To shoot or—
To shoot or not to shoot is the question. The Federal law proclaims that there shall be no shooting of migratory birds this Spring. The state law permits it. There are good attorneys who say that the government cannot forbid shooting on any but navigable waters, claiming the states have control of other waters and lands within their borders. Some Kansas City men have been shooting ducks this year and expect to be arrested to have the legality of the law tested. Uptodate the men have not been arrested.

Save your Hair! Get a 25 cent bottle of Danderine right now—Also stops itching scalp.

Thin, brittle, colorless and scraggy hair is mute evidence of a neglected scalp; of dandruff—that awful scourge. There is nothing so destructive to the hair as dandruff. It robs the hair of its lustre, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die—then the hair falls out fast. A little Danderine tonight—now—any time—will surely save your hair.

Get a 25 cent bottle of Knowlton's Danderine from any drug store. You surely can have beautiful hair and lots of it if you will just try a little Danderine. Save your hair! Try it!

Men To Arms

The vital statistics for Missouri for the quarter ending December 1913 show that the female of the species is gaining in numbers on the insignificant male and soon will have him outnumbered as much as she at present has him outdressed.

The statistics show that of about 19,000 births there were approximately 500 more males born than females. In the death list of about half the number of births, the figures show that about 1000 more male persons died within that time than did females. With the men dying at the rate of 1000 more than did females and being born only 500 more per three months period, the end of man is soon to be. It looks like sheer decimation of the ranks of the overbearing males will bring woman rule in Missouri unless the men get up their nerve, raise more of their species and quit dying so rapidly.
