

CALOMEL MAKES YOU SICK! CLEAN LIVER AND BOWELS MY WAY

Once! Try "Dodson's Liver Tone" When Bilious, Constipated, Headachy—Don't Lose a Day's Work.

Back up your sluggish liver! Feel cheerful; make your work a pleasure; be vigorous and full of ambition. But take no nasty, dangerous medicine, because it makes you sick and you may lose a day's work. Calomel is mercury or quicksilver, which causes necrosis of the bones, and crashes into sour bile like a landslide, breaking it up. That's why you feel that awful nausea and vomiting.

Light Out. Parthenia Director—What would you suggest as a suitable pose for this year's representation of woman's authority, her triumphal entry into the spheres which were once exclusively man's? It must be something that will represent labor and courageous attempt to overcome difficulties. It must also be something in keeping with the spirit of the university.

HOW WONDERFULLY RESINOL SOOTHES ITCHING SKINS!

If you have eczema, ringworm or other itching, burning, sleep-destroying skin-eruption, try Resinol Ointment and Resinol Soap and see how quickly the itching stops and the trouble disappears. Resinol Ointment is also an excellent household remedy for dandruff, sores, burns, wounds, chafings and for a score of other uses where a soothing, healing application is needed.

Resinol contains nothing of a harsh or injurious nature and can be used freely even on the most irritated surface. Every druggist sells Resinol Ointment and Resinol Soap.—Adv.

Don't Neglect Kidneys

Swamp-Root, Dr. Kilmer's Prescription, Overcomes Kidney Trouble

It is now conceded by physicians that the kidneys should have more attention as they control the other organs to a remarkable degree and do a tremendous amount of work in removing the poisons and waste matter from the system by filtering the blood.

The kidneys should receive some assistance when needed. We take less exercise, drink less water and often eat more rich, heavy food, thereby forcing the kidneys to do more work than their nature intended. Evidence of kidney trouble, such as lame back, annoying bladder troubles, smarting or burning, brickdust or sediment, sallow complexion, rheumatism, maybe weak or irregular heart action, warns you that your kidneys require help immediately to avoid more serious trouble.

An ideal herbal compound that has had most remarkable success as a kidney and bladder remedy is Dr. Kilmer's Swamp-Root. There is nothing else like it. It is Dr. Kilmer's prescription used in private practice and it is sure to benefit you. Get a bottle from your druggist.

However, if you wish first to test this great preparation, send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Magic Washing Stick

This is something new to housewives—something they have wanted all their lives. It is absolutely harmless to the skin, and it does the heaviest, hardest washing in less than one-half the time it took by old methods, and it eliminates all rubbing and muscular effort. No washing machine is needed. Nothing but this simple little preparation, which is absolutely harmless to the skin—white, colored or woolen. It makes the hardest task of the week a pleasant pastime—a delightful occupation. You will be delighted at the clean, spotless, snow-white clothes that come out of the rinsing water; and all without any work on your part. The Magic Washing Stick does it—and remember, without injury to the most delicate goods, colored or white, woolens, linens, lace curtains, etc. Contains no acids, no alkalis, no poisonous ingredients to make its use dangerous. 25 washings 25 cents.

Sold at all Druggists and Grocers everywhere. If yours doesn't handle it, show him this ad—he'll get it for you. Or send 25c in stamps to A. B. SCHUBERT CO., Sherman Texas.

WHO IS WHO NOW

BEN JOHNSON AND MANDY

Representative Johnson of Kentucky, tall of figure and solemn of countenance, furnished amusement for a lot of people in the Union station at Washington recently. He stood by the big gate where most of the passengers were coming from a train, and every few moments remarked, in a tone of authority, to nobody in particular: "Right this way, Mandy; I'll take care of you."

Now, there wasn't anybody named Mandy there, you understand, and everybody wondered why a congressman should be standing there saying over and over again: "Right this way, Mandy; I'll take care of you."

What sense was there to a man doing such a thing as that? After he had said it many times, Johnson went away, but in a couple of hours he was back again, repeating the same line, with the same calm dignity as before.

People were puzzled. Yet it was all simple enough. The Johnsons had sent to Kentucky for a cook, cleft Mandy. They knew her name, but that was all; they didn't even know for sure which train would bring her. But, according to reports, she was a wonderful cook who could play culinary selections on a gas stove just by ear, producing southern dishes of rare quality and fragrance. She was too good a cook to lose, and she was not accustomed to finding street addresses in strange cities.

And that was the reason why the dignified Congressman went to all the trains and cried out, every time he saw an able-bodied colored woman: "Right this way, Mandy; I'll take care of you!"

RUCKER COURTED TROUBLE

When Representative Rucker of Missouri the other day asked the house to authorize the secretary of war to donate to the city of Trenton, in Grundy county, Missouri, four iron cannon there were many smiles in the chamber.

The humor of the situation later was explained.

Last session a member of the New York delegation introduced a similar bill. It was passed and in due time the cannon were delivered. Subsequently the house was asked to approve a claim bill of \$1,000 filed by a railroad company which had shipped the field pieces. When the freight charges were presented to the citizens of the town they balked and informed the representative that Uncle Sam could "keep his old cannon." The railroad is still demanding pay for totting the war relics.

