## GOOD ROADS.

We feel that the wind is beginning to blow towards good roads, as you can hear this matter discussed everyday on our streets, we have some very active advocates of good roads, who are willing to tax themselves heavily for good roads, while others are apparently indifferent, but those who are indifferent, do not realize the real situation. All our neighboring towns and parishes are paving their streets and gravelling their public highways. Unless we make an effort to keep our roads in as good condition as our neighbors, we will lose the trade of the country people who will not come to us on our muddy and boggy roads if they can go elsewhere on fine, dry gravel roads.

Think of this matter seriously, as you will soon have to take an active part in this important matter. We feel that the people are realizing the necessity of good permanent roads.

## COLDS NEED ATTENTION

Internal throat and chest troubles produce inflammation, irritation, swelling or soreness and unless checked at once, are likely to lead to serious trouble. Caught in time Dr. Bell's Pine-Tar-Honey loosens the phlegm and destroys the germs which have settled in the throat or nose. It is soothing and healing. Pine is antiseptic; honey is soothing—both together possess excellent medical qualities for fighting cold germs. Insist on Dr. Bell's Pine-Tar-Honey. 25c.

## Prof. Guilbeau Visit the North

Prof. P. L. Guilbeau inspector of the department of agricultural extension for Louisiana, has accepted an invitation to address the American Agricultural Extension Society, of Minnesota, at Minneapolis, and he will also visit Missouri, Iowa and Wisconsin, where he will probably make addresses.

The efforts of Louisiana in this line of agriculture development is attracting the attention of the country.

## Teaching Agriculture.

The demand for properly trained men to teach agriculture in secondary schools is greater than the supply and, from present indications, will continue to increase for some time. Hitherto, comparatively few men have studied agriculture with the deliberate intention of teaching it as a lifework. In consequence, while provision for agricultural education has been greatly developed, the number of teachers is still small.—The Item Farmer.

## A Thought For The Week.

When every farmer in the South shall eat bread from his own field and meat from his own pastures, and disturbed by no creditor, and enslaved by no debt, and orchards and vineyards, and dairies, and barnyards, pitching his crops in his own wisdom, and growing them in independence, making cotton his clean surplus, and selling it in his own time, and his chosen market and not at a master's bidding—getting his pay in cash and not in a receipted mortgage that discharges his debt, but does not restore his freedom—then he shall be breaking the fulness of our day.—Henry W. Grady.
