Jungle Food and Jungle Poison.

Those who have travelled much through the damp jungles of India, such as the Terai, cannot have helped noticing the large amount of fungoid growth, both terrestrial and epiphytically, that presents itself, much of which is edible, but requires an intimate acquaintance with botany to determine between the poisonous and unpoisonous. What were not long since considered semi-savage races on the frontier are the best guides the uninitiated, however, can employ to distinguish the two classes. So close is the resemblance that it would be dangerous for the ignorant traveller to trust to his own unaided discrimination, and if the services of a human nomad are not available the fungi should be submitted to the equally unaided judgment of a tame monkey, a thing no traveler should be without. The animal must be very closely watched when sitting in judgment, especial notice being taken of his countenance. If the specimen is poisonous there is a decided look of disgust apparent as the creature throws it from him, but if non-poisonous it is torn into fragments, first smelled, and then transferred to the mouth, in which case one may rest perfectly satisfied that it is edible. Even though "Joeko" may not eat, in no case will our remote connections make a mistake, nor, for that matter, will an elephant, either. A spare elephant or two is also a handy thing to have among your luggage.—Indian Plasters' Journal.

ITEMS OF REAL INTEREST.

Only four members of Alabama's secession convention are now living. They are Senator John T. Morgan, Circuit Judge A. A. Coleman, of Birmingham; W. E. Clark, of Mobile, and John W. Inzer, of St. Clair.

The late General Garcia was a man of studious habits and seldom let a day pass in which he did not find some time to read. He always had a few books with him in the field, one of which was invariably Caesar's Commentaries.

Schnyler Hamilton, Jr., a grandson of Alexander, has filed in New York city a voluntary petition in bankruptcy. He is a mining engineer, and was formerly reputed to be worth \$500,000, but finally lost his money in a brick yard, which he carried on for five years.

There are 367 building and loan associations doing business in the state of New York. A bill is to be introduced shortly in the legislature placing them under the supervision of the state superintendent of banking, in the same manner as the banks now are.

The husband of Mme. Nordica went up in a balloon and was never seen or heard of again. By the law of France, the wife could not touch her husband's property for a period of seven years, and that time Mme. Nordica has had to wait before she came into her fortune.

Glass is now frequently fashioned by machine pressure instead of being molded by blowing. In the pressed glass the articles are either made by hand or machine pressure, and this innovation has done much toward making glass articles much cheaper than formerly.

The Countess Belsch, who died the other day at Jassy, was the last of the old Roumanian nobility. She was a notorious miser, and lived on almost nothing, although after her death no less than 1,650,000 francs in cash was found secreted in the various parts of her house.

Senator Gear, of Iowa, has an odd habit of always carrying his hat with him, even when moving about the senate chamber. It is an old-fashioned black felt head-covering. If a visitor sends in a card the Iowa always carries his hat out when going to see what is wanted.

Faneuil Hall has fallen into such a dilapidated condition that a guard has been stationed on the second floor of the building to warn visitors away from the weak spots in the flooring and to keep them from leaning against the rotten posts that support the gallery. The building is soon to be reconstructed.

When Joseph Chamberlain's son, J. Austen Chamberlain, was first elected to parliament, an old servant of the family accosted him with tears of congratulation in his eyes: "This is a great day, sir," he said. "When I think that I helped to put your grandmother and grandfather in their coffins, it makes me proud of you this day."

About Smokeless Powder.

One of the secrets of the ordnance department of the government is in regard to smokeless powder, the various receipts for its manufacture, and the most effective ways of using it. For it must be known that there are various kinds of smokeless powder, each possessing its own superiority for developing pressure of velocity. One kind of smokeless powder comes in yellow strips about ten inches long. It has no smell and looks as innocent as so much brown paper. This kind is best for the six-pounders. Then there is a kind that comes in small white grains, like so much rice. There is also smokeless powder in small, perforated disks, yellow or brown, and finally, there is a kind known as cordite, in reddish-brown strings, some of them about a foot long, like shoelaces. This is used chiefly in the one-pounders.

All kinds of smokeless powder are loaded into shells and put into the guns like revolver cartridges, but at present smokeless powder is used only in guns having a calibre of six inches or less. It is probable, however, that in the future it will be used in guns of all sizes, its advantages in action being very great.

Although smokeless powder costs more per pound than ordinary brown powder, it is not really more expensive, since its efficiency is so much greater. In an 8-inch gun, for instance, there is required for one discharge, from 112 to 125 pounds of brown powder, but the same pressure and velocity will be imparted to the 250 pound projectile by only sixty pounds of smokeless powder. And in the matter of safety the smokeless powder seems to have advantages over the ordinary kind. The only question still to be solved, and the recent war points to a favorable solution, is whether smokeless powder will keep all its good qualities and effectiveness in the face of sudden changes from heat to cold, or vice versa.

Chinese Parties.

