We have been requested to state that we were not requested to state yesterday that the Hibernians would hold a special meeting to-night, but the meeting will be held nevertheless.

The gentleman who mistook his wife's hair oil, a mixture of castor oil and alcohol, for whisky, and took several swigs thereof, is recovering. His life hung on a hair, well-oiled.

McHale with his gang of ordinance breakers—those municipal iconoclasts who smash all our rules prohibiting drunkenness—has been repairing Fifth street between Washington avenue and Walnut street. He is now on Washington avenue.

The old gal, Ferris, who humbugged so many of our citizens a short time ago, is doing her tricks in Evansville, and the spiritualists of that city are in a high state of excitement. Jennie understands her business thoroughly, and in the language of the street, is "up to snuff."

The Paducah Kentuckian explains it in this way: "One reason why nothing has been said about the tadpoles in Cairo is that the editor who does Cairo has been absent. We are looking for him home to-day, and John Oberly, Mose Harrell and the other amphibious creatures in that soft place may expect to get hankins."

The tender heads of infant weeds are beginning to appear above the ground on the sides of the streets and in other public places. We are not of a cruel disposition. On the contrary quite the reverse, as was said of old by the venerable and peculiar Capt. Bunsby. We pride ourself on the softness—not of our head, and we dare say any man to make the suggestion—but of our heart. We do, indeed, and yet in reference to those weeds, we are inclined

TO RAISE THE SANGUINARY CRY OF "OFF WITH THEIR HEADS; SO MUCH FOR DOG FENNEL."

—Tim O'Callahan's cottage which he proposes to rent, is on the corner of Division street and Washington avenue. It is not furnished, but is a cozy little house, and will be rented on very reasonable terms.

—We have received the second number of Morgan's Gallatin Gazette. It is an improvement on the first number, and is full of interesting editorial, general news and local matter. G. S. H. Joel.

—The meeting of Germans held at Washington Hall Garden, on Tuesday last, to take into consideration the propriety of having a peace jubilee in this city was largely attended. Mr. H. Meyer was called to the chair and Mr. Paul Schuh appointed secretary. After considerable discussion a committee was appointed to canvass the city for means, and was instructed to report to an adjourned meeting, at which the programme of the jubilee will be arranged and announced.

—The hostility of the country precincts to the Cairo and Vincennes railroad grows out of the desire of the country people to pay taxes for what they call the benefit of Cairo. The country precincts should not forget that the most of the money which is expended on their roads and bridges comes out of the pockets of Cairo tax-payers, and that if the country makes an issue with the city the country may lose more than it will gain. Cairo has two-thirds of all the legal voters in the county.

—Yesterday was Police Magistrate Shanessy's day; and it was dull with him, of course. The fates of policemen, maybe both, are against the old gentleman, and the consequence is Police Magistrate Bross skins off all the cream of the police business of the city. Yesterday a solitary ordinance breaker appeared before our friend asking justice. The charge was drunkenness, and that trial was entered upon. It ended suddenly. The prisoner was discharged. He had not been drunk. But, suppose he had been? What right has the city to abridge a man's rights and order him to not get drunk when he feels like getting drunk? Under the fourteenth amendment any man—even a white man—possesses the right to drink, and the right to drink implies the right to get drunk. But the Bourbonism of our council and policemen would establish the opposite rule. But it can't. We are glad to chronicle the fact that Squire Shanessy has accepted the fourteenth amendment, and intends to be in Cairo a bulwark to protect the rights which that amendment secures.

Gas.—Be it, then, understood, that on the gas question we are not an *fait*. Talk to us about saving grace, infant baptism, the possibility of converting the devil and getting him out of his present troubles into glory, the efficacy of prayer, the gulf stream, Grant's administration, communism, infallibility, the Alexander county court, or any other abstruse subject, and we shall be found not wanting, but don't let us make this request in all seriousness—don't introduce the subject of gas. We never did like gas; and we never shall, no matter what may be said in its favor by either Bixby or Gerould, Davis, that man of the Sox, being clad in a garment of comprehension—possessing a brain heavier than Webster's or Ruflet's, and an eye that can roll in a fine frenzy, may be able to understand gas, but we can't. We don't want to. The leak in the supply pipe—is that the name of the thing?—that leads gas into our meter has made us sick of gas. We therefore hand it over to the man of the Sox, and may the Lord have mercy on his patient soul—that soul of his which is as much like the soul that Job used to have as two peas are like each other. Great Davis, go in!

Dr. R. V. Purcell, of Buffalo, N. Y., sole proprietor of Dr. Sage's Catarrh Remedy, whose name is printed on the wrapper of the genuine, has for over three years offered, through nearly every newspaper in the United States, a standing reward of \$500 for a case of Catarrh in the head which he cannot cure. That he has treated thousands of cases and had no claims presented for the reward from any one who has made a thorough use of his means of cure, is strong and conclusive evidence that he possesses some means of curing this bothersome disease. The Catarrh Remedy is sold by all druggists or sent by mail on receipt of sixty cents.