Every so often Representative Igoe of St. Louis is asked to obtain cannon for the Fairground park, on North Grand avenue. Invariably Mr. Igoe has answered that he will get the cannon if anyone will guarantee to pay the freight. Thus far no one has come forward with the pledge.

MILENA, MILKMAID QUEEN

The fall of Cetinje will grieve no one more than Milena, the beautiful queen of Montenegro, who came straight from being a milkmaid to rule her brave people.

It is in this small but beloved capital that she has lived since marriage, nursing her children and at the same time showing her mother love upon all her subjects, with whom she lives in closest touch.

A little more than fifty years ago she was little Milena Constantinovitch, peacefully and contentedly working upon her father's farm amidst the hills and valleys of the Black mountains. Her chief care then was looking after the cows, and early morning saw her emerge from the house, pail in hand, on the way to milk the cows. In those simple days she never dreamed that she would be called upon to wear a crown.

In the strict sense of the word her marriage was not a "love affair." That is, there was no falling in love at first sight, or anything so romantic. But in accordance with the custom of her country she was called from her farm work to be the bride of young Nicholas Petrovitch, the heir to the throne, because she was the loveliest child to do the heaviest, hardest washing in less than one-half the time it took by old methods, and it eliminates all rubbing and muscular effort. No washing machine is needed. Nothing but this simple little preparation, which is absolutely harmless to the skin—white, colored or woolen. It makes the hardest task of the week a pleasant pastime—a delightful occupation. You will be delighted at the clean, spotless, snow-white clothes that come out of the rinsing water; and all without any work on your part. The Magic Washing Stick does it—and remember, without injury to the most delicate goods, colored or white, woolens, linens, lace curtains, etc. Contains no acids, no alkalis, no poisonous ingredients to make its use dangerous. 25 washings 25 cents.

DR. FREDERICK G. COTTRELL

According to Charles D. Walcott, secretary of the Smithsonian institution, and vice president of the Research corporation of New York, the Research corporation, in the three years of its life, has earned something more than \$160,000. The rate of its earnings is on the increase.

Behind this bare statement is a remarkable story of self-sacrifice and devotion to the common weal. It is the story of Dr. Frederick Gardner Cottrell of California, whose fame among scientists is great, but who is almost unknown to the general public.

To put it briefly, Doctor Cottrell is the inventor and patentee of an electrical process to precipitate the solid matter in smoke. In many parts of the country it has revolutionized the smelter industry; it is moving to a point where it will make smoke-ridden cities free of coal dust and dirt.

But when the commercial success of the invention had been assured, Doctor Cottrell assigned his patent rights to the Smithsonian institution, with the sole proviso that the earnings should be devoted to the advancement of science. The Research corporation was organized in 1912 to handle and administer the fund.

Thus, due to the unselfishness of a brilliant young chemist, whose whole life has been the overcoming of heart-breaking handicaps, who had to undergo years of drudgery in order to obtain money with which to carry on his experiments, a great endowment has been established to make easier the path of scientists who come after him.

American canned salmon is favorably known throughout the entire world. The exports of it amounted to \$7,000,000 a year. Forty-four families who perform no useful service in this country have a yearly income equal to 100,000 wage earners at an average of \$500. German army surgeons have to have gold for many jobs of jaw patching. Among the articles being melted down for the material are old wedding rings, English coins and even fillings from the teeth.

By reason of the lack of fast colors, gray has become very fashionable in England, and the large quantities of dark brown colors on hand before the war are responsible for the present vogue of browns there. Scarlets, pinks and blues are very scarce. "The Island of Black Cats" is a name applied to Chatham island in the Pacific ocean, about 730 miles west of the coast of Ecuador. It is overrun with black cats; indeed, cats of no other color are seen there. These animals live in the crevices of the lava foundation near the coast, and subsist by catching fish and crabs.

Efficiency

Efficiency built the Panama Canal, after inefficiency failed. The efficiency of the Panama Canal doubled the effectiveness of the U. S. Navy without adding a ship to it. It took over 8,000 miles out of the trip from New York to San Francisco and changed the highway between London and Australia from Suez to Panama. Efficiency insures against lost motion—it produces the utmost service out of equipment and yields the finest product, at the least cost.

Certain-teed Roofing is an efficiency product

Every advantage that men, money and machinery can offer is used to increase the production, maintain the quality and lower the cost. Each of the General's enormous mills is advantageously located to serve the ends of efficient manufacture and quick distribution. Each is equipped with the most up-to-date machinery. Raw materials are purchased in enormous quantities and far ahead of the needs of manufacturing, thus guarding against increased cost due to idle machinery. This also insures favorable buying, and the pick of the market.

Expert chemists at each mill are employed to select and blend the asphalt, and every roll of CERTAIN-TEED is made under their watchful care.

CERTAIN-TEED resists the drying-out process so destructive to ordinary roofing, because the felt is thoroughly saturated with a blend of soft asphalt, prepared under the formula of the General's board of expert chemists. It is then coated with a blend of harder asphalt, which keeps the inner saturation soft. This makes a roofing more pliable, and more impervious to the elements than the harder, drier kind.

CERTAIN-TEED is made in rolls; also in slate-surfaced shingles. There is a type of CERTAIN-TEED for every kind of building, with flat or pitched roofs, from the largest sky-scraper to the smallest residence or out-building.

CERTAIN-TEED is guaranteed for 5, 10 or 15 years, according to ply (1, 2 or 3). Experience proves that it lasts longer.
