Trade for War-Cripples

The Mayor of Lyons, France has established a school in which cripples from the war can be taught trades and made to be self supporting for the remainder of their lives. An applicant must be such a cripple or wounded one as to be unable to enter his former employment, or such as do not appear to be in such condition as justifies the belief that in some short time he will be recovered so far from his wound that he can make his own way unassisted.

Such trades as shoemaking, cobbling, tailoring, gardening, toy-making, harness making, stenography, bookmaking and binding and others that the nature of the wound will not interfere with seriously in acquiring.

It is said that one leaves the establishment with a much comforted heart and enthusiastic spirit arising from a feeling of security for the future.

OLDER BUT STRONGER

To be healthy at seventy, prepare at forty, is sound advice, because in the strength of middle life we too often forget that neglected colds, or careless treatment of slight aches and pains, simply undermine strength and bring chronic weakness for later years.

To be stronger when older, keep your blood pure and rich and active with the strength-building and blood-nourishing properties of Scott's Emulsion which is a food, a tonic and a medicine to keep your blood rich, alleviate rheumatism and avoid sickness. No alcohol in Scott's.
