little book which we publish and will gladly mail free to any farmer in America who will write for it.

HYSTERICIS.

WHY SHOULD UNDERSTAND THIS NERVOUS DERANGEMENT.

ptom of Something Far More Serious. Mrs. Barris, of Beaver Springs, Mo., Her Experience.

aspirant at top of wind-pipe, or in the chest, the "ball" rising in the throat, violent beating of the heart; ringing and crying by turns; muscled spasms; throbbing arms about the neck; a feeling of malevolence.

female patient may be hysterical, which is recognized as a nervous derangement.

The patient is in a state of nervous derangement.

DR. PINKHAM'S VEGETABLE COMPOUND.

It acts at once upon the organs of the stomach and the nerve centers; relieves the cause, and dispels effectually all the symptoms.

Mrs. Barris relates her experience with the benefit of others.

Had been sick with ulceration of the stomach, causing all kinds of distressing experiences, such as irritability, sleeplessness, faintness, and at times hysterics. My physician said it was the worst case he ever had. My husband, leucorrhoea very profuse, had a severe bearing-down pain. My physician thought I should never recover, and as the last remedy, they gave me your Vegetable Compound. It not taken more than one-fourth of a bottle, before I was more comfortable. I continued its use, also the Pure Wash, and Liver Pills. After four bottles, I was able to do almost all my work. I had taken the Vegetable Compound in the medicine that will cure female ailments, and it will reach the worst in a very short time. I know it is my life.—Mrs. M. BARRIS, Beaver Springs, Pennsylvania. All druggists.
