

## YOUNG GIRL FINDS RELIEF

Wants to Tell Other Girls All About It

Evansville, Ind.—"I am eighteen years old and have been bothered for several months with irregular periods. Every month my back would ache and I would feel drowsy and I would have a cold and I would feel very nervous. I had seen Lydia E. Pinkham's Vegetable Compound advertised and had heard several women talk of it, so mother got me some. This Vegetable Compound is wonderful and it helped me very much, so that during my periods I am not now sick or drowsy. I have told many girls about your medicine and would be glad to help anyone who is troubled with similar ailments. You may use my testimonial as you like."—STELLA LINXWILER, 6 Second St., Evansville, Indiana.

Some girls lead lives of luxury, while others toil for their livelihood, but all are subject to the same physical laws and suffer in proportion to their violation. When such symptoms develop as irregularities, headaches, backaches, bearing-down sensations, and "the blues," girls should profit by Miss Linxwiler's experience and give Lydia E. Pinkham's Vegetable Compound a trial.

The surest way to get rich is to keep up business and keep down expenses.

Fresh, sweet, white, dainty clothes for baby, if you use Red Cross Ball Blue. Never streaks or injures them. All good grocers sell it, 5c a package.

Designation.  
"Would you regard a man who raises his own grain and makes his own liquor a legitimate agriculturist?"  
"No," replied Farmer Cottosel.  
"He's what I'd call a jagriculturist."

## HOW DOCTORS TREAT COLDS AND THE FLU

First Step in Treatment Is a Brisk Purgative With Calotabs, the Purified and Refined Calomel Tablets that are Nausealess, Safe and Sure.

Doctors have found by experience that no medicine for colds and influenza can be depended upon for full effectiveness until the liver is made thoroughly active. That is why the first step in the treatment is the new, nausealess calomel tablets called Calotabs, which are free from the sickening and weakening effects of the old style calomel. Doctors also point out the fact that an active liver may go a long way towards preventing influenza and is one of the most important factors in enabling the patient to successfully withstand an attack and ward off pneumonia.

One Calotab on the tongue at bed time with a swallow of water—that's all. No salts, no nausea nor the slightest interference with your eating, pleasure or work. Next morning your cold has vanished, your liver is active, your system is purified, and you are feeling fine, with a hearty appetite for breakfast. Druggists sell Calotabs only in original sealed packages, price thirty-five cents. Your money will be cheerfully refunded if you do not find them delightful.—(Adv.)

## QUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

## GOLD MEDAL MARLEN OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Famous since 1896. Take regularly and keep in good health. In three sizes, all druggists. Guaranteed as represented. Look for the name Gold Medal on every box and accept no imitation.

## PLANT ROSES! Vestal Roses

Excel in form, vitality and loveliness. A yard of these exquisite roses makes a fairland about the home. For years we have made a specialty of roses—Vestal's have a national reputation. Plant anytime. Safe delivery guaranteed.

Send for Our Spring Guide! Gives valuable information and lists hundreds of roses, plants, fruits and berries. It's free—write for it today.

# Rich Forsake Fifth Avenue

Tradesmen Steadily Break Exclusiveness of Noted Residence District of New York.

## MRS. VANDERBILT LEADS WAY

New Exclusive District Expected to Spring Up in Section Where Near-Slums Existed Before—Long Fight for District.

New York.—Stentily but steady advances by tradesmen, covering a period of more than twenty years, have virtually broken the residential exclusiveness of Fifth Avenue, known the world over as the home precinct of the Vanderbilts, Carnegies, Harrimans, Plants, Fricks and other wealthy families.

One by one mansions which housed international personages and gave to Fifth Avenue much of its glitter and fame are surrendering to commercial enterprise, and the rich are seeking homes in new "exclusive" parts of the city. Real estate men, who have watched with interest this aggression of trade, say that another decade will have wiped out the last bit of residential exclusiveness in the avenue.

Mrs. Vanderbilt Moves.  
The change in Fifth Avenue was reflected in the recent purchase of property bordering the East river at Fifty-eighth street by Mrs. William K. Vanderbilt, Sr., where she intends to build a home in a section known as Sutton square. This bit of property is directly across from Blackwell's Island, where a city prison is located, and is almost underneath the Manhattan approach to the Queensborough bridge. Real estate men expect that Mrs. Vanderbilt's migration to the East river will mean a new exclusive district in a part of the city where near-slums existed before.

Mrs. Vanderbilt, who a few years back belped to make Fifth Avenue history with her brilliant social activities, said when she purchased the East river property that Fifth Avenue had "lost its residential atmosphere, which

was its most valuable charm." Traffic and crowds, resulting from the trade invasion, she said, had taken away its exclusiveness.

