NEWS PER WIRELESS

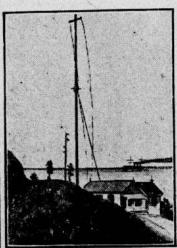

Unique Journalistic Enterprise on Santa Catalina Island.

System Has Worked Well in Most Adverse Circumstances and Is Capable of Almost Unlimited Expansion.

The island of Santa Catalina is a part of Los Angeles county, southern California, lying about 20 miles off shore, parallel with the mainland. rincipal settlement or town is at Avalon, on the southeast, where one of the quaintest hamlets of the coast has grown up, having a summer population of 6,000 or more and a rapidly growing one in winter. The locality has much to recommend it—an almost perfect climate the year around, and sports and pastimes which have given a world-wide reputation.

There has been one drawback to Santa Catalina, and that was the lack of telegraphic communication. summer there are from two to three boats daily; but in winter only one, the steamer arriving at noon. For 24 hours the island was virtually without communication with the mainland. To remedy this, the Banning company, who own the island, established a pi-geon route. Large flocks of these birds were trained, and telegrams or im portant news were sent in this manner with success, the birds taking a message from Avalon to Los Angeles, a distance of 55 miles, in about an hour The pigeon houses were so arranged that when a bird arrived with a mes sage it rang an electric alarm in the receiver's home or office, thus calling

him up. But there was an element of uncerainty in this. Sportsmen who did not know that the birds were tame shot them en route. Others died of over-exertion. In the main the service was satisfactory, but so many prominent men visited the island that the need of adequate means of communication became more and more urgent. Finally Gen. A. L. New, vice president of the Pacific Wireless Telegraph company,

entific American.

The nearest mainland point is at San Pedro, about 30 miles distant, and from the time the office opened for business to date, about 6,000 messages have been sent without a single error or a mo-ment's delay. The plat has been subjected to some severe tests. During the last of March a terrific storm of wind and rain very nearly cut off boat communication with the island; yet

the London Times is experimenting with "marconigraphs," endeavoring to test the accuracy of the system, the Pacific Wireless Telegraph company has been for several weeks in business, supplying Santa Catalina through a daily paper, the Wireless, with all its news. The Wireless is a small newspaper containing the condensed news of the day—a perfect busy man's pa-per. The Avalon Wireless publishes every morning the news of Santa Catalina, the latest catches of great game fishes on the Isle of Summer, as well as the telegraphic news of the world, sent across the channel during the

Hot Bullet in His Heart.

The surgeons at Leipzig hospital have been treating a young man who brought to them with a bullet in his heart. The bullet, however caused no bleeding, and did not in however jure the heart in a vital part, for Then dangerous symptoms appeared and an examination with Rontger rays showed that the bullet was tossed about inside the heart like a ball bouncing off the sides of a After six months, however room. After six months, however, the flesh of the heart, and once set tient's condition rapidly improved for the better. The young man has now left the hospital, and the doctors believe that the bullet in his heart will give him no further trouble.

The Elephant's Burden

GEN. HARRISON'S HOME.

The Old Structure, Also Intended for a Fort, Still Stands in the City of Vincennes, Ind.

The old house in Vincennes, Ind., where William Henry Harrison lived is perhaps the best preserved relic of the earlier years of Indiana's history, says the Indianapolis News. Following the destruction of the first post, or Fort Sackville, it was decided to build a permanent fort, which might be used as a home for the governor. Just when it was erected is in doubt. Some say it was built by William Henry Harrison, who was governor of the terri-tory from 1801 to 1813, while others say it was built some years before.

The house is standing to-day and is 150 feet from the banks of the Wabash

THE HARRISON HOUSE. (One of the Many Historic Spots in the City of Vincennes, 1nd.)

river, with which its basement is connected by a large, brick-lined tunnel. The house is good for years to come. The walls are two feet thick, of handmolded brick and show little sign of deterioration. The shutters, up to a year or so ago, were the ones first hung. They were of hard-shaved oak slats, rigidly fixed in the solid frames and were half an inch thick.

