The Thibodaux Ice Company have had a well sunk on their property where their plant is situated which will furnish good water in abundance for making ice. The well was finished last Monday, and has a depth of two hundred and forty odd feet. It is cased with eight inch iron pipe. At a depth of one hundred and eighty feet the drill used in boring struck a cotton-wood log which, in spite of its old age, proved to be a "tough" proposition. After its long peaceful sleep, we can't blame the old log, when drilled through, for feeling "bored".

age of 6 years and 11 months. It would be difficult to find a sweeter or more promising child than the dear little one who so soon fell a victim to the dreadful fever which is now prevailing among the youthful members of our community.

Though very young in years, little Mabel gave such bright hopes for the future that to give her up must have been a sad trial indeed, and we deeply sympathize with the afflicted father and mother.

But let them remember that her soul was so pure, her love and confidence in the good Savior so great, that she is now free from all harm and suffering, under the tender fold of His love who said:

"Suffer little children to come unto me, for of such is the kingdom of Heaven."