Wage Fight for District.  
The fight to "save" Fifth Avenue has been waged since the late nineties, when real estate men began to get opinions on property near the magnificent mansions. Members of the Vanderbilt family and others owning homes there expended millions of dollars in buying up property in an effort to stem the tide.

Much of this property was purchased at exorbitant figures, and after a lapse of years has fallen back for business. Hotels, banking houses, jewelry stores, millinery and fine tailoring establishments have gradually crept northward along the thoroughfare.

The home which Mrs. Vanderbilt is forsaking at Fifth Avenue and Fifty-

second street will become the site of a trust company. Its sale was made possible as the result of the death of Mr. Vanderbilt in Paris, when the house, owned by his estate, was sold to the highest bidder. The first actual break in the Vanderbilt holdings came when Gen. Cornelius Vanderbilt leased his home at Fifth Avenue and Fifty-fourth street to a shoe firm.

The residence of the late Henry C. Frick, steel magnate, will eventually go to the city for use as a museum.

Miners Earn \$5,000 a Year.  
Cardiff, Wales.—Some coal miners of South Wales are being paid as high as \$5,000 a year, while wages amounting to \$3,500 and \$4,000 are fairly common. Despite this, the government is having difficulty in collecting income taxes from the miners. Last year nearly 15,000 of them were summoned for non-payment, but only 12 of this number were committed to prison.

Dentist Sent Airplane After Patient.  
Little Sioux, Ia.—Insisting that William Peterson, farmer, should have dental work done immediately, a dentist of Omaha, Neb., sent an airplane after him to save time for his busy farmer.

## "Ocean of Air" Needs Watching

Navigation Lanes May Differ From Day to Day, Says Government Meteorologist.

DATA MUST BE GATHERED  
Meteorologists Should Decide, After Study of Air Conditions, What Route and Altitude a Plane Should Take.

Washington, D. C.—The "ocean of air" which follows of aviation believe some day will be filled with great air liners, plying their way on regular schedules, must be studied from a meteorological standpoint and the whims and fancies of the element must be reduced to easily understood data before the dream of world-wide commercial aviation can become a reality, according to C. Lettoy Meisinger, government meteorologist here.

Mr. Meisinger in a paper discussing the effect of air conditions on commercial aviation says that meteorology is the mainstay of aviation, regardless of the confidence a pilot may have in his motor and in his plane.

The "ocean of air," he says, constantly is changing and does not contain steadfast currents, such as the Gulf stream and the Japan current, which are found in oceans of water.

Must Gather Data.  
"Because of the constantly changing condition of the aerial routes through which the air liners of the future would travel Mr. Meisinger declares before big commercial aviation companies can operate on a large scale, great masses of data on air conditions at all times of the year, in all places and all circumstances must be gathered. He suggests placing consulting meteorologists on the staffs of all aviation companies to study the air as it affects aviation and to decide daily what altitude and what route a plane should take from one city to another.

Air conditions are so changeable, Mr. Meisinger says, that a plane traveling between the same two points might have to take a different route almost every day in order to make the trip with the least danger. Also, a plane flying from New York to Chicago might find a certain route the best, while one traveling from Chicago to New York on the same day might find an entirely different route more favorable.

Things to Consider.  
Some of the things which airplane dispatchers will have to consider, he says, are the speed and direction of the wind in the area to be traversed, the frequency of low clouds and fog, the frequency and intensity of thunderstorms, the vertical temperature distribution, the normal values of precipitation at flying fields and the effect of atmospheric pressure on aerial instruments, particularly the altimeter.

The changing conditions in the air make it impossible to gather the necessary information in a single path-finding flight over an area, he continues, but by gathering data in numerous flights at all times of the year and in all circumstances a system of averages could be devised which would aid greatly in dispatching planes.

landings, but according to the signed reports from the eighty-seven companies, in the 3,130,550 miles flown, not a single life was lost. There were 222 forced landings and thirty-eight accidents. There have been fatal accidents in other instances, but they occurred in the course of stunt or exhibition performances or under circumstances indicating that undue risk had been taken.

## WHERE FROGS ARE CHICKENS

Tariff Laws of the United States Say They Are Same and Alike "in Three Counts."

To one not versed in tariff law, or familiar with the devious and tortuous channels of reasoning followed only by customs legal luminaries, some of the decisions at first appear to be rather odd. Frogs have become chickens for tariff purposes, venison has been held to be beef and live snails have solemnly been decided to be nonenumerated unmanufactured articles, remarks the San Francisco Chronicle.

