

Stopped Short of Insanity.

A young woman rescued in the nick of time from a fate more terrible than death. Her friends had despaired of saving her.

On the verge of insanity, Miss Hattie King, of Ithaca, N. Y., was checked in the course that was taking her rapidly to the grave, and restored to her friends in sound physical and mental health and regained happiness.

The change for the better in this charming young woman, not yet eighteen years old, is so great that when she reappeared in public her friends could hardly believe the evidence that their eyes clearly showed them.

Miss King became greatly weakened by a complication of physical troubles, and was locked upon by her friends and family as one doomed to early death.

Her stepfather, Charles M. Burnett, tells of her strange cure as follows:

"Hattie first complained of dizziness, which steadily grew worse.

"She suffered with nausea and attacks of vomiting; could keep but little on her stomach.

"Kidney disease attacked her. She was pale, thin, and her blood, when a drop was drawn by the prick of a needle, was almost as colorless as water.

"Her heart was affected. She would frequently faint from the slight exertion of rising from bed or from a chair.

"She coughed continually, so that her friends feared she was consumptive.

"She lost flesh rapidly; would be confined to her bed for two or three weeks at a time.

"Her mind was affected. At times she

had no realization of what she was doing.

"We feared she would have to be taken to an asylum for treatment.

"The best physicians and many proprietary medicines failed to do her any good.

"We had read of wonderful cures by Dr. Williams' Pink Pills for Pale People, and at length decided to give them a trial.

"We purchased some at the drug store of White & Burdick, in Ithaca.

"Soon after she began taking the pills Hattie began to improve. First her headaches disappeared, then the attacks of dizziness ceased, and the cough likewise disappeared. One after another the alarming symptoms left her.

"She gained steadily in weight and strength. The change for the better in body and mind is almost incredible. In all she has taken nine boxes of Dr. Williams' Pink Pills for Pale People, and now she is in perfect health."

Mr. Burnett swore to the accuracy of his account, formally, before C. R. Wolcott, a Notary Public.

"When the blood is weakened and lacks the elements needed to build up new tissues, body and mind both suffer, as in the case of Miss King. All of the many diseases due to derangements of the blood and nervous system are cured by Dr. Williams' Pink Pills for Pale People. They supply in vegetable form the elements that are lacking, and restore perfect health.

All druggists sell Dr. Williams' Pink Pills for Pale People. One box for 50 cents, or six boxes for \$2.50.

For Our Farmer Readers.

Too much corn meal is not healthy food for young chickens.

The best turkeys for breeding are those that are two years old.

Wheat can be fed to young chickens when they are two weeks old.

Milk may be kept in pans and kept where the fowls can help themselves.

To grow as they should little ducks require almost twice as much food as little chickens.

More or less experience is absolutely necessary to making a success with poultry keeping.

All hens and pullets in good condition and with proper feeding will lay from February to September.

When a fowl or animal is making a rapid growth is the time to aid in order to make the most out of it.

One reason that fowls given a good range are healthier is that they receive food best for digestion, with the necessary grit.

Hens will "steal" their nests in summer and find some secluded location where the ground appears moist. The fact has prompted some farmers to believe that a moist location should be preferred for hens that are incubating. The selection of the nesting place by the hen is not because the ground may be damp, but because she desires a cool location or to get rid of lice in the poultry house. In winter the hen prefers a warm and nest.

The annual per capita consumption of wheat in the old world is four bushels, while in the United States it

is six bushels, at least when times are good and people are at work. When business is dull and many are out of work the consumption of wheat is greatly lessened, there being some times a falling-off of 100,000,000 bushels in the amount of wheat consumed annually by our people. General business activity and prosperity is of very great importance to farmers whose business it is to produce the food supplies for the workers in other lines.

Western corn-fed pork can be recognized even in ham and bacon by its texture and flavor. Swill-fed pork bears its distinguishing marks from pen to pan. Acorn-fed pork is recognizable anywhere and everywhere by the "tang" of the acid meat of the acorns. The pork of the creamery-fed swine would never be mistaken by anyone who has ever made a comparative examination of the pork of swine fed on various foods. The grower must keep these indisputable points in mind when he outlines his practice with his swine.

Extremes are dangerous. One class of farmers do not feed enough for profit, especially after grass is gone, while the other class believes in theory of "the more feed the more product." Both are wrong. An animal may consume more food than it can digest, making the product expensive. Feeding depends upon variety. Too much corn or ground grain in the summer season will cause bowel difficulty, and an excess in winter without the addition of bulky material gives no corresponding benefit, as it is voided. Give the animals a sufficiency, but not exclusively of one kind of food.

