**Welsh Boys Give the Game to the Ladies by Score of 6 to 8.**

The long looked for game between the Welsh White Sox and the Bloomer Girls is a thing of the past, with the score slightly in favor of the ladies. It is needless to say that the attendance was large, in fact everybody that could make any excuse for getting off from duty was at the park even before time Friday afternoon to witness this much talked of game.

The game was not what might be called a scientific game, there being good playing and bad errors on both sides, with a final score of 6 to 8 in favor of the girls. There are many reasons advanced to account for the defeat of the White Sox, not any of which are entirely satisfactory to us, however. Knowing that the Welsh team has and can put up a far better game than the one played Friday, the only and natural conclusion to come to in order to account for their defeat is, that being naive southerners and gentlemen, withal, their inherited gallantry would not permit them taking the game from the Ladies.

As an evidence that the White Sox can play ball, and good ball at that we refer to the fact that they have played ten games this season so far, have only lost two, one of these being the complementary game to the Ladies Friday, while two of the games were won from the Lake Charles Gaints, who are fondly hoping to secure a place in an interstate league in the near future.

**As we Appear to the Educated Mexican.**

The following is a part of a clipping recently translated from the El Pais, the organ of the Catholic Church of Mexico:  
 "And yet, the United States is very far from being the first nation in the world. Germany and England are stronger from the military point of view; France richer, Japan better prepared for war, and Russia has, perhaps a greater fund of reserve strength. The armies of some European nations—Germany, France, Russia, etc.—consist of hundreds of thousands of men, and, in the event of a conflict, of millions; the English and Japanese fleets are in conditions of great superiority over the Yankee fleet, and, in spite of the fabulous legend of American gold, any persons of medium enlightenment knows that the great accumulations of that metal exist in the banks of France and England."