Reason begins to totter on its throne and completely tumbles off when one learns that a firebrick weighing under five pounds, Reason, however, can pick up its scepter and climb back to its easy chair with a sigh of relief after reading a wonderful paragraph in the law known as the similitude clause. If an article is not provided for, either by name or material, and has one of four characteristics of an article that is provided for, it takes the same rate of duty. If the homeless article resembles any other article either in material, quality, texture or in use to which it may be applied it becomes that article for tariff purposes. Frog meat is similar to the white meat of chicken in three counts, venison scores on one for the reason that both venison and beef are eaten and firebricks weighing under five pounds are used in exactly the same manner as those weighing over five pounds.

IRELAND UNDER ALIEN RULE  
Power of the Danes Broken by Brian Boru in 1014—Normans Became Amalgamated.

About 800 A. D., the pagan hosts of the Northmen and Danes fell on Ireland with fierce destruction. After a century of destruction, Irish kings led their people in a succession of wars for the deliverance of their country, and Brian Borama, or Brian Boru (926-1014), King of Munster, by his great victory in the battle of Clontarf, on April 23, 1014, finally broke the power of the Danes in Ireland. In 1171 Ireland was invaded by the Normans from England, in the time of Henry II, and its conquest began. "In Ireland," to quote the words of Prof. Edward A. Freeman (1823-1892) "the Norman was more purely a conqueror than anywhere else, but in Ireland his power of adaptation caused him to sink in a way in which he sank nowhere else. While some of the Norman settlers in Ireland went to swell the mass of the English of the Pale, others threw in their lot with the native Irish, and became, in the well-known saying, "more Irish than the Irish themselves."—Detroit News.

Religion of Good Citizenship.  
"In China there existed in the past, and there are evidences that it is coming to life again, the religion of good citizenship," says a writer in Asia Magazine. "That is to say, the Chinese theory is that a man does not need to feel the need of physical force to protect himself; he has seldom the need even to call in and use the physical force of the policeman—of the state—to protect him. A man in China is supposed to be protected by the sense of justice of his neighbor; he is protected by the readiness of his fellowmen to obey the sense of moral obligation. The ideal of Chinese civilization, therefore, is that a man can not feel the need of using physical force to protect himself because he is sure that right and justice is recognized by all his neighbors as a force higher than physical force, and that moral obligation as recognized by everybody is something that must be obeyed."

Ground Must Be Hellow.  
In Lassen county, California, is a spot called Dry lake, which is in reality almost an arid plain, with some alkali scattered here and there over it, and its area is two and a half by four miles. On one side are the Pit River mountains and on another are big pine woods, while to the west are the famous lava beds, in which the Indians hid during that last great California struggle with the savages. A winding road leads up from the valley below into the curious basin.

If a horse walks on this road anywhere, even two or three miles outside the border of the Dry lake, he can be heard for many miles up in the interior. The ground all about there sends forth a hollow sound. Reverberations can be heard everywhere. A footfall may be heard like a sound in a great cavern.

God's Best Medicine.  
"Mirth is God's medicine," says a noted writer. "Everybody ought to bathe in it. Grim care, moroseness, anxiety, all the rust of life, ought to be scoured off by the oil of mirth. It is better than emery. Every man ought to rub himself with it. A man without mirth is like a wagon without springs, but a man who laughs and causes others to laugh, even though the days are dark and the causes for laughter are few, is like a chariot with springs in which one may ride over the rough roads and feel nothing but a pleasant motion."

The Model.  
"I don't understand," said Mrs. Mullins. "I remember very well that you used to point out your Dick as a model husband. Yet now you contend that he is lazy."  
"Well," said Mrs. Boggs, "he's a model right enough—only he isn't a working model."

May Be So.  
"The fortune teller assured me that I would marry and live happy ever after."  
"Well, you may marry; but she's just guessing at the rest of it."—Louisville Courier-Journal.

On a Yellow Sheet.  
"Maud's husband is the makeup man on a newspaper."  
"I suppose his work is to make up those sensational stories they print. What a fascinating job!"—Boston Transcript.

Blind in Eternal Triangle  
Husband, Wife and Alleged Affinity, Sightless All—Men in Battle Royal.

Atlanta, Ga.—That love is blind has just been proved in police court here when a blind man, his blind wife, and her alleged affinity, blind also, were arraigned for trial following a battle royal between the two men, after the husband had come home unexpectedly.

Martin Stone, the husband, told the recorder that while peddling religious tracts in the streets a friend had warned him that a rival was paying court to his wife and that he had better go home.

On his arrival there he said he found Sam Stewart enjoying a chat with the wife. The fight started. Most of the furniture in the room was wrecked, but the combatants suffered less injury, due to their inability to get at each other properly.

"One day in a dark cell in the police station for Stewart," said the judge.

Hooch Blamed for Theft.  
San Antonio, Tex.—"Too much hooch!" said Judge Buckley as he levied a \$50 fine on George Harrison for having stolen a forty-two-year-old monkey from a carnival show and then disturbing residents near the show grounds by ringing their door bells and trying to sell the monkey.