Chicks allowed to range at will during July and August when the vegetable and insect life is at its maximum will require but little food. A breakfast of sweet corn, either cooked or raw, is much relished by chicks. Do not throw it in the dirt or grass, but serve on old plates or pans, etc. Keep all drinking vessels clean also. We have had chickens hatched in August and began laying six months afterward, just when eggs were most valuable or high-priced. They were of the Light Brahma variety; but no doubt many other kinds would show as good a record. The inference is that all conditions required to develop mature chicks are found during the midsummer—in weather, food, etc., which is not supplied so lavishly earlier in the season. We consider our late hatched chicks the most economical and profitable of all broods reared during the year.

If you wish to fatten your pork rapidly, do not give great quantities of rich food, grain, etc., at once, but a regular feed of a small quantity until you give what you think they will eat up clean, but as soon as they leave any feed in their troughs you should not feed again until they have finished their breakfast or dinner, as the case may be, when you may give them a rather diminished supply, leaving them sufficiently hun-

gry at meal time to eat with relish what is given to them. Too much feed at the commencement of fattening is as bad for swine as improper food, a stunted growth being the noticeable result in both cases, and any breeder of experience knows that it costs almost as much if not more, to fatten a stunted hog than it is worth. By the middle of September the fattening process should be commenced in good earnest and the work completed before cold weather sets in.

Occasionally a hen would hide her nest in some fence corner and come sneaking in with eight or twelve chicks and raise them all. When the nests are made on the ground, the same number of eggs will produce more chicks than when hatched above the ground, and they will seldom die from disease. Try it and see. As to turkeys, many people keep two hens and one tom, and keep all the eggs until they are through laying, then set the one turkey and a chicken at the same time, leaving the other turkey hen to lay a second time. As a rule the turkey hatches on the ground, the chicken hen in a box elevated from the ground; when hatched they are all given to the turkey, and if any die it will usually be those hatched by the chickens a few feet from the ground. In setting your hens have deep boxes; fill half full of sod, then a little hay or straw to make a nest, and your chicks will be healthy, and you will find that it pays to do the work.

Just now there is much protesting from the feeder buyers that that class of cattle are selling too high. They claim that 4 cents per 100 pounds is about all they can afford to pay delivered at the feed lot. Under ordinary conditions this might be true, but with beef selling now at five cents at the striver and still advancing it would seem that conditions are reaching the point where the present high prices might be justified. However, it is the ultimate price that the fat cattle will bring in the market when finished that governs the quotation. With corn at 25 cents per bushel and feeders at \$4.50 per 100 pounds at the feed lot the finished product will have to sell at \$5.50 per 100 pounds to enable the feeder to come out with a profit. It is probable, however, that feeders will be able to get all the corn they want for 20 cents or less and that fat cattle will bring 6 cents before the winter is over. Under such conditions present prices are high enough and when they go higher there is an element of danger that makes business unsafe.

Farm For Sale.

The A. V. Salisbury farm, containing 150 acres, has been placed in my hands for sale. There are 125 acres in cultivation, and two houses, three barns, one cistern, one living well, a good orchard, a pair of splendid stock scales and six large feeding troughs on the premises for use in fattening cattle. The place is located only one-half mile from Echo, which affords a good market for butter and eggs. Only one-half mile to school-house and 2 1/2 miles to flouring mill. Farm is all under fence. Terms: I will take \$3,000 for the place—\$1,200 down, and the balance in equal annual payments running five years, deferred payments to bear eight per cent annual interest. Call on or address.

F. BION MCCURRY,
Salisbury, Mo.

\$100 Reward \$100.

Some readers of this paper will be pleased to learn that there is a least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and leaving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, Ohio.

Sold by druggists, 75c.

WANTED—SEVERAL TRUSTWORTHY persons in this state to manage our business in their own and near by counties. It is mainly office work conducted at home. Salary straight \$800 a year and expenses definite, bonafide, no more, no less salary. Monthly \$75. References. Enclose self-addressed stamped envelope. Herbert E. Hess, Pres., Dept. M., Chicago.

Paid For His Meal.

When the North Dakota regiment arrived at San Francisco on its way to the Philippine islands they were shown into the spacious dining-room presided over by the Red Cross. It was a good day for the soldier boys. The bill of fare was ample.

And perhaps the soldiers did not enjoy it. A few of them had been overcome by the long trip, but the majority of them were blessed with a good appetite—the soldier's best friend.

One of the privates in particular enjoyed the repast immensely, and when he finished he sat back in his chair and said:

"Gee!"
"Did you get enough to eat?" asked a beautiful society girl at his table, her face beaming with kindness.
"I should say so," said the soldier, rising. "That's the finest meal I've had since we started."

Then he looked at the pretty girl and fumbled in his pocket. Finally he found what he was looking for, and extended his hand with ten cents in it.