A single trial will convince the most skeptical of the efficacy of HELMBOLD'S GRAPE PILLS in sick or nervous headache, jaundice, indigestion, constipation, dyspepsia, biliousness, liver complaints, general debility, etc. No nausea, no gripping pains, but mild, pleasant and safe in operation. Children take them with impunity. They are the best and most reliable. HELMBOLD'S EXTRACT SARRAPARILLA creates new, fresh and healthy blood, beautifies the complexion, and imparts a youthful appearance, dispelling pimples, blotches, moth patches and all eruptions of the skin.

BOUND OVER.—William Carter, the negro who stole \$27 from Harman Able a few days ago, was arrested by Sheehan and Arnold, and had a preliminary examination before Esquire Bross yesterday. He was bound over to the circuit court in the sum of \$500, and in default of bail was sent to the county jail.

LAST CHANCE.—The time draws near. Secure your tickets in the Grand Gift Legal Festival in aid of a public library, at Omaha before you have to pay a large premium. It is said to be a grand success. Everybody is confident it is conducted on the "square."

AVERT THE EVIL.—If mothers would give Mrs. Whitcomb's Syrup to their children when sick, mortality would be less among them. It only costs 25 cents. jeld&wlv.

MEETING OF THE CITY COUNCIL LAST NIGHT.

—The select council met in stated session last night, and after going through the regular routine of business adjourned, when the city council met in joint session. Present, Messrs. Buder, Cunningham, Halliday, Hurd, Rearden, Schuh, Sease, Taylor, Winter and Woodward.

The chair stated that the meeting was called, in part, for the purpose of appointing a committee to make some arrangements about gas.

Mr. HURD—I move that a committee of three be appointed to make a contract with the gas company for lighting the city with gas for a period not to exceed one year.

Mr. WINTER—I think the instructions to the committee should be to receive bids for lighting the city either by gas or coal oil. I understand that parties stand ready to light the city with oil.

Mr. SCHUH—Is this committee to make a final contract, or a contract subject to the approval of the council.

The MAYOR—If the council wish the contract reported the motion should so state.

Mr. REARDEN—I understand Mr. Hurd's motion to be to appoint a committee to contract for gas and not for oil.

Mr. HURD—I intended to have the contract reported for approval, and would modify my motion so as to make the motion read "to ascertain at what price the city can be lighted either by oil or gas, the committee to report to the council."

Mr. SEASE—I understand the motion to be that a committee be raised to ascertain at what cost the city can be lighted either by gas or oil.

The MAYOR—The motion had better be reduced to writing.

At this time Messrs. Walder and Kieb appeared and took their seats.

Mr. HURD—I withdraw my motion, and offer the following:

Resolved, That a special committee of three be appointed to receive proposals from any party to light the city for one year, said bids to be in by the 30th of June.

Carried.

The MAYOR—I will appoint as such committee Messrs. Hurd, Taylor and Rearden.

The MAYOR—There is another matter I would call to the attention of the council. The ordinance concerning hogs running at large has been in force sometimes, but there is no place for impounding them and the ordinance is a dead letter.

Mr. TAYLOR—I move that the committee on police and jail be instructed to prepare a portion of the lots owned by the city or some other place, as a hog pound.

Mr. WINTER—I second the motion.

It was carried, Kieb, Buder and Schuh voting "no" in very audible voices.

The MAYOR—The meeting was called for the further purpose of nominating a person to fill the vacant position of policeman. The mayor nominates Matthew Clark, and appoints Messrs. Winter and Woodward tellers.

The ballots being spread resulted as follows: Yes, 8; no, 4. A majority of all the members being necessary to a choice, Mr. Clark was not confirmed.

The MAYOR—I will now nominate William Downs.

The ballot resulted as follows: Yes, 6; no, 4. No election.

The MAYOR—The chair will re-nominate Matthew Clark.

The ballot resulted as follows: Yes, 8; no, 4.

The clerk then read the report of Messrs. Winter, Buder and Woodward special committee reporting the house of William Garing a public nuisance, unsafe, in a very filthy condition, with windows broken, doors open, and in great need of speedy abatement.

The marshal was ordered to give the owner notice to remove the building forthwith.

An invitation was received from the Rough and Ready fire company to attend their installation ceremonies next Monday night. The invitation was accepted and the council adjourned.

IS THE PRICE TOO HIGH?—The gas company of this city—or, at least, some of the stockholders—assert that the present price of the gas consumed in the street lamps is a low rate. During the year each post burns during three thousand eight hundred hours, an average of over ten hours per day, and consumes fifteen hundred feet of gas each month. The regular price—the price charged to the citizen—is \$4.50 per one thousand feet. From this statement it will be seen that the city is required to pay for the gas consumed in the street lamps \$1.50 per thousand feet less than the individual citizen pays for each thousand feet he consumes. In the council chamber, engine houses, etc., the city pays \$6.75 for every fifteen hundred feet, just as the citizen must who uses gas; and yet the city proposes to raise a rumper and lighting and repairing thrown in free—done at the expense of the gas company. We believe you, old boy, but what are we going to do about it? The gas company have us where the hair is short, and won't let go; and they can't very conveniently, if they would, because they have found in their sorrow that furnishing gas even at \$4.50 is a losing business. This is the other side of the gas question, briefly stated.