When a Chinaman gives a grand party he sends three invitations to each guest—one two days before the event, another on the day itself, and the third just before the hour has struck, to signify how impatient he is for his visitors to arrive.

MRS. PINKHAM'S ADVICE.

What Mrs. Nell Hurst has to Say About It.

DEAR MRS. PINKHAM:—When I wrote to you I had not been well for five years; had doctored all the time but got no better. I had womb trouble very bad. My womb pressed backward, causing piles. I was in such misery I could scarcely walk across the floor. Menstruation was irregular and too profuse, was also troubled with leucorrhoea. I had given up all hopes of getting well; everybody thought I had consumption. After taking five bottles of Lydia E. Pinkham's Vegetable Compound, I felt very much better and was able to do nearly all my own work. I continued the use of your medicine, and feel that I owe my recovery to you. I cannot thank you enough for your advice and your wonderful medicine. Any one doubting my statement may write to me and I will gladly answer all inquiries.—Mrs. NELL HURST, Deep water, Mo.

Letters like the foregoing, constantly being received, contribute not a little to the satisfaction felt by Mrs. Pinkham that her medicine and counsel are assisting women to bear their heavy burdens.

Mrs. Pinkham's address is Lynn Mass. All suffering women are invited to write to her for advice, which will be given without charge. It is an experienced woman's advice to women.

Strange Bust of Christ Found.

Recently the discovery in Madrid of a bust of Christ has created quite a sensation in the world of art. Collectors and dealers are puzzled to know where this masterpiece of workmanship came from, and how long it has been hidden under the dust of centuries. The bust was recently purchased by the Russian ambassador to Spain. Several experts who have examined it pronounce it to be the work of Angelo, or of Argelo, or entirely different is it from the work of modern artists. The eyes are wrought of blue rock crystal, which makes the bust strangely unique in appearance. Queen Victoria has manifested deep interest in the discovery, and has recently taken steps toward having the bust copied into marble.

IVORY SOAP PASTE.

In fifteen minutes' time, with only a cake of Ivory Soap and water, you can make in your own kitchen, a better cleansing paste than you can buy.

Ivory Soap Paste will take spots from clothing; and will clean carpets, rugs, kid gloves, slippers, patent, enamel, russet leather and canvas shoes, leather belts, painted wood-work and furniture. The special value of Ivory Soap in this form arises from the fact that it can be used with a damp sponge or cloth to cleanse many articles that cannot be washed because they will not stand the free application of water.

DIRECTIONS FOR MAKING.—To one pint of boiling water add one and one-half ounces of Ivory Soap cut into shavings, boil five minutes after the soap is thoroughly dissolved. Remove from the fire, and cool in convenient dishes (not tin). It will keep well in an air-tight glass jar.

The following testimonials prove all we say to be true, and the genuineness of the cure are vouched for by the Atlanta Constitution and Herald and by the paper in which this advertisement appears.

Terrible Deadly Cancer and Ulcer Cured by B. B. B. Cancer is the worst form of blood disease. Cancer can only be cured by a powerful Blood Remedy, like B. B. B. The following cure is only one of 50 recent testimonials.

"I had cancer or ulcer—the most eminent physicians pronounced it a cancer. My father, a fine physician, did not relieve my sufferings. He had two brothers, both very fine physicians; neither could relieve me. After untold sufferings with no relief, using eight or nine doctors, some tried sending me a bottle of B. B. B. After taking the first bottle I felt entirely easy, and it has been only recently that I have had permanent relief, so many times I have been exhausted and collapsed from weakness. I have got a great many people to take B. B. B. A lady living near me had an

EATING CANCER. The bones in her nose or upper part of her mouth were eaten away. She could eat nothing but strained soup; was cured entirely well by using B. B. B. when she was given up to die by three doctors.

"John V. Trammell, living near Lafayette, Ala., a friend of the Confederate army, one leg shot off, one arm cut off, eye eaten out by cancer, taken B. B. B. for his cancer, and he says it is a very wonderful and collect for years in Chambers county. He is just as well and as lively as he can be."

"B. B. B. healed my whole body, gave me energy, cured my low spirits, and, I think, saved me from a cancer, or, at least, B. B. B. is the best blood purifier in the whole world."—Mrs. M. I. ADAMS.

SEVERE RHEUMATIC PAINS. Also Pains in Head and Ears. B. B. B. Cures Sore and Well.

Rheumatism is due to Bad Blood. Drive the bad blood out and thus cure Rheumatism.

"My father was in his 70th year, and he was attacked with severe rheumatic pains running all through his body. Also pains running through his head and ears. He suffered for about a year, trying many remedies without success. Finally some one told him to try this B. B. B. which he did. Nine bottles cured him sound and well, and his attacks never returned. My mother is now in her 80th year. She takes three B's, and seems to be very healthy."—ANDREW HADAWAY.
