Carrollton's fly population has decreased a million or more since 3 o'clock Wednesday morning. A stranger came to town, set out two or three big wire traps up on the public square, put some kind of dope underneath it and waited results. In an hour he had caught a gallon of the little pests, and this same process has been going on all day.—Carrollton Democrat.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

A big hay stack on Wm. Taylor's farm was also lost.

One day last week while Will Manion was driving in town he saw an automobile coming and as they always frighten his horse he raised his hand for them to stop or slow up. But they did neither, but dashed by him at full speed, which resulted in Mr. Manion's horse running away and tearing up his buggy. Dolph Spotts saw it and told the man he should have stopped, he replied that he was "from Oklahoma and that he did not stop for any d— team." One should telephone ahead and have such rascals caught and taught that Missouri has laws. However, these men may have been Missouri men—you can't tell where such men are from—they live every where.—Armstrong Herald.

An Old Fish Trap Destroyed.

Emmett C. Higgins and Otto Witt, game wardens, destroyed with dynamite the fish trap on the Chariton river in Macon county Tuesday. It had been in use for many years and was netting its owner from \$2,500 to \$3,000 a year. Ben Clark, the owner of the place, protested that he had purchased the trap along with the farm and that the fishing rights had been handed down for years to the owners of the farm. He declared that he could not be deprived of them by law. There were many farmers waiting around the trap for a supply of fish for which they paid four cents a pound. The fish usually caught in the trap were buffalo, cat, carp and croppy, weighing from one to 50 pounds. Catfish weighing 100 pounds have frequently been caught in the old trap.

The trap was a curious invention consisting of heavy timbers placed midway of the stone dam. Fish coming down stream would float into it. The catch for a day would frequently fill an ordinary farm wagon. It is said that the dam and trap were originally built by the Indians. The owners have cleared more money from the sale of fish than from the products of the farm. Frequent complaints have been made of this method of catching fish, but until Tuesday no action was taken.

The game wardens say that information will be filed against the men who have been operating it.—Macon Republican.

The team started running, and all the traces except one came unhooked. The buggy tongue came down, and as the vehicle was jerked against the horses the tongue stuck into one of the animals, injuring it so badly it had to be killed.

Free Sample Aids Old Men

The sudden change from years of activity of both body and mind to the quiet of later years causes the human system to undergo many changes, chief of which is in the digestive organs.

It becomes harder and harder to get the bowels to move promptly and regularly and in consequence many elderly men suffer not only from the basic trouble, constipation, but from indigestion, headache, belching, sour stomach, drowsiness after eating and similar annoyances. It is first of all necessary to keep the bowels open and then to tone the digestive muscles so as to get them to again do their work naturally. A violent cathartic or purgative is not only unnecessary but harmful, and something mild will do the work just as well.

After you have got through experimenting with salts and pills and waters of various kinds, and have become convinced that they do only temporary good at best, then try Dr. Caldwell's Syrup Pepsin, a mild, gentle, pleasant-tasting laxative tonic that is especially adapted to the requirements of old people, women and children, and yet is effective enough for anybody. Your druggist, who has handled it successfully for a quarter of a century, will sell you a bottle for fifty cents or one dollar, but if you want to make a test of it before spending any money send your name and address to Dr. Caldwell and he will gladly send you a sample bottle free of charge.

This remedy is rapidly displacing all other forms of medication for the cure of stomach, liver and bowel trouble, and families like Mr. O. F. Wisler's of Sycamore, Ill., and Mrs. Carrie Collier's of 325 N. Notre Dame street, South Bend, Ind., are now never without it in the house. They have tested it and know its grand value to every member of the family.

Dr. Caldwell personally will be pleased to give you any medical advice you may desire for yourself or family pertaining to the stomach, liver or bowels absolutely free of charge. Explain your case in a letter and he will reply to you in detail. For the free sample simply send your name and address on a postal card or otherwise. For either request the doctor's address is Dr. W. B. Caldwell, R. 600 Caldwell building, Monticello, Ill.
