The Most Noticeable Change.
"So you have lived in Europe for 25 years. That's a long time for a man to be away from his own country."
"Yes, it is, and I'm mighty glad to be home again."
"I suppose you notice a great many changes?"
"Yes, many."
"What, if I may ask, is the greatest change that has come to your notice?"
"The greatest change, it seems to me, is to be found in the fact that the vice-president of the United States succeeds in getting his name in the papers nearly as often as he might if he were a baseball player or a promising lightweight prizefighter."

Old Oaken Bucket.
"Doctor (to typhoid patient)—Do you remember where you drank water?"
"Patient (an actor)—Oh, yes! It was back on the dear old farm—twenty years ago!"—Puck.

No Hurry.
"What are you in such a rush about?"
"Promised to meet my wife at three o'clock down at the corner."
"Well, there's no hurry. It isn't four o'clock yet."

NEED MONEY FOR GOOD WORK

Plans of the National Association for the Study and Prevention of Tuberculosis.

What a Million for Tuberculosis from Red Cross Seals will do in providing some of the 275,000 beds needed at once in the United States for consumptives, is explained in a recent bulletin of the National Association for the Study and Prevention of Tuberculosis. There is just about one bed for every ten indigent consumptives, and if all tuberculosis persons in the country are counted, both rich and poor, hardly one for every 25 or 30. If sufficient hospital accommodations are provided only for those who are too poor to pay the full price for their treatment, fully 275,000 more beds in special institutions for tuberculosis would be needed at once. The immense outlay necessary to provide and maintain so many beds in hospitals, make it imperative, the National Association for the Study and Prevention of Tuberculosis declares, that such institutions be erected from public money, either municipal, county or state. In order to get appropriations for public hospitals for tuberculosis, agitation is necessary, and in order to create a campaign of agitation, organization is demanded. But in order that an organization may carry on an effective campaign, funds are needed.

These funds it is proposed to secure in as many communities as possible from the sale of Red Cross seals.

HARDY.

Mr. Heavyweight—Well, Willie, why do you look so studious?

Willie—I was wonderin' if you ever married yer, if I could be able to wear yer cast-off clothes.

The Spots Disappeared.
Mrs. Dolan lived in a district which was not as favorable for the outdoor household experiments recommended by the Ladies' Helper as it might have been. This fact Mrs. Dolan was rapidly assimilating, and in a manner not so uncommon as it might be she blamed the estimable periodical for her difficulties.

"I wish I had a hole o' that woman that runs the 'Handy Hints' department," she remarked to her husband one morning after an early excursion into the back yard, whence she returned in high dudgeon.

"I thought you 'ought she was a grand wan," said Mr. Dolan, cautiously testing his cup of tea.

"Well, I've changed me mind, as I've the rights to do," replied his wife. "She said to put sody on him stains in the tablecloth, and I've it out overnight on the line, an' they'd be gone entirely with morning come. Sure 'tis the tablecloth that's gone—the de-savay woman that she is!"—Youth's Companion.

Completely Pauperized.
Albert W. Hebbard, New York's charity expert, said at a recent dinner:

"The great danger of charity is its pauperizing effect. This effect must be avoided, or the recipients will all become Jack Hanches.

"Jack Hanch, on the score of bad health never worked, and the pastor of the Methodist church, a man whose heart sometimes outran his head, sent the idler and his family weekly gifts of food and clothing—supported the whole crew, in fact.

"A church visitor, after listening to Jack's complaints one day, said:

"Yes, of course, you have had bad health, we know that; but one thing at least you ought to be thankful for, and that is our pastor's kindness in sending you all this bread and meat and jelly and blankets and so on. Don't you think it is good of him to look after you so well?"

"Good of him?" said Jack, impatiently. "Why, what's he for?"

Wrong Guess.
It was exhibition day at No. 3, and as the parents of Jack Grady, the dullest pupil, were listening hopefully, the teacher tried her best to help the boy. "How did Charles I. of England die?" she asked, assigning the easiest question on her list to Jack. As he looked at her, with no indication of a coming answer, the teacher put her hand up to her neck. Jack saw the movement and understood its meaning, as he thought, "Charles I. of England died of cholera," he announced briskly.—Youth's Companion.

An Exacting Personage.
"I suppose you find life easier since the summer boarders have gone?"

"None," replied Farmer Corntassel; "we're workin' an' worryin' just as much as ever tryin' to keep the hired man contented."

Fixing Productiveness.
Great productiveness in our hens is a trait which can be easily fixed by breeding. The principles governing our breeding are the same as those which apply to all other classes of animal breeding; it is only the application that differs. With the fancier it is chiefly feathers, with the farmer it is eggs; both can be developed to perfection by the same principles of proper selection and breeding.

Uses the Ax.
A very prominent poultry man says he never has any disease among his poultry because he made it a practice to keep a good sharp ax always ready and by killing and burning any bird showing symptoms of any other than a simple trouble, and by maintaining strict cleanliness in and around the poultry quarters, he has stamped out disease.

Care During Hot Period.
During hot weather so that your poultry are not neglected. It is so easy to put things off till the weather gets cooler that the chickens are apt to suffer for lack of attention.

HEN'S NEST FOR EGG EATERS

Excellent Method Is to Place Light Swinging Doors in Front of Nest as Illustrated.

