Electric Bitters
Succeed when everything else fails. In nervous prostration and female weaknesses they are the supreme remedy, as thousands have testified.
FOR KIDNEY, LIVER AND STOMACH TROUBLE
It is the best medicine ever sold over a druggist's counter.

Condensed Facts About Halley's Comet.

By H. W. Griggs in Scientific American.

A few facts presented in a condensed form may possibly interest the readers of the Scientific American who wish to follow the course of Halley's comet in the heavens during its present appearance.

The last perihelion passage occurred on November 15th, 1835. The present perihelion passage will occur on April 20th, 1910. The perihelion distance will be 0.578, and the aphelion distance will be 35.30. The eccentricity is 0.967, the longitude of ascending node is 57 deg. 16 min., the node and apsis angle is 111 deg. 47 min., the inclination of the orbit is (162 deg. 12 min. +) 17 deg. 48 min., the longitude of perihelion 305 deg. + and the motion is retrograde, in other words opposite to that of the planet. The diameter of the nucleus cannot of course be stated with anything like accuracy at the present time, but it is not likely to exceed 120,000 miles.

At the end of February Prof. Barnard of Yerkes Observatory estimated the tail to be 14,000,000 miles long. Just before and after perihelion passage the tail will be at least that long, and probably longer. The comet is fast approaching its perihelion point, or point nearest the sun, where, as we said, it is due to arrive on April 20th. During the months of February and March, the earth and the comet are racing on practically parallel orbits, 170,000,000 miles apart on opposite sides of the sun.

The comet first crossed the earth's orbit about March 10th at a point where the earth will arrive at the middle of next October, but far above where the earth will be, so to speak, for it will be some 10,000,000 miles above the plane of the ecliptic. In April the comet will emerge from behind the sun, and will become visible to the naked eye in the eastern sky before sunrise.

On April 20th, when the comet will swing around the sun, it will be 57,000,000 miles away from the sun. Its velocity will be 26 miles a second. The earth travel at about 19 miles a second. On May 2nd the comet will traverse the orbit of Venus, some 6,000,000 miles above the planet. In other words, an astronomer on Venus would find the comet a far more impressive spectacle than a terrestrial astronomer. As it rushes on, Halley's comet will pass between the earth and sun close to its ascending node. On May 18th the earth will be about 13,000,000 miles away from the nucleus or head, as against 5,000,000 miles in 1835. Moreover, on May 18th the earth will be enveloped in the comet's tail for a few hours. A few days later the comet will be visible in the western sky after sunset with a 15 deg. or 20 deg. splendor. After that it will speed away from the solar system. The last glimpse of it with the naked eye will be obtained probably at the end of June. It will not reappear for seventy-five years.

Halley's comet is noteworthy because it was the first comet for which an orbit was plotted and a time table calculated. It has a history more or less identified with the history of human thought and civilization. The superstitious dread with which it was regarded in medieval and ancient times swayed many a monarch. It was instrumental in forming the policies of Louis le Debonnaire in 837. It blazed in the sky when the Turks threatened to overrun Europe in 1456, and when the Re-

formation was at its height in 1531. It struck terror to the Saxons under Harold in 1066, when they were conquered by William of Normandy. This fear of the middle ages was dispelled only when Halley made his great prediction which was verified after the great astronomer was in his grave.

A comet which has reappeared regularly for over two thousand years must be composed of fairly enduring stuff. Just what its composition may be, the present re-appearance will for the first time enable us to tell, for in 1835 the spectroscope was not invented, nor astronomical photograph perfected.

The Demon Of The Air

is the germ of LaGrippe, that, breathed in, brings suffering to thousands. Its after effects are weakness, nervousness, lack of appetite, enrgy and ambition, with disordered liver and kidneys. The greatest need then is Electric Bitters, the splendid tonic, blood purifier and regulator of Stomach, Liver and Kidneys. Thousands have proved that they wonderfully strengthen the nerves, build up the system and restore health and good spirits after an attack of Grip. If suffering, try them. Only 50c. Perfect satisfaction guaranteed by T. J. Labbe's Drug-store.