THE PLANK ROAD.—This road is in a desperately bad condition—torn up—splintered—rough as the hard world of Jordan. Teamsters curse, draymen damn it and pedestrians consign it daily to a place where it would make but a small blaze in comparison with the greater fire. But the street committee propose to go for the old thing immediately and ordered McHale to begin work on it to-day. Mac is a boss street mender, and will make the road as good as new.

GEROULD TO THE GAS.—"Out, out, blaring light!" "If I extinguish thee, thou flaming minister, I can again thy former light restore if I repent me!"

A CURE GUARANTEED.—Kross' Fever Tonic is universally recognized as the best medicine extant for the cure of fevers.

It is for sale by P. G. Schuh, druggist, two doors south of the postoffice, and he guarantees all who buy from him that it will cure chills and fevers. If it does not cure Mr. Schuh agrees to return the money. Can anything be fairer than this? may24tf

FOR SALE.—The store-house on the corner of Tenth and Walnut streets, and also the stock of groceries therein, are offered for sale together or separately. Also, a good buggy and harness will be sold on private terms. Apply for particulars on the premises. BEN. F. ECHOLS.

I do not blow as other barbers do. Nor keep my razors like King Williams sword because his sword, as all must know, Though handled well, was rough. I keep my razors sharp and keen, And Oils and Towels always clean. Perfumery, too, of all the brands, That's made in this or foreign land. A FAMILY TREASURE.—The happiest and best member of a family is usually called the light of the household, because, besides being happy and cheerful himself, or herself, he or she makes all else happy or cheerful. The Charter Oak Stove is such a treasure. jeld&wlv.

KEEP COOL.—Refrigerators, ice chests water coolers, I X L ice cream freezers bath tubs, japanned cloth for window screens, etc., etc., at

BEERWART, ORTH & CO'S, my18tf 136 Com. Ave.

INFANTS.—The most irritable and restless of these tender little household buds, are charmed as it were in quiet and sweet repose by using Mrs. Whitcomb's Syrup. jeld&wlv.

NEW ADVERTISEMENTS.

DUNBAR'S WONDERFUL DISCOVERY. BETHESDA MINERAL SPRING WATER, OF WAUKESHA WISCONSIN.

This water is the acknowledged cure of the intractable and incurable disease known as Bright's disease and diabetes. Bright's disease is fatal to the kidney, the body wastes away, destroys life by starvation of the blood.

Diabetes commences with frequent desire to pass water, great thirst, constipation, loss of strength and flesh.

Amazing cures of dropsy have been effected, brick-dust deposit, inflammation of the neck of the bladder, alkali, and gouty swellings. For the liver it is unsurpassed. It will allay all inflammation of the kidney and urinary organs in twenty-four hours, giving immediate relief; also a sure and permanent prevention of kidney congestion, and removes all traces of albumenuria. It will give relief in all cases of high fever.

EDWARD DUNBAR, Esq., General Agent at the Springs, Waukesha, Wis.

Reader, if you are afflicted with any of the foregoing diseases, write to the undersigned. His advice will cost you nothing; he can by chemical analysis possess himself of a clear knowledge of any individual case—no matter of how long standing. His wonderful discovery—Bethesda Mineral Water—is a positive remedy for the foregoing ailments. It has never failed to do what he claims for it where ever used. This water has the same good effect at the remotest part of the country, that it has at the Springs; it never loses a particle of its medicinal qualities by package or transportation. Directions how to use the water and circular will accompany each package ordered.

MICROSCOPES.

THE CELEBRATED CRAIG MICROSCOPE.

Is an optical wonder; reveals the thousands of hidden wonders of Nature; is of permanent use and practical availability, combining instruction with amusement, and never losing its interest, magnifying.

TEN THOUSAND TIMES, a power equal to other Microscopes of many times its cost. Reveals countless little worlds, a round us, teeming with life, which to the naked eye must forever remain a sealed book—such as vegetable, animals in water, cheese mites, sugar-itch insects, milk globules, claws and hairs of insects, hundreds of eyes in a single eye of a fly, dust of a butterfly's wings to be perfectly formed feathers, the much talked of Trichina spiralis, the pork worm, which was first discovered in America with this Microscope.

It is of infinite value to professional men, teachers and to students, but nowhere is it of greater value than on the family table, within the reach of every member of the family. It will delight your children and your friends during the long winter evenings. It will show you adulterations and counterfeits of various kinds of food, as sugar, tea, bread, meal, &c. It is of

INESTIMABLE VALUE TO THE FARMER in examining insects which prey upon his crops. The power of a \$50 microscope, and so simple in its construction that any child can use it, under-standingly and with appreciation.

A beautiful present, elegant, instructive, amusing, and cheap. Over 60,000 have been sold. During the past six years its worth has been testified to by thousands of scientific men, farmers, school teachers, students, physicians, heads of families, and others.