A good plan to prevent hens from eating their own eggs is shown in the illustration. Light doors are hung in the front of each nest. These swinging doors are attached to a rod which is supported in the front row of nests by hooks. This is to enable the owner to remove the doors so as to assist in cleaning. It is said that the hens like

Nests for Egg Eater.

these nests after becoming accustomed to them, and that the device is a sure cure for egg eaters.

Egg eating by fowls sometimes becomes a serious vice. Chickens become fond of eggs after they have learned to eat them and the habit often spreads among a flock. It usually begins through accident by eggs being broken or frozen. Be careful to see that this does not happen. See that the nests are supplied properly with straw or other nesting material, and have them darkened so that if an egg is broken accidentally the fowls will not be likely to discover it. Try plenty of lime in the form of oyster shells, bone or similar substances to insure a firm shell.

TO START FIRST INCUBATOR

Directions Followed Closely Will Result in More Chicks—Selection of Fresh Eggs Essential.

(By BESSIE L. PUTNAM)
It is ready to work at any and all seasons; the oil to run it costs less than the food for hens doing the same amount of work; there is no trouble from vermin; broilers can be produced early without interrupting biddy when laying her highest priced eggs; the care of the incubator is less work than that of the hens to do its work, especially during the inclement season, and is more agreeable. These are some of the arguments in favor of the incubator.

On the other hand, a reliable hen will produce fewer cripples, and perhaps have better success if the eggs happen to not be perfectly fresh; yet on this point science is making rapid strides.

While it should not be necessary to sit up nights with the incubator, neither is it wise to treat it like a clock—to be wound up once a day and left to itself for the remainder of the time.

A cellar is apt to be damp and lack ventilation. A chamber makes too much running up and down stairs. If possible have it in a room adjoining the one where the work is done.

Good results come, if the kitchen is large enough, by placing the machine in one corner. Many successful poultry women give it a place in the living-room, and even the parlor may be used, as there is nothing unsightly or untidy about the work save the day or two during the hatching process.

Before buying, secure catalogues from several reliable dealers, study carefully the claims of the manufacturers and your own requirements.

Avoid the cheapest machine of any make. As a rule it is so small that it is difficult to secure uniformity of temperature in the egg chamber.

The nursery, an important adjunct, is usually lacking in the smallest machines. If one of the largest size is chosen it will be found cumbersome; it requires too long time for filling if your own eggs are used; if the hatch happens to be a poor one your loss is that much greater.

A machine of about 100-egg capacity is large enough for the beginner, contains all essential conveniences, and one can later increase the capacity if success attends the humbler effort.

Study both directions and machine thoroughly before starting the incubator. Have it on a firm level foundation and remember that good ventilation and avoidance of drafts are as necessary to the chick in embryo as to the human being.

The experienced hand always runs an incubator a day or two before filling, to make sure that the parts are working properly. The novice with a new machine should not feel it time lost to wait until three days after she has learned to control the heat at or about the required notch. The germs are especially sensitive during the first few days, and undue heating will ruin the entire hatch.

The fresher the eggs the larger the percentage of chicks. Never use those over two weeks old, and two days is much better.

SPEECHLESS FOR THANKS

Arkansas Lady Cannot Say Enough In Praise of Cardui, Which Did Her a World of Good.

Mena, Ark.—"I find Cardui to be all you represent," writes Mrs. H. B. York, of this city. "I suffered for nearly two years, before I tried your remedy. I have been so relieved since taking Cardui. I cannot say enough in its praise. It has done me a world of good, and I recommend Cardui to all women."

Similar letters come to us every day, from all over the country, telling the same story of benefit obtained from Cardui, the woman's tonic.

This great remedy is over 50 years old, and is more in demand today than ever. Cardui has stood the test of time. It is the standard, tonic medicine, for women of every age.

The first thought, in female ailments, would you like to be well and strong again? Then take Cardui. It can't possibly harm you, and its record indicates that it ought to help you. Have you poor health? Cardui has assisted thousands of women to glowing good health.

Do you lack strength? Cardui is a strength-building tonic for women.

Over a million women have benefited by its use. Can you think of any good reason why you should not try it?

Ask your druggist. He knows.

\$100 Reward, \$100.
The readers of this paper will be pleased to learn that there is at least one cure for that severe headache known as neuralgia, and that is Cardui. Many cures have been made known to the medical fraternity. Cardui is a constitutional disease, requires a constitutional treatment. Halls' Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the formation of the disease, and curing the patient the nature of doing its work. The proprietors have no such faith in the curative powers that they offer the Hundred Dollar Reward for any case that it fails to cure. Send for a bottle of Cardui. Address: J. C. NATURAL ACT FOR MOTHER

Women Understand That Not Heroism but Simply Love Prompted Self Sacrifice.

A few days ago, in a somewhat sparsely populated neighborhood, a house caught fire. The flames shot quickly through the litter on the floor and the untidy array of clothing on the walls. A woman, talking with a neighbor, ran screaming to the house and without an instant's hesitation sprang through the smoking doorway into what already seemed an inferno. A moment later she staggered out, her hands and face blackened and blistered and her clothing on fire. In her arms she bore her baby, safe from harm.

The afternoon papers came out with the story, printed under headlines extolling this mother's heroism. Men read it on street cars, and as their eyes gleamed with the stirring of the spirit which leaps to great noble deeds they said: "That woman dared to do what most men would be afraid to do," but the mothers who read it at home did not think that way. Perhaps the danger to the baby, the winking of the home and the burns the woman suffered brought moisture to their eyes, but to them the act was not one of heroism—it was simply what any natural mother, no matter how timid, would do under the same circumstances.—Cleveland Leader.