Bullet marks on them, as well as in the frames themselves, are said to be due to skulking Indians. The floors were of hand-planed oak, and are as good as the day they were laid, having grown rough and worn in places. The wainscoting is of hand-planed oak, walnut and poplar-all of the finest clear lumber, and on which the plane marks are yet visible. The rafters and joists are of hard wood, beach and maple—adzed smooth on two sides, but heavy enough for bridge timbers. The roof has been replaced, but was, up to a few years ago, of hand-split oak clapboards, half an inch in thickness.

The frames of the doors were all of oak and walnut, and plain, but very solid and substantial. The nails and screws in this historic structure, as well as the door locks and window catches, are all hand-forged, and heavy enough for a battleship. It is in the basement that the mysteries of the house multiply, for it is divided into many dark rooms by massive brick walls, and in one corner was the powder magazine, oval covered and with a massive door, yet creaking on rusty hinges. Another compartment had a few grated windows near the outside windows, and is said to have been a prison in which minor offenders and runaway slaves were imprisoned.

In another corner is a door opening into a tunnel, which leads away toward the Wahash river under whose wa ters it at one time terminated. This is said to have been so arranged that Indians, in case of a siege, could not cut off the fort's water supply.

QUEER HOLLOW TREE

Cavity Was Caused by a Bolt of Lightning, According to Veracious Old Residents.

A unique tree on Long Island is in diameter at the base. It is nearly

THE HOLLOW TREE, (Strange Cavity Does Not Seem to Interfere with Its Life.)

the bottom. A hollow in it is about one and one-half feet wide at the bottom and runs up to the height of about 26 feet, where it is only about one-half a foot wide. Seventeen or eighteen feet up, on the opposite side, there is a small aperture just large enough for a man to stick his fist through and to make it possible for a person standing within the hollow to see the sky.

The ends of the bark around the hol low are very rough and there is a white substance which covers the tree on the inside. Many persons would sup-pose this tree was dead. In the sum mer it is just as much alive as any of the trees, though it is not so thickly covered with leaves. It has very few limbs, and they are thin and crooked. None of them are below the the vicinity say that a bolt of light ning caused the cavity.

The Ills of Women Act upon the Nerves like a Firebrand.

The relation of woman's nerves and generative organs is not close; consequently nine tenths of the nervous prostration, nerved despondency, "the blues," sleeplessness, and nervous irritability women arise from some derangement of the organism which make the a woman. Herein we prove conclusively that Lydia E. Pinkhan Vegetable Compound will quickly relieve all this trouble.

Details of a Severe Case Cured in Eau Claire, Wis.

"DEAR MRS. PINKHAM: —I have been ailing from female trouble the past five years. About a month ago I was taken with nervous protion, accompanied at certain times before menstruation with fearful baches. I read one of your books, and finding many testimonials of the baches. I read one of your books, and finding many testimonials of the baches. I read one of your books, and finding many testimonials of the baches. I read one of Lydia E. Pinkham's Vegetable Compound, on ficial effects of Lydia E. Pinkham's Vegetable Compound, as few bottles I feel like a new woman, aches and pains all gone.

"I am recommending your medicine to many of my friends, and I would be not many of my friends.

"I am recommending your medicine to many of my friends, and I would be not many of my friends."

Nothing will relieve this distressing condition a surely as Lydia E. Pinkham's Vegetable Compound; I soothes, strengthens, heals and tones up the delication of the surely acres of the surely down feeling, beginning that the surely down feeling, beginning, and is invaluable during the change of life, a of which may help to cause nervous prostration. of which may help to cause nervous prostration.

Read what Mrs. Day says:

"DEAR MRS. PINEHAM: — I will write you a few lines to let you know the benefit I have received from taking your remedies. I suffered for all time with nervous prostration, backache, sick headache, painful means ation, pain in the stomach after eating, and constipation. I often thought would lose my mind. I began to take Lydia E. Pinkham's Vegetal would lose my mind. I began to take Lydia E. Pinkham's Vegetal highly. It does all that it is recommended to do, and more.

"I hope that every one who suffers as I did will give Lydia E. Pink remedies a trial." — Mrs. Marie Day, Eleanora, Pa. (March 25, 1901.)