"What is that?" asked the society bud, a smile dimpling her pretty face.

"That's for the meal," said the private, somewhat embarrassed at her manner.

"Oh, we don't charge for this," she said. "This luncheon is given by the Red Cross."

"Oh," he stammered, and his embarrassment deepened. "We-ell, you take this, anyhow, and buy some gum or something for yourself."

Ten cents!

Her father is worth a million.
And the soldier's income is only about \$15 a month!

The pretty girl thought for awhile. She knew it would do the young fellow's heart good if she took the money. She would take it.

"But you must let me give you some flowers," she said. And as she pinned a boutonniere on his lapel she dropped a five-dollar gold piece in his pocket.—*San Francisco Examiner.*

Can You Tell Why?

Why can't we gather eggs from egg-plants?

Why is so much beer used at watering places?

Why is a woman always younger than a man born on the same day?

Why does the prettiest girl always have the most watchful chaperon?

Why isn't paying a man what you owe him a good way to get even with him?

Why isn't the manufacturer of fake toilet preparations working a skin game?

Why is a man always shy about making bold assertions when his wife is present?

Why isn't the lover who returns a lock of his sweetheart's hair a hair restorer?

Why isn't a man who takes a paper two years and don't pay for it a dead-beat?

We give no rewards; an offer of this kind is the meaneast of deceptions. Our plan is to give every one a chance to try the merit of Ely's Cream Balm—the original Balm for the cure of Catarrh, Hay Fever and Cold in the Head, by mailing for 10 cents a trial size to test its curative powers. We mail the 50 cent size also and the druggist keeps it. Test it and you are sure to continue the treatment. Relief is immediate and a cure follows. Ely Brothers, 56 Warren street, New York.

THERE IS A CLASS OF PEOPLE

Who are injured by the use of coffee. Recently there has been placed in all the grocery stores a new preparation called GRAIN-O, made of pure grains, that takes the place of coffee. The most delicate stomach receives it without distress, and but few can tell it from coffee. It does not cost over 1-4 as much. Children may drink it with great benefit. 15 and 25 cents per package. Try it. Ask for GRAIN-O.

Freaks of Nature.

"FIVE DOLLARS REWARD. Being in the Museum Business, would like to hear from any freaks of nature or monstrosities, either in the animal or human family, which may exist in this county or anywhere else.

"The above reward of five dollars will be paid to anyone giving us the information regarding the above, which may lead to our making arrangements for the purpose of exhibiting any such curiosity. For further particulars address

NEAL VAN DORNUM, St. Louis, Mo., care of General Delivery P. O."

Go to Agee Bros. for the best canned goods, pickles, spices, candies, etc.

When Ague Shakes You

you can shake the Ague by using AYER'S AGUE CURE. It is the one certain and infallible cure for that debilitating disease. It has been tried in many countries and under various conditions, and has never been known to fail. An old veteran writes:—

"You may be interested to know my experience many years ago with Ayer's Ague Cure. The year before the war I was in Kansas. Some twenty of us were engaged in farming, and suddenly all were taken with fever and ague. We tried almost everything without getting any help, till at last I sent to the city and procured a bottle of Ayer's Ague Cure. I recovered at once. The others followed my example, and they, too, recovered. Every one in camp took the remedy and was cured by it. I went all through the war, have lived in thirteen different states of the Union, and have never had the ague since."

O. B. SMITH, St. Augustine, Fla.

There's only one thing to get for ague:

Get AYER'S Ague Cure.

The Kansas City Times.

Western in Location and Sentiment.

A Daily Paper Devoted Entirely to Western Interests.

READ THIS OFFER TO READERS.

Uncle Sam's new colonies will prove a source of great interest to the American people generally, and particularly with the residents of the great Southwest—the chosen field of the *Kansas City Times*. The war has impressed on nearly every reader the necessity of having a live metropolitan daily newspaper.

The second invasion of the Philippines, Porto Rico and Cuba by the commercial forces of the United States will be attended by many interesting events. Yankee enterprise, with its complement of improved machinery and wide-awake business methods, will effect as startling a revolution as achieved by Yankee sailors and soldiers in the recent campaigns.

The progress of this peaceful army of business men will be chronicled in the columns of the *Kansas City Times*. In addition, there will be congressional elections in all the states of the union this fall.

As an indication of the prevailing sentiment of the country, this contest will be fraught with an unusual interest, and in order to keep up with the moves of the political chess board, Western readers should keep in touch with events daily transpiring. By means of fast mail trains the *Times* is distributed over the greater portion of Missouri, Kansas, Nebraska, Oklahoma, Arkansas and Indian territory.

If you want a live up-to-date paper, printing all the news and uncompromisingly Democratic in the broad Western sense of the word you should send your order without delay for the *Kansas City Times*.
