

WOMAN'S ILLS DISAPPEARED

Like Magic after taking Lydia E. Pinkham's Vegetable Compound.

North Bangor, N. Y. — "As I have used Lydia E. Pinkham's Vegetable Compound with great benefit I feel it my duty to write and tell you about it. I was ailing from female weakness and had headache and backache nearly all the time. I was later every month than I should have been and so sick that I had to go to bed. "Lydia E. Pinkham's Vegetable Compound has made me well and these troubles have disappeared like magic. I have recommended the Compound to many women who have used it successfully."—Mrs. JAMES J. STACY, R.F.D. No. 3, North Bangor, N. Y.

Another Made Well.
Ann Arbor, Mich. — "Lydia E. Pinkham's Vegetable Compound has done wonders for me. For years I suffered terribly with hemorrhages and had pains so intense that sometimes I would faint away. I had female weakness so bad that I had to doctor all the time and never found relief until I took your remedies to please my husband. I recommend your wonderful medicine to all sufferers as I think it is a blessing for all women."—Mrs. L. E. WYCKOFF, 112 S. Ashley St., Ann Arbor, Mich.

There need be no doubt about the ability of this grand old remedy, made from the roots and herbs of our fields, to remedy woman's diseases. We possess volumes of proof of this fact, enough to convince the most skeptical. Why don't you try it?

Rush For Cattle

The feeders were bidding against the packers in the K. C. market the last week, and some of them paid above 8 cents the pound for stock to be fed short this spring. They figure there is better money in feeding short this spring than to get thin stock and put it on long feed. There is not so much chance for the market to slump in so short a time and the matter of smaller profits but rapid turning over of the stock is a motto in mercantile circles that is finding favor among the cattle feeders. There is a big demand also for cattle and heifers indicating a desire to get more cattle on the farms for permanent residence. B. N. Little of Sumner was one of the buyers last week when he took a load of 36 stockers off the market at a stiff price.

The days of hot chili in this city are numbered for the season. The only place it was served was at Troy Longwell's and he has turned hot chili down for cold ice cream.

Someone had a keg of beer in town last week and there was a considerable talk about it. It seems that those who did not get any of the beer were more hurt about it than those who did. Evidently there were a few here who didn't get their share.

Yes, for mercy sake, let us have the printing of the semi-annual statement or annual statement of the city's finances. It will be a good bit of news matter and will bring us some money as well, as the publication is a "pay" job. Then, it will serve to put quite a few of our citizens at "parade rest."

Land Value Almost Doubled

I H C HEN a Lee county, Illinois, farmer bought a run down 400-acre farm, his neighbors thought he had made a bad bargain. After three years' soil treatment by scientific methods, he raised more than eighty bushels of corn to the acre on land that produced less than thirty bushels the first year he farmed it. It is no longer unusual for us to get reports from farmers who have been using manure spreaders consistently for periods ranging from three to five years, to the effect that their land is regularly raising so much more produce that the value of the land is almost doubled.

I H C Manure Spreaders

are made in various styles and sizes to meet all conditions. The low machines are not too low to be hauled, loaded, through deep mud or snow. I H C spreaders are made with trussed steel frames in wide, medium and narrow styles; all of guaranteed capacity. There are both return and endless aprons. In short, there is an I H C spreader built to meet your conditions and made to spread manure, straw, lime, or ashes as required. I H C spreaders will spread manure evenly on the level, going up hill, or down. The wheel rims are wide and equipped with Z-shaped lugs, which provide ample tractive power. The rear axle is located well under the body and carries most of the load. The apron moves on large rollers. The beater drive is positive, but the chain wears only one side. The I H C dealer will show you the most effective machine for your work. You can get catalogues from him, or, if you prefer, write International Harvester Company of America Quincy Ill.

House Cleaning

The good old job of house cleaning is not what it used to be in mother's day. Then they had to take up the carpets, hang said carpets on the clothes line and give it a beating. Then, the carpet paper was taken up and swept on both sides, the floor swept and scrubbed and then acres of skin on knuckles and knees taken off in stretching the carpet again. That was only one room, there were others. Now, there is one large rug, maybe a few small ones, instead. Beating them is a pleasure and, perchance, a vacuum sweeper has alighted in the family circle. Then, house cleaning is a pleasure, providing the sweeper will operate correctly. There are quite a few "ifs" and "ands" about the modern appliances but it is dollars to doughnuts that the modern housewife puts it all over the old-fashioned ma, when it comes to conservation of energy in housecleaning. And, father, also, does, not have to sit in the kitchen for three or four days now like he used to when the carpets were all taken up. After all is said modern times have their comforts.

Miss Madge Wallace went to Brunswick Sunday for a visit relatives.