Free Medical Advice to Women

Mrs. Pinkham invites all women to write to for advice. You need not be afraid to tell her things you could not explain to the doctor-your ter will be seen only by women and is absolutely fidential. Mrs. Pinkham's vast experience with stroubles enables her to tell you just what is best in you, and she will charge you nothing for her add

Another Case of Nervous Prostration Cure

"Delen Mrs. Pineham: — Allow me to express to you the benefit Inderived from taking Lydia E. Pinkham's Vegetable Compound. It started to take it I was on the verge of nervous prostration. On the sleep nights, and I suffered dreadfully from indigeston and headed heard of Lydia E. Pinkham's wonderful medicine, and began its us, immediately restored my health.

"I can heartily recommend it to all suffering women."—Mrs. E. DETERINS, 25½ Lapidge St., San Francisco, Cal. (May 21, 1901.)

CHARTS HER FIGURE.

the Beauty Hunt of the Modern

Society Woman.

An anthropometric chart is a nec essary possession for the young woman who is striving for classic proportions in her figure. The womwho does not number such chart among her possessions is quit times, says the Chicago Inter Ocean.

The height, the breadth, the depth, the girth of the anatomy, each must come in for a share of attention. Calipers, a breadth stick, a height stick, and a steel tape measure are

In making inventories of one's inches, it is necessary to take each measurement with the body in the same position and in the same way.

The following are founded on the Height, 5 feet 5 classic ideal: Height, 5 reet 5 inches; weight, 138 pounds; waist, 27 inches; bust, 34 inches; arm, at the shoulder, 13 inches; wrist, 6 inches; ankle, 8 inches; calf of leg. 141/2 inches; thigh, 25 inches.

The arms extended should measure the height from the tips of the third fingers. The hand in length should measure one-tenth of the height.

The length from the elbow to the middle finger should be the same as from the elbow to the middle of the

From the top of the head to the The height of the head should be

just four times the length of the From temple to temple the meas-rements should equal the length of

the face. The stretch of the thumb and sec-The afreten of thumbs and first fla-ers should exactly circle the throat. Measured by heads, the eight parts

which make the height of the classic figure divide up in this fashion: Height, one head from crown of head to bottom of chin to breastbone one-half head from top to bottom of breastbone to the middle of abdomen; one head from the middle of abdomen to beginning of lower limbs; one head from beginning of lower limbs to middle of thighs; onehalf head from middle of thigh to top of knee; one-half head from top of knee to bottom of knee; one and one-half heads from bottom of knee to small of ankle; one-half head from small of ankle to soles of feet.

Two Ways of Serving Eggs. Here are two good ways of serv ing eggs. For creamed eggs, boil four or five eggs hard, cut them lengthwise and pour over them a white sauce made of one pint of milk. one tablespoonful of flour and one tablespoonful of butter. For baked creamed eggs, poach six eggs. put them on a deep platter, grate over them a little cheese and cover with a white sauce made of one pint of milk, two tablespoonfuls of butter and two tablespeonfuls of flour. Bake for five minutes in a quick oven.

To make a cheap and excellent fur-niture polish take one ounce of white pint of turpentine, two ounces of beeswax, half a pint of soft water. Dissolve the white wax and soap into fine shavings, in the water on the stove and dissolve the beeswax in the turpentine. When nearly cold mix these ingredients together and

the polish will be meady for use.

Among the many tablets found in Chaldea is what has been termed "the oldest dressmaker's bill." It dates from 2800 B. C. and is an item ized list of garments given by the king to the priests and priestesses of one of the temples.

WIRELESS TELEGRAPH STATION. (It Supplies the Island of Santa Cataline with News.) suggested the installment of a wireless

telegraphic plant. A point was selected north of Avalon bay on the conspicuous headland that culminates in Sugar Loaf rock and is reached by a wellbuilt stage road. Here the mast was erected and the office built, the latter being connected with a main office on Ocean avenue, Avaion. The instruments used, notably the receiver, were designed by Mr. Swenson, says the Sci-

the messages were sent across the channel with directness and precision.
