Teethina was first used by Dr. Charles J. Moffett, a graduate of Jefferson Medical College, Philadelphia, Penn., in his extensive treatment of children in Georgia in overcoming the troubles incident to teething and hot summers. Teethina (Teething Powders) counteracts the effect of hot weather and keeps the digestive organs in a healthy condition, and has saved the lives of thousands of children in the doctor's native state, where physicians prescribe and all mothers give it, and it is criminal in mothers of our section to allow their babies and little children to suffer and perhaps die when relief can be so easily obtained by giving Teethina. It costs only 25 cents at druggists; or mail 25 cents to C. J. Moffett, St. Louis, Mo. Sold by Tydings & Co.

From the Ocala Evening Star of April 1st, 1901.

To put the brake on a wagon going down hill is a help to the horse, when the wagon is heavily loaded. But what driver would think of applying the brake to a loaded wagon going up hill? If he did, his sensible horse would probably balk. Many a man is in the condition of pulling a load up hill with the brake set against him. When his stomach is out of order, and the allied organs of digestion and nutrition impaired in their functions, a friction is set up which has to be overcome in addition to the regular performance of daily duties. A foul stomach makes a foggy brain, and the man with a disordered stomach has often to grope his way through the day's business like a man in a fog. He forgets appointments. Problems seem presented to his mind "wrong end to." This condition is entirely remedied by the use of Dr. Pierce's Golden Medical Discovery. It puts the stomach and digestive and nutritive system into a condition of perfect health, and gives a clear brain, a steady hand and a light step for the day's duties. When constipation clogs the channels of the body, Dr. Pierce's Pleasant Pellets will work an effectual cure for that disastrous disease.

When You Buy a Buggy

From Us

We will always tell you just what kind of a buggy you are getting, just how good it is, and just what to expect of it. We never exaggerate its goodness, nor deny its defects if it has any. In all cases you may be sure of this: You are getting a buggy that is worth what you paid for it—the very best that can be sold for the money. This rule applies to everything we sell. We give our customers absolutely honest treatment. We can't afford not to.