HOW TO SOLDER.

Not many farmers know how to solder, and yet it should be as well known as any part of the farm economy. A little knowledge of how to mend articles of tin, stop leaks in pipes of metal, etc., would save many dollars for those who want to economize. It does not require much skill to solder effectively and one can acquire the art with a little practice by carefully observing the following directions:

Before soldering an article the edges should be well washed with a strong solution of soda and water and scraped or filed absolutely clean, as any grease or oily matter will prevent the adhesion of the solder.

Thrust the point of the soldering iron into the fire to become hot, and while it is heating paint the part to be soldered with an acid made in the following manner: Take a quarter of a pound of zinc and put it into a small earthen vessel. Pour over it half a teacupful of muriatic acid. It is best to do this out of doors, as the fumes are rather disagreeable. While the zinc is dissolving add a piece of salammoniac about the size of an egg. When the action of the acid upon the zinc has ceased the liquid will become cool and clear, and may be bottled and kept for any length of time. The "soldering acid," as it is called, can be bought, but it is expensive, and can easily and cheaply be made at home.

The parts being ready and the soldering iron hot, take the latter in your right hand and a piece of solder, which you can get from any tinshop, in your left. Bring both points, (the solder and the soldering iron) in contact with the place to be soldered. The melting solder will be attracted and will flow over the parts painted by the acid.

For large pieces of work, such as tin roofs, rosin is the usual flux, and is rubbed on the parts to be joined, but it is harder to manage, and the acid will be found to be much more satisfactory for mending. Keep your soldering iron always perfectly clean by rubbing it on a piece of salammoniac when you take it from the fire.—Agricultural Epitomist.

For sale—One L. C. Smith Typewriter brand new \$75.00. Laizaire Bienvenu.

ARE YOU CONCERNED?

Some one has one or more of the following books: The Awakening of Helena Ritchie. The Prisoners. The Proud Prince. Corinna. Yolande. At the Mercy of Tiberius. Nedra. The Little Shepherd of Kingdome Come. Red Rock. Goldsmith's Poems. The Marble Faun. Monte Cristo.

The Evangeline Literary Society would thank the holders for their return. Other books, not named here, are missed. Return any in your possession to the library room, at Miss L. Gueriniere's.

Ever read "The Wearers" by Gilbert Parker? The Hon. Peter Sterling, by Paul L. Ford? To Have and To Hold, by Mary Johnston? The Heart's Highway, by Mary E. Wilkins. Standish of Standish. Lew Wallace's Ben Hur, his Prince of India? Mark Twain's. A learn Yankee in King Arthur's Court?

You can get all these and many more just as good by subscribing to The Evangeline Literary Society's library. Only 75 cts for three months. Just called at Miss L. Gueriniere's, hand her 75 cents, choose a book and proceed to read to your heart's content.

A Good Friend In Time of Need.

A Handsome Woman

Every woman may not be handsome, but every woman should keep with care the good points nature has given her. No woman need have sallow skin, dull eye, blotchy complexion, who pays proper attention to her health. Where constipation, liver derangements, blood impurities and other irregularities exist, good complexion, bright eyes and sprightly movements cannot exist. Internal derangements reveal themselves sooner or later on the surface. Headache, dark rings around the eyes, sallow skin, a constant tired feeling—mean that the liver and digestive organs are needing help and correction. Chamberlain's Stomach and Liver Tablets give this necessary help. They work in nature's own way. They do not merely flush the bowels but tone up the liver and stomach to fulfill their proper functions. So mild and gentle do they act that one hardly realizes that they have taken medicine. Chamberlain's Tablets can be relied upon to relieve biliousness, indigestion, constipation and dizziness. Sold everywhere. Price 25 cents.

Sheriff's Sale.

Liq. Peoples Bank of Breauz Bridge
vs
Clebert Hollier
No. 10378
